

ECAT Pre General Science Physics Chapter 10 Optical Instruments Online Test

Sr	Questions	Answers Choice
1	Frequency of red colour as compared to that of violet colour is	A. Equal B. Smaller C. Greater D. None of these
2	Two sources are said to be coherent if they have	A. Same amplitude B. Same wavelength C. Definite phase relation with each other D. None of them
3	Light waves are	A. Mechanical waves B. Electromagnetic waves C. Any of above D. None of above
4	Light has	A. Wave nature B. Dual nature C. Particle nature D. None of them
5	Electromagnetic waves transport	A. Energy only B. Momentum only C. Both A and B D. None is correct
6	In case of constructive interference of two waves, the amplitude of the resultant wave is _____ either of the waves	A. Greater than B. Equal to C. Smaller than D. None of these
7	Angle between ray of light and the corresponding wavefront is	A. 0° B. 60° C. 90° D. 120°
8	Monochromatic light means wave of	A. Same frequency B. Same colour C. Same Wavelength D. All of them
9	Which one of the followings can act approximately as a source of monochromatic light	A. Neon lamp B. Fluorescent tube C. Sodium lamp D. None of these
10	Huygen principle is used to determine	A. Speed of light B. Location of wavefront C. About polarized and unpolarized light D. None of them
11	In case of destructive interference of two waves, the amplitude of the resultant wave will be _____ either of the waves.	A. Greater than B. Smaller than C. Equal to D. None of these
12	The locus of all the points in the same phase of vibration is called	A. Wave pocket B. Wavefront C. Wave number D. None of these
13	A line which represents the direction of travel of a wave is known as	A. Spherical wavefront B. Locus C. Ray D. Either B or C
14	Wavelength of light, on the average, is given by	A. 10^{-14} m B. 10^{-10} m C. 10^{-6} m D. 10^{-4} m
15	Huygen's principle states that	A. Light travels in straight line B. Light has dual nature C. Either of these

		D. None of these
16	The wave nature of light was proposed by	A. Newton B. Thomas Young C. Huygen D. None of these
17	The speed of the secondary wavelets as mentioned in Huygen's principle is _____ the speed of propagation of the wave itself	A. Equal to B. Greater than C. Smaller than D. None of these
18	In YDS experiment, fringe spacing means the distance between two consecutive _____ fringes	A. Bright B. Dark C. Any of A or B D. None of these
19	When the source of light is at very large distance, the shape of wavefront is	A. Spherical B. Cylindrical C. Plane D. None of these
20	Laws of reflection and refraction can also be explained by	A. Particle nature of light B. Quantum nature of light C. Wave nature of light D. Complex nature of light
21	In case of point source of light, shape of wavefront is	A. Spherical B. Cylindrical C. Plane D. None of above
22	In an interference pattern of Young's Double Slit (YDS) experiment	A. Bright fringes are wider than dark fringes B. Dark fringes are wider than bright fringes C. Both dark and bright fringes are of equal width D. Central fringes are wider than the outer fringes
23	Wavelength of red colour as compared to that of violet colour is	A. Smaller B. Longer C. Equal D. None of these
24	The appearance of colours in the soap (or oil) film results from	A. Dispersion B. Interference C. Reflection D. Refraction
25	Speed of light in vacuum depends upon	A. Frequency B. Wavelength C. Amplitude D. None of these
26	To observe interference of light, the condition, which must be met with is that the sources must be	A. Monochromatic B. Phase coherent C. Both of above D. None of above
27	The terms phase difference and path difference are	A. Same B. Different C. Equal D. none of these
28	Light waves are	A. Transverse waves B. Longitudinal waves C. Compressional D. None of them wave
29	The appearance of colours in the soap (or oil) film results from	A. Dispersion B. Interference C. Reflection D. Refraction
30	The property of light which does not change with the nature of the medium is	A. Frequency B. Amplitude C. Wavelength D. None of these
