Computer Science 10th Class English Medium Chapter 5 Online Test

Sr	Questions	Answers Choice
1	Functions could be bult-in of...........	A. Admin define B. Server define C. User define D. Both a and b
2	Which of the following are advantages of using functions.	A. Reusability of code B. Separation of tasks C. Readability of code D. All of these
3	The _____ does not describe how the function performs the task assigned to it.	A. Return value B. Function signature C. Output D. Reader
4	Which is approach of good problem solver.	A. Divide B. Divide and conquer C. Simple problem D. Complex problem
5	Char cd () { return 'a} , in this function " char" is............	A. Bodies B. Return type C. Array D. Arguments
6	The functions whihc are available in C standard Library are called.	A. User define B. Built - in C. Recursive D. Repetition
7	Output of the function is called its.	A. Return values B. Input C. Output D. Reader
8	Which is a block of statements that performs a particular task.	A. Function B. Program C. Routine D. Block
9	Which are variables of different data types that are used to receive the values passed t the function as input.	A. Value B. Input C. Price D. Parameter
10	The values passed to a function are called.	A. Built -in B. return type C. Array D. Arguments
11	The ____ of the function shold be related to its task.	A. Name B. Setup C. Routine D. Work
12	The __ of the function is the data type of the value returned by function.	A. Return type B. Input C. Output D. Value
13	The set of statement whihc are excuted in the function to fulfill the specified task.	A. Body of the function B. Calling the function C. Opening a function D. Closing the function
14	If the definition of called function appears after teh definition of calling function, then..... is required.	A. Function signature B. Call C. Read D. Function
15	_____ means to transfer the control to another function.	A. Calling B. Defining C. re-writing D. Including

16	Input of a function are called _____ of the function.	A. Function B. Program C. Reader D. Parameters
17	The function which are defined by a programmer are called.	A. Module B. User -define C. Routine D. work
18	We can call a suer -defined function from another user defined function, same as we call other functions in .... function.	A. Main B. Call C. Define D. Out
19	Print f and scanf are examples of ...... function.	A. User B. Programmer C. Common D. Built in function
20	A ____ is a block of statements that gets some inputs and provides some output.	A. Function B. Program C. Reader D. Printer
21	If there are three return statements in the function body, ... of them will be executed.	A. One B. Two C. Three D. First and last
22	Dividing the program into multiple functions improves the .... of the program.	A. Readability B. Open C. Read D. Write
23	The functions which are available in C standard Library are called.	A. Built in function B. Library functions C. Standard functions D. All of these
24	If the definition of called function appears before the definition of calling functiion, then ...... is not required.	A. Function signature B. Call C. Read D. Function
25	The advantages of using functions are.	A. Readability B. Reusability C. Easy debugging D. All
26	A function can have multiple parameters, bu tit cannot return more that ..... values.	A. One B. Two C. Three D. Four
27	Which function that is used to take input from the user.	A. output B. Input C. Scan f D. Print f
28	Which is wrong return statement.	A. Return x B. Return (x,y) C. Retrun (4,5) D. Both b and c
29	How many types of function.	A. 1 B. 2 C. 3 D. 4
30	Which means to transfer the control to that particular location.	A. Calling the function B. Opening the function C. Body the function D. Closing the function
31	Which describe imput and output of the function.	A. Calling B. Function signature C. Routine D. work
32	During the function call, the values passed to the function are called.	A. Argument B. Parameter C. Routine D. Number
33	Which functions performs commonly used mathematical calculations, string operation, imput/output operations etc.	A. Built -in function B. Library functions C. Standard functions

	input output operations etc.	C. Standard functions D. All of these
34	The value passed to the function are called.	A. Value B. Input C. Output D. Arguments
35	Which function is to desplay anything on computer screen.	A. output B. Input C. Scanf D. Print f
