7	Is this work of incessant and feverish activity.men have little time to think,much less to consider ideals and objectives yet how are we to act even in the present unless we know which way we are going and what our objectives are?It is only in the peaceful atmosphere of a university that these basic problems can be adequately considered.It is only when the young men and women who are in the university today and on whom the burden of life's problem will fall tomorrow,learn to have clear objectives and standards of values that there is hope for the next generation.The past generation produced some great men but as a generation it led the world repeatedly to disaster.Two world wars are the price that has been paid for the lack of wisdom on men's part in this generation.I think that there is always a close and intimate relationship between the end we aim at and the means adopted to attain it, Even if the end is right but the means are wrong, it will vitiate the end or divert us in a wrong direction. Means and ends are thus intimately and inextricably connected and cannot be separated. That indeed, has been the lesson of old taught us by many great men in the past but unfortunately it is seldom remembered.iii. The two world wars are the price that man paid due to:	A. At first glance, it may seem trite to maintain that a classroom could be regarded as a network of interrelationships in which group members participate more intensely than they do in the interaction occurring at the same time beyond their classroom doors. On second thought, however, one might recognize that it is indeed a new and initially rather disconcerting way to look at a group of learners and teachers. We are in the habit of thinking of them as a number of individuals, merely gathered together momentarily within a particular room. A class is a group, we might want to insist, or a class represents a room in a school plant. Both

Pure Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn fetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect A. Ignored people psychologically.
