

## GAT Subject Computer Science MCQ's Test

Sr	Questions	Answers Choice
1	A network of geographically distant computers and terminals is called a.	A. bus B. WAN C. Gate way D. LAN
2	The transfer of encoded information from one location to another by a communication channel is called.	A. Data processing B. Data distribution C. Data communication D. Data encryption
3	What does the acronym ISDN stand for?	A. International Services Data Network B. Intelligent Services Digital Data Network C. Integrated Services Digital Data Network D. Interactive Services Digital Data Network
4	Microwave transmission, coaxial cables, and fiber optics are examples of.	A. modems B. communication links C. gateways D. ring network
5	The arrangement in which most of the processing is done by the server.	A. Simplex transmission B. Electronic data interchange C. File server D. Client/Server
6	Communication circuits tht transmit data in both directions but not at the same time are operating in	A. Simplex mode B. Half Duplex mode C. Full Duplex mode D. None of above
7	A network type in which all computers have equal status.	A. Communication links B. peer to peer C. WAN D. direct connect
8	Which of the following is not a category of network problems.	A. Newsgroup problems B. Physical problems C. Electrical problems D. Viruses
9	A computer based system in which a telephone message is recorded in digital form and then forwarded to other is.	A. A teleconferencing B. Voice mail C. A bulletin board D. Telecommuting
10	The types of modulation that changes the height of the signal is called.	A. frequency B. phase C. amplitude D. Prophase
11	Which of the following topologies is passive?	A. Star topology B. Ring topology C. Bus topology D. Hybrid topology
12	Which of the following does not provide a graphical user interface.	A. OS/2 B. MS-DOS C. Macintosh D. Windows NT work station
13	Electronic banking.	A. Token ring B. Mosale C. EFT D. BBS
14	The device used with satellite transmission that ensures that strong outgoing signals do not interface with weak incoming signals is called.	A. Microwave B. Transponder C. Cable D. Modem

15	The signals produced by a computer or terminal to be sent over phone lines must be converted to.	A. modems B. analog signals C. digital signals D. microwaves
16	Cabling on a linear bus topology can be extended using which of the following.	A. Terminator B. Barrel connector C. Network adapter card D. Medium attachment unit
17	A LAN is a combination of.	A. Network adapter cards B. LAN Cables C. LAN Application software D. All of above
18	The Media Access Control sublayer resides in which OSI layer?	A. Physical B. Data link C. Net work D. Transport
19	A connection for similar networks.	A. Satellite B. gateway C. bridge D. fax
20	Graphics and other paperwork can be transmitted directly using which technology?	A. CSMA/CD B. token passing C. face smile D. Bulletin board
