

## ICS Part 2 Computer Science Chapter 12 Online Test

| 0  |                                                                                    | A 01 :                                                                                                                                                                                                                            |
|----|------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sr | Questions                                                                          | Answers Choice                                                                                                                                                                                                                    |
| 1  | A loop with in a loop is called:                                                   | A. Nested loop B. Complex loop C. Infinite loop D. Dual loop                                                                                                                                                                      |
| 2  | The loop structure in which condition comes after the body of the loop is          | A. While B. Do-while C. For D. All                                                                                                                                                                                                |
| 3  | If we want a user to enter exactly 20 values, which loop would be the best to use? | A. While B. Do-while C. For D. Infinite                                                                                                                                                                                           |
| 4  | The loop which never ends is called:                                               | A. Infinite loop B. Running loop C. Continuous loop D. Nested loop                                                                                                                                                                |
| 5  | The body of while loop with multiple statements ends with:                         | A. Right bracket ] B. Right brace } C. Comma , D. Semi colon ;                                                                                                                                                                    |
| 6  | contains icon button that are shortcuts to the commands in the menu                | A. Menu bar B. Tool bars C. Scroll bar D. Status bar                                                                                                                                                                              |
| 7  | In which loop the condition comes after the body of the loop?                      | A. While loop B. Do-while loop C. For loop D. B and C                                                                                                                                                                             |
| 8  | Which of the following loop is called counter loop?                                | A. For<br>B. While<br>C. Do-while<br>D. All                                                                                                                                                                                       |
| 9  | Where should be the loop control variable initialized?                             | A. Before the loop starts B. In the first statement of the loop body C. In the last statement of the loop body D. Anywhere in the loop body                                                                                       |
| 10 | In a for statement, this expression is executed only once:                         | A. Test B. Validation C. Initialization D. All                                                                                                                                                                                    |
| 11 | are used to enter data into databases                                              | A. Queries B. Reports C. Tables D. Forms                                                                                                                                                                                          |
| 12 | This statement may be used to stop a loop's current iteration and begin once:      | A. Continue B. Break C. Terminate D. Next                                                                                                                                                                                         |
| 13 | When is while loop more appropriate then for loop?                                 | A. The terminating condition occurs unexpectedly B. The body of loop will be executed at least once C. The program will be executed at least once D. The number times the loop will be executed is known before the loop executes |
| 14 | Which of the following loop is available in C language?                            | A. While<br>B. Do-while                                                                                                                                                                                                           |

C. For D. All What is the value of "a" after execution the following code segment: int a=2; int b=0; A. 64 while(b<5) B. 65 C. 66 D. 67 15 { a=a\*2; b=b+1; } a=a+1; A. menu bar B. Tool bar 16 are used to move around the window if its contents do not fit on screen C. Scroll bar D. Status bar A. Duplication B. No-duplication
C. Standards
D. Microsoft office integration 17 Redundancy means A. Right bracket ] B. Right brace } 18 The body of for loop with single statement ends with: C. Comma, D. Semi colon; A. The final value of a loop B. A variable that counts loop iterations 19 A counter can be defined as: C. The initial value of a loop
D. The step value of a loop E. <br> A. Rows B. Columns 20 Each record consists of a C. Both a and b D. None of these
