

## Computer Science Ics Part 2 Chapter 13 Online Test

Sr	Questions	Answers Choice
1	Which of the following is true for return statement in a function?	A. It can return one value only B. It can return integer value C. It cannot return any value D. It cannot be used in a function
2	Which of the following steps takes place when function is called:	A. The control moves to the function that is called B. All statements in the function body are executed C. The control returns back to the calling funciton D. All of these
3	Which of the following looks for the prototypes of function used in a program?	A. Linker B. Loader C. Compiler D. Parser
4	The name of actual and formal parameters:	A. May or may not be same B. Must be same C. Must be different D. Must be in lower case
5	The statement that activities a function is known as:	A. Function call B. Function output C. Function design D. Function definition
6	A variable declared inside a function is known as:	A. Local variable B. Global variable C. Automatic variable D. A and C
7	Local variables are also called:	<ul><li>A. Automatic variables</li><li>B. Normal variables</li><li>C. Global variables</li><li>D. Basic variables</li></ul>
8	Function prototype for built-in-function are specified in:	A. Source file B. Header file C. Object file D. Image files
9	In a C program, two function can have:	A. Same name B. Same parameters C. Same name & Same parameters D. Same name but different parameters
10	A value that can be sent to a function is known as:	<ul><li>A. Return value</li><li>B. Indicator</li><li>C. Argument</li><li>D. Automatic variable</li></ul>
11	A variable declaration outside any function is known as:	A. Global variable B. Local variable C. External variable D. Static variable
12	What is the variable name that is used by a function to receive passed values?	A. Funciton B. Parameter C. Expression D. Constant
13	Which of the following is NOT a valid function declaration?	A. int ave3(int a, int b, int c)  B. int 3ave(int a, int b, int c)  C. int ave3(int, int, int)  D. int ave_3(int a1, int b2, int c3)
14	Multiple arguments to a function are separated by:	A. Comments B. Semicolons C. Colons D. Commas

15	A type of functions written by the programmer is known as:	A. User-defined B. Subprograms C. Subroutines D. Built-in function
16	Which of the following is type of function available in C language?	A. User-defined B. Build-in C. Subprogram D. Both a and b
17	Which of the following is true about a function call?	A. Stops the execution of the program B. Transfer control to the called function C. Transfer control to the main function D. Resumes the execution of the function
18	Formal arguments are also called:	<ul><li>A. Actual arguments</li><li>B. Dummy arguments</li><li>C. Original arguments</li><li>D. Referenced arguments</li></ul>
19	The function definition consists of:	A. Function header or function declaration B. Function body C. Both a and b D. None
20	Which of the following is incorrect?	A. A function can call another function B. A function can be called many times in a program C. A function can return values input the user D. A function must at least one variable parameter
