

## Computer Science Ics Part 2 Chapter 13 Online Test

Sr	Questions	Answers Choice
1	Global variable are created in:	<p>A. RAM            B. ROM            C. Hard Disk            D. Cache</p>
2	The first line of function definition is known as:	<p>A. Function header            B. Function body            C. Arguments            D. Return type</p>
3	Which of the following is incorrect?	<p>A. A function can call another function            B. A function can be called many times in a program            C. A function can return values input by the user            D. A function must at least one variable parameter</p>
4	Which of the following is true for return statement in a function?	<p>A. It can return one value only            B. It can return integer value            C. It cannot return any value            D. It cannot be used in a function</p>
5	Multiple arguments to a function are separated by:	<p>A. Comments            B. Semicolons            C. Colons            D. Commas</p>
6	Function prototype for built-in-function are specified in:	<p>A. Source file            B. Header file            C. Object file            D. Image files</p>
7	Memory is allocated to a local variable at the time of the :	<p>A. Declaration            B. Destruction            C. Definition            D. First reference</p>
8	In a C program, two function can have:	<p>A. Same name            B. Same parameters            C. Same name &amp; Same parameters            D. Same name but different parameters</p>
9	Function declaration consists of:	<p>A. Function name            B. Function return type            C. Number and types of parameters            D. All of these</p>
10	A build-in function:	<p>A. Cannot be redefine            B. Can be redefined            C. Cannot return a value            D. Should be redefined</p>
11	The function definition consists of:	<p>A. Function header or function declaration            B. Function body            C. Both a and b            D. None</p>
12	Which of the following looks for the prototypes of function used in a program?	<p>A. Linker            B. Loader            C. Compiler            D. Parser</p>
13	Which of the following is true about a function call?	<p>A. Stops the execution of the program            B. Transfer control to the called function            C. Transfer control to the main function            D. Resumes the execution of the function</p>

14	Another name for build-in function is:	A. User-defined function B. Arithmetic function C. Library function D. Both a and b
15	Function define can be written:	A. Before main() function B. After main() function C. in a separate file D. All of these
16	What is the variable name that is used by a function to receive passed values?	A. Funicton B. Parameter C. Expression D. Constant
17	Th process of sending an argument to a function is called:	A. Sending B. Filtering C. Delivering D. Passing
18	A type of functions written by the programmer is known as:	A. User-defined B. Subprograms C. Subroutines D. Built-in function
19	Which of the following steps takes place when function is called:	A. The control moves to the function that is called B. All statements in the function body are executed C. The control returns back to the calling funciton D. All of these
20	The printf is a :	A. Build-in function B. User-defined function C. Local function D. Keyword
