

NAT I Engineering Verbal

Sr Questions **Answers Choice** Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder it is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in While they have not yet been able to change the genetic order of the germs they are optimistic and are holding out that in the near future they might be successful in achieving this feat They have however acquired the ability in manipulating tissue cells. However A. Catching genetic mis-information can sometimes be damaging for it may adversely affect people B. Expounding 1 psychologically Genetic information can therefore be abused and its application in deciding C. Sustaining the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but D. Restraining on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them it is mainly a societal problem At present genetic engineering is a costly process of detecting disorder but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A, U.K and Japan.lt remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world a. Which of the following is the same in meaning as the phrase holding out as used in the passage? Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder it is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in While they have not yet been able to change the genetic order of the germs they are A. Society is not affected by the optimistic and are holding out that in the near future they might be successful in achieving research in genetic engineering this feat They have however acquired the ability in manipulating tissue cells. However B. Genetic engineers are not able to say some things with certainty genetic mis-information can sometimes be damaging for it may adversely affect people 2 psychologically Genetic information can therefore be abused and its application in deciding C. If genetic information is not the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but properly handled it will create on this issue geneticists cannot be squarely blamed though this charge has often been problems leveled at them it is mainly a societal problem At present genetic engineering is a costly D. Manipulation of genes is presently process of detecting disorder but scientists hope to reduce the costs when technology done only in tissue cell becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A, U.K and Japan.lt remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world n. which of the following is not true according to the passage? Sentence Completion A. Hypnotic....attractive B. Complex...affected 3 painting style made it difficult to follow his thought processes no surprise to C. Laborious....tedious Convoluted...circumlocutory his contemporaries who were familiar with his _____ manner of talking E. Precise...arcane The history of literature really began was the earliest of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed prayers were framed. The songs and prayers became traditional and were repeated from one generation to another each generation something of its own. As A. To be artistic man slowly grew more civilized he was compelled to invent some method of writing by three B. To write war song 4 urgent necessities. There were certain things that it was dangerous to forget and which C. To write literature therefore had to be recorded it was necessary to protect one's property by making tools To record and communicate cattle and so on in some distinctive manner so man taught himself to write and having learned to write purely for utilitarian reasons he used this new method for preserving his war songs and his prayers of course among these ancient peoples there were only a very few individuals who learned to write and only a few could read what was written.e. Man invented writing because he wanted Choose the words or phrases that is most opposite in meaning to the word. A. Annuity B. Stipend 5 C. Discount **GRATUITY** D. Wages Choose the words or phrases that is most opposite in meaning to the word. A. Horrible B. Awesome 6 Deliahtful **TERRIBLE** D. Hideous A. Elevator: Skyscraper Choose a related pair of words or phrases B. Neglect: fortuitous 7 C. Summary: Narration 000/EL 0ED/#E

GRUVEL: SERVILE D. Foresee: Prescient E. Risk: Indiscriminate Choose a related pair of words or phrases A. Vacillating: action B. Fade: intensity 8 C. Security : mob FASTIDIOUS: VULGARITY D. Speeding: bourgeois Choose the words or phrases that is most opposite in meaning to the word. A. Repulse B. Reject 9 ATTRACT Renel D. Distract Choose the words or phrases that is most opposite in meaning to the word. A. Harmless B. Malignant 10 C. Hostile VIRULENT D. Vicious Choose the words or phrases that is most opposite in meaning to the word. A Prolix B. Profligate 11 **LACONIC** C. Prolific D. Bucolic Choose a related pair of words or phrases A. Army: Ammunition B. Compass : Bore 12 CALIBER: RIFLE C. Quality: Shoot D. Gauge: Rails

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to Be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with the numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, educational planning should attempt to

A. Train the people at the core.

B. Encourage conventional schools and colleges

C. Decides a terminal point to education

D. Fulfill the educational needs of everyone

Educational planning should aim at meeting the educational needs of the entire population of all age groups while the traditional structure of education as a three hierarchy from the primary stage to the university represents the core we should not overlook the periphery which is equally important under modern conditions workers need to rewind or renew their enthusiasm or strike out in a new direction or improve their skills as much as any university professor the retired and the aged have their needs as well Educational planning in their words should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education This basic defect has become all the more harmful today A UNESCO report entitled Learning to Be prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various form of self-learning A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents And performance not the period of study should be the basis for credentials The writing is already on the wall.
