Sr	Questions	Answers Choice
1	We were amazed that a man who had been heretofore the most _____ of public speakers could in a single speech electrify an audience and bring them cheering.	A. Pedestrian B. Accomplished C. Masterful D. Auspicious
2	A glue produced by bees to _____ their hives appears to contain antibiotic substances	A. Build B. Decorate C. Collect D. Design E. Structure
3	To succeed in a difficult task _____	A. You need a person of persistent B. One needs to be persistent C. One needs to be persistence D. Persistent is needed E. Persistent is what one needs
4	Dormant :	A. Active B. Vigilant C. Warbling D. Inert
5	INDETERMINATE	A. Calculated B. Conclusive C. Extravagant D. Astonished E. Excavated
6	BECALMED	A. Generous B. Tranquil C. In motion D. Simulated E. Inquisitive
7	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutans, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.</p> <p>Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.</p> <p>Which of the following can be inferred between the behavior of orangutans and that of other ape species?</p>	<p>A. While orangutans spend much of their time on the treetops, other apes live exclusively on the ground</p> <p>B. Orangutans and other types of apes are all sociable species but orgutans are more likely to bond for life</p> <p>C. Apes such as chimpanzees rely less upon their size than average orangutans do</p> <p>D. Orangutans spend less time in the company of their members of their species than do some other apes</p> <p>E. Because of their stringent territoriality orangutans are less likely to elude capture by poachers than are other apes</p>
8	Speech: Peroration	A. Dinner: Desert B. Country: Boundary C. Argument: Conclusion D. Style: Debate E. Money: House
9	ANGER : INSULT::	A. Business : Judgment B. Admiration : Happiness C. Conduct : Behavior D. Felicitous : Appreciate

10	PALTRY	A. Stallion B. Mastery C. Significant D. Absent E. Enmity
11	PARCHMENT : PAPER::	A. Pity : feeling B. Book : paging C. Trees : lumber D. Quill : pen
12	_____ i would not have helped such an ungrateful man.	A. Had i been in your place B. Even after knowing that he was ungrateful C. Had I asked him for his help D. Through he did not deserve any help at all E. If he had shown due respect to me
13	TRUCK : LORRY::	A. Adobe : Brick B. Crane : Hoist C. Carriage : Pram D. Transport : Support
14	Man power is the _____ means of converting other resource to mankind'd use and benefit	A. Indivisible B. Indispensable C. Insuperable D. Inimitable E. Inequitable
15	After a period of protracted disuse a muscle will atrophy _____both its strength and the ability to perform its function	A. Insuring B. Regaining C. Sustaining D. Losing
16	SLICE : SCALPEL::	A. Knit : Gloves B. Signal : Flare C. Yarn : Fiber D. Air : Tube
17	LECHER : LUST	A. Pith : Herb B. Glutton : Greed C. Business ; Profit D. Showbiz : Fame E. Garrulous : Cottage
18	The more we looked at the price of modern art_____	A. We liked it less B. The less we liked it C. it looked better D. The more we like it E. Better we liked it
19	CAT : FELINE::	A. Fate : fortune B. Puppet : statue C. Horse : Equine D. Tiger : Lion

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal

- A. All people can be educated as per their needs.
- B. Present educational planning is very much practical.
- C. Education is a one time process.
- D. Simple rearrangement of the present educational system is a must.

20

recreational programs, health services etc.

Q: According to the passage, the present education structures assume which of the following?

21 DEVOID

- A. Liberty
- B. Innermost
- C. Faithless
- D. Replete
- E. Cosmos

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinkers outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

22

Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

It can be inferred from the passage that the framers of the Constitution

- A. Were familiar with certain aspects of Roman government
- B. Were similar to the Roman elders
- C. Embraced the veto as the hallmark of Roman democracy
- D. Overlooked Cicero's contributions to the theory of democracy
- E. Formed a government based on world-wide democracy

23 HYPOTHETICAL

- A. Methodical
- B. Based on supposition
- C. Double faced
- D. To do with superstition
- E. Mathematical law

24

The final edition of the Love and Cheating consists of six volumes; however, only a small ----- of its full volume has ever been published.

- A. Edition
- B. Volume
- C. Fraction
- D. Chapter

Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.

25

The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after

- A. Low birth weight babies
- B. Unwed mothers
- C. Orphaned children
- D. Teenage mothers
- F. None of these

birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

The main focus of the passage is on the plight of

26	Although officials claimed that its hull was -----, the Titanic sank after hitting an iceberg.	A. Iron made B. Impenetrable C. Prominent D. Oval
27	ARCHIPELAGO : ISLAND::	A. Peninsula : Strait B. Cluster : Stars C. Border : Desert D. Sun : Planet
28	LOOM : YARN::	A. Vanish : Tale B. Wool : Sweater C. Smithy : Iron D. Admire : Disdain
29	The ----- manner in which the trainee manager candidate addressed the board of selection committee was basic reason for his rejection; the board members agreed that enthusiasm is an essential is an essential quality in a manager.	A. Imaginative B. Superior C. Timorous D. Perfunctory E. Suspicious
30	DISCONCERT	A. Sing in harmony B. Pretend C. Cancel program D. Confuse E. Interrupt
31	GENEROUS	A. Cruel B. Noble C. Selfish D. Lavish E. Intellectual
32	FOIBLE	A. Feasible B. Gull C. Luxurious D. Forte E. Powerful
33	GARRULOUS	A. Barren B. Funnel C. Censored D. Taciturn E. Notable

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc. Q: Which of the following is most opposite in meaning to the word "integral" as used in the passage?

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

47

The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: Food subsidy leads to which of the following?

- A. Sense of insecurity
- B. Increased dependence
- C. Shortage of food grains
- D. Decrease in food grains production

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

48

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older

- A. Develop various programs for adult learners.
- B. Open more colleges on traditional lines.
- C. cater to the needs of those who represent "core"
- D. Primary education should be under the control of open universities.

a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, what measures should Open University adopt to meet modern sequence means?

49	CHAOTIC	A. Immersive B. Orderly C. Hectic D. Nervous E. Embarrassing
50	The doctor warns him that unless he gives up smoking	A. His health will soon be recovered B. He will not recover C. Will he be able to recover D. He will not suffer
51	SIESTA : NAP::	A. Lariat : rope B. Farm : plantation C. Sauerkraut ; cabbage D. Coin : rug

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. 55	As----- as she is original, Tahira has created songs for theaters, classical concerts, and Pakistani movies.	A. Versatile B. Old fashioned C. Sophisticated D. Solo
56	Cupidity :	A. Estravagance B. Sherwd C. Compainsant D. Avarice

Recent advances in science and technology have made it possible for geneticists to find out

57	<p>abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q: Which of the following is the same in meaning as the word "squarely" as used in the passage?</p>	<p>A. Rigidly B. Firmly C. Directly D. At right angle</p>
58	The cheerful, lively sound of folk music ----- almost everyone.	<p>A. Expired B. Consoled C. Revived D. Accustomed E. Bared</p>
59	I bought a new car last year, but I ____ my old car yet, so at present I have two cars	<p>A. Have sold B. Did not sell C. Could not sell D. Have not sold</p>
60	<p>A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.</p> <p>Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.</p> <p>Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.</p> <p>Q: Technical know-how developed in the USA</p>	<p>A. Cannot be easily assimilated by the technocrats of the developing countries B. Can be properly utilized on the basis of developing countries being able to launch an in-depth study of their specific problems C. Can be easily borrowed by the developing countries to solve the problem of environmental degradation D. Can be very effective in solving the problem of resource management in tropical countries</p>
61	When the First constitution of Pakistan was passed?	<p>A. 1953 B. 1954 C. 1955 D. 1956</p>
62	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned</p>	<p>A. Added something of its own to the stock B. Blindly repeated the songs and prayers C. Composed its own songs and prayers D. Repeated what was handed down to it</p>

to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: As for the war songs and prayers each generations

63	FLURRY : BLIZZARD::	A. Anger : bluster B. Drizzle : downpour C. Draw ; doodle D. Simmer : cook
64	BENEDICTION:	A. Rise B. Blessing C. Curse D. Prayer
65	Pistol: Shoot	A. Stone: Throw B. Catechism: Church C. Ball: Goal D. Shaft: Fling E. Sword: Cut
66	CAPTURE	A. Confined B. Free C. Apprehend D. Seize E. Dominate
67	BATTER	A. To improve B. To beat C. To finish D. To rise E. Baking

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally don not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

68 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

A. It has been able to develop confidence in the people at large.
B. It has bot been able to utilize the entire food grains stock available.
C. It has effectively channelized the food grains to all sectors.
D. It has not been able to provide sufficient food to the poorer section of the society.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, is the main concern about the PDS?

69	Immaculate: Spotless	A. Fastidious: Punctilious B. Careless: Carefree C. Mitigate: Pain D. Allay: Aggravate E. Ally: Lesson
70	Who was the representative of Pakistan in the Boundary commission of Punjab.	A. Justice Abu Salih B. Justice S.A Rehman C. Din Muhammad D. Even Jinkins
71	DIET : ANOREXIA::	A. Teasing : Provocation B. Laughter : Irrepressible C. Appraisal : Army D. Revolutionaries : Intrigue
72	<p>The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.</p> <p>Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).</p> <p>Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.</p>	A. It has improved its effectiveness over the years. B. It has remained effective only in the cities. C. It is unique in the world because of its effectiveness. D. It has reached the remotest corner of the country.

74	CAPRICIOUS	A. Diminutive B. Sudden C. Immoral D. Steady E. Piteous

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we

layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

- A. As old as traditional education
- B. Still in formative stages
- C. In vogue in advanced countries
- D. Not practical

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, the concept of "lifetime education" is

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: At present genetic engineering can rectify all genetic disorders. Is it so?

- A. Yes
- B. No
- C. It can do so only in some cases
- D. Study of genetic disorders is out of scope of genetics.

Bizzare :

- A. Normal
- B. Strange
- C. Logical
- D. Tense

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

- A. A reality
- B. A theoretical suggestion
- C. Very funny
- D. Next to impossible

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal

recreational programs, health services etc.

Q: Which of the following is most opposite in meaning to the phrase "a far cry" as used in the passage?

79	ACRIMONIOUS	A. Acid B. Bitter C. Clever D. Soothing E. Enervate
80	DEBAUCH	A. Cleanse B. Connive C. Edify D. Malinger E. Provenance

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

- 81 Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

The author describes "two of the great disasters in intellectual history" in order to

- A. Establish a point directly related to the main argument
B. Show that certain historical claims are inaccurate
C. Demonstrate the importance of certain historical data
D. Disprove the claims made by other with a different views
E. Concede the partial accuracy of an opposing view

82	Research has also _____ the illusion that childhood dreams are pure innocence.	A. Dispelled B. Discovered C. Accepted D. Observed E. Established
83	CAT : MOUSE::	A. Bird : Worm B. Dog : Tail C. Trap : Attic D. Hide : Seek
84	If you are trying to make a strong impression on your audience you cannot do so by being understated, tentative for _____	A. Passionate B. Authoritative C. Restrained D. Argumentative
85	BRISK	A. Engrossed B. Occupied C. Diligent D. Swift E. Listless
86	LOATHING	A. Acrimonious B. Impact C. Elevation D. Craving E. Flirt

87	AFFLUENT : LUCKY::	A. Greedy : Money B. Charitable : Stingy C. Unsuccessful : Lazy D. Rely : Retort
88	Liaqat Ali Khan was murdered by	A. Muhammad Ahmed B. Sayyad Akbar C. Akbar khan D. Saeed Ahmed
89	TEMPT	A. Paramount B. Wish C. Abstemious D. Provoke E. Hoax
90	PATHOLOGICAL	A. Sick B. Healthy C. Unrealizable D. Selective E. Chemicals
91	ABOLITIONIST : SLAVERY::	A. Prohibitionist : Liquor B. Capitalist : Commerce C. Peace : War D. Glass : Jug
92	NOVICE	A. Deletion B. Beatitude C. Volley D. Veteran E. Democrat
93	Virus: Disease	A. Discussion: Fight B. Desire: Success C. Suggestion: Acceptance D. Bombardment: Destruction E. Clothes: Gentleman
94	When Muhammad Ali Bogra presented his formula?	A. Dec 8, 1952 B. Dec 19, 1952 C. Oct 17, 1953 D. None of these
95	The passengers and crew members of the aeroplane had a _____ escape when it wsa taking off from the runway	A. Little B. Breif C. Narrow D. Large E. Better
96	At the inception of Pakistan the portfolio of the governor of Sindh was given to.	A. Sir Ghulam Hussain Hidayat Ullah B. Justice Din Muhammad C. Muhammad Ayub Khoro D. Pri Illahi Buksh
97	He had the nerve to suggest that I was cheating.	A. Strength B. Capacity C. Audacity D. Courage

prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

According to the passage, ancient Roman Roads

- A. Connected many major cities in ancient Europe
- B. Are engineering marvels unequaled in modern times
- C. Are similar in some respects to modern highways
- D. Were products of democratic political institutions
- E. Caused the development of modern European cities

115

Where was the session of the Muslim League held in which Muhammad Ali Jinnah was conferred the title of Quaid-e-Azam.

- A. Agra
- B. Delhi
- C. Dhaka
- D. Patna

116

OBSOLETE

- A. Ilyrum
- B. Modern
- C. Act
- D. Paramount
- E. Hesitant

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

117

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

- A. To criticize the present educational system
- B. To strengthen the present educational practices
- C. To support non-conventional educational organizations
- D. To present a pragmatic point of view.

Q: Which of the following best describes the purpose of the author?

118	OCCULT	A. Intelligible B. Crooked C. Sectary D. Medieval E. Society
119	CARPENTER : VISE::	A. Teller : Bank B. Golfer : Club C. Mike : speak D. Angler : Fish
120	PRICE : EXORBITANT::	A. Listening : boredom B. Motion : distance C. Fire : overshoot D. Fatigue : exhaustion

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and

- A. Closing down conventional schools and colleges
- B. Longer durations for all formal courses
- C. Simple rearrangement of present educational organizations
- D. More weight for actual performance than real understanding

lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much

more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Integrating the concepts of lifelong learning with educational structure would imply

Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.

155

The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Which of the following statement is not true in the context of the passage?

- A. In the US the number of infants living in poverty is about 3 million
- B. Only 20 percent of all the pregnancies in the U.S are planned
- C. The number of single-parent families today is approximately three times that of four decades ago
- D. The number of children in the U.S. entering foster care has decreased after 1991
- E. About 6 million infants in the U.S. are likely to develop educational and health problems.

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidies on one hand and the continuing slow

production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- A. Mismanagement of food stocks
- B. Absence of proper public distribution system
- C. Production of food is less than the demand
- D. Government's apathy towards the poor

158 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: What is the tone of the author in the last sentence of the passage?

- A. Resignation
- B. Cautious
- C. Relief
- D. Concert

171

TAPESTRY : LOOM

- E. Computer : Mouse

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

172

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

- A. Traditional systems should be strengthened.
- B. Formal education is more important than non-formal.
- C. One should never cease to learn.
- D. It is impossible to meet the needs of everyone.

Q: What is the main thrust of the author?

173

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires. Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence. Many of these major cities lie for beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original. It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did

- A. Reveal the indifferent attitude taken by the ancient Romans towards the fine arts
- B. Discuss the lasting accomplishments achieved by ancient Romans
- C. Analyse the use of the Latin language by the framers of the Constitution
- D. Show that the construction of roads and aqueducts could not have been accomplished in ancient Greece.

perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape. The primary purpose of the package is to

E. Compare the destruction of the library at Alexandria to the murder of Archimedes

174 TEDIOUS

- A. Plainspoken
- B. Refreshing
- C. Coarse
- D. Appropriate
- E. Hygienic

- D. Oneself

A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.

Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.

Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.

Q: How much environmental pollution has taken place in the developing and developed world?

- A. There has been a marginal pollution of environment in the developed world and extensive damage in the developing world.
 B. There has been a considerable pollution of environment all over the globe.
 C. There has been an extensive environmental degradation both in the developed and developing world.
 D. The environmental pollution that has taken place all over the globe continues to be a matter of speculation and enquiry.

184 In order to raise the company profit, the employees

- A. Decided to raise the cost of raw material
 B. Requested the management to implement new welfare schemes
 C. Demanded two additional increments

clinical trial but on the issue, genetically cannot be equally blamed though the charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: In the passage, "abused" means

214	VACILLATE	A. Vibrating B. Reach a firm decision C. To make alliance D. Profligate E. Make vulnerable
215	When the Ameer of Kuwait visited Pakistan.	A. Sep 1947 B. Nov 1947 C. Dec 1947 D. None of these
216	CREDULOUS	A. Gullible B. Skeptical C. Unrewarded D. Humorous E. Endebted

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following in not true in context of the given passage?

218	BULK	A. Cheat B. Smallness C. Stalk D. Magnetize E. Eyewitness
219	CRAVAT : NECK::	A. Artist : Smock B. Bib : Dinner C. Muzzle : Biting D. Spats : Ankles
220	Abdicate :	A. Give up B. Imperious C. Rude D. Dissent
221	ARGUMENT : DEBATE::	A. Violence : Peace B. Fight : Contest C. Challenge : Opponent D. Doe : Stag

The public distribution system, which provides food at low prices, is a subject of vital

222	<p>concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country. Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS). Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented. The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need. It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement. Q: Which of the following words is the same in meaning as "power" as used in the passage?</p>	<p>A. Vigor B. Energy C. Influence D. Capacity</p>
223	LUMBER : WALK::	<p>A. Splinter : Fly B. Flounder ; Swim C. Seed : Rind D. Coal : Asphalt</p>
224	He is the friend _____ I trust most	<p>A. Which B. Who C. Him D. Whom</p>

C. Introducing
D. Satisfying

conventional college and conservatory, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following is most nearly the same in meaning as the word "meeting" as used in the passage?

229	SUPPLE	A. Cram B. Rigid C. Theoretical D. Lofty E. Emaciate
230	BUTCHER : MEAT::	A. Cobbler : Nail B. Juggler : Feats C. Shoes : Cobbler D. Carpenter : Wood
231	LOUTISH	A. Dejected B. Vast C. Urbane D. Pitiful E. Silent
232	ACT : STAGE::	A. Swim : Pool B. Whale : River C. Cat : Dog D. Fish : Trout
233	STIFLE	A. Volley B. Encore C. Triplet D. Promote E. Dapple
234	Abhor :	A. Crave B. Reconcile C. Detest D. Rude

Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.

However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.

Q: The growth of government is necessitated to

236	His moral decadence was marked by his _____ from the ways of integrity and honesty.	A. Obsession B. Declivity C. Departure D. Opprobrium
237	MACHINE GUN : MUSKET::	A. Tank : Chain B. Frigate : Cruiser C. Autumnal : Vernal D. Palace : Cottage
238	Many people have law degrees_____	A. But not all of them practice law B. However it isn't practiced by all C. And some of them do have practice also D. But some of them do not practice it E. Yet some are not undergoing practices
239	Prelude: Symphony	A. Drama: Epilogue B. Epilogue: Prologue C. Meal: Dessert D. Ticket: Show

240	Muslim alchemists tried to attain wealth by ----- copper and other base metals into gold.	A. Placing B. Coin aging C. Melting D. Transforming
241	Who was the first Defence Minister of Pakistan.	A. Sardar Abdul Rasheed B. I.I. Chandrigar C. Ayub Khan D. Liaqat Ali Khan

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.

242	The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.	A. They are mostly malnourished B. They are less likely to receive parental care C. They are raised by single parents D. Their parents are mostly poor E. Their parents are emotionally immature
-----	--	--

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Children born out of unplanned pregnancies are highly vulnerable because

243	Where are my spectacles?	A. There are they, on your nose! B. There they are, on your nose! C. Here are they, on your nose! D. Here they are, on your nose!
-----	--------------------------	--

Educational planning should aim at meeting the educational needs of the entire population of all age groups. 265	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutans, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.</p> <p>Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehomimid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.</p> <p>Which of the following are factors that the author indicates contribute to the orangutan's territoriality?</p>	A. The lack of available food and the antisocial nature of orangutans B. The orangutans need for large quantities of food and the infrequency with which it mates C. The threat posed by poachers and the orangutan's inability to protest itself from them. D. The difficulties that orangutans face when compelled to a socialize with other species such as chimpanzees E. The constant dangers that present themselves whenever one orangutans encounters another
266	COMPLACET	A. Notorious B. Normalized C. Extemporaneous D. Distressed E. Mammalian

An adequate level of police force B. A reasonable level of economic equality C. A reasonable amount of government interference D. A reasonable check on economic power
276	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.</p> <p>Q: The word "measure" in the context of the passage means</p>	A. Weight B. Rhythm C. Size D. Quantity
277	IRK	A. Broad B. Profound C. Delight D. Lofty E. Shock

| 318 | The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need. | A. It will abolish the imbalance of urban and rural sector.
B. It will remove poverty.
C. It will give food to the poorest without additional cost.
D. It will motivate the target group population to work more. |
|-----|--|--|

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, would be the outcome of making the PDS target group oriented?

| 319 | <p>The passage indicates that it is difficult to return orangutans to the wild for which of the following reason?</p> <p>A. The threat posed by new comers to other orangutans territory</p> <p>B. The conflict between males over available females</p> <p>C. The scarcity of available food in the orangutan environment</p> | <p>A. A only</p> <p>B. A and B only</p> <p>C. A and C only</p> <p>D. B and C only</p> <p>E. A , B and C only</p> |
|-----|--|--|

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.

- | | | |
|-----|---|--|
| 320 | <p>The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> | <p>A. Only A</p> <p>B. Only B</p> <p>C. Only C</p> <p>D. Both A & C</p> <p>E. Both B & C</p> |
|-----|---|--|

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Decide which of the following factors is/are responsible for the physical, intellectual and social under-development of infants in the U.S?

- A. Illiteracy of parents
- B. Lack of parental care
- C. Poverty

|-----|------------------------|---|

The Romans – for centuries is the masters of war and polities across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

322 Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

- A. The Latin languages
- B. Military accomplishments
- C. An extensive system of roads
- D. A democratic system of governments
- E. Wide-ranging economic influence

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

Which of the following is Not described in the passage as a part of ancient Roman life that left a lasting legacy?

323 DETECTIVE : INFORMER::

A. Author : book
B. Architect : draftsman
C. Reporter : source
D. Vacancy : empty

324 RETICENT : PRATTLE::

A. Hedonist : war
B. Phlegmatic : emote
C. Ascetic : austerity
D. Chasten : chide

325 Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

- A. Wipe off
- B. Eradicate
- C. Give birth to
- D. Wipe out

Q: Which of the following is the same in meaning as the word "obliterate" as used in the passage?

326 Bloated :

A. Privileged
B. Emaciated
C. Swollen
D. Rapture

327 Who was the first Muslim Governor of Punjab.

A. I.I. Chandrigar

344	<p>A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.</p> <p>Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.</p> <p>Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.</p> <p>Q: The poor people of the developing world can lead a happy and contented life if</p>	<p>A. There is a North-South dialogue and aid flows freely to the developing world. B. Industries based on agriculture are widely developed. C. Economic development takes place within the ambit of conservation of natural resources. D. There is an assured supply of food and medical care.</p>

It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q: Which of the following is the opposite in meaning to the word "charged" as used in the passage?</p>	A. Calm B. Disturbed C. Discharged D. Acquittal
395	CHURCH : SPIRE::	A. Temple : Shrine B. Opera : Stage C. Courtroom : Bench D. Mosque : Minaret
396	PAUCITY	A. Treachery B. Profusion C. Vixen D. Tincture E. Envious
397	His ----- painting style made it difficult to follow his thought processes - no surprise to his contemporaries, who were familiar with his ----- manner of talking.	A. Hypnotic ... attractive B. Complex ... affected C. Laborious ... tedious D. Convoluted ... circumlocutory E. Precise ... arcane
398	Oasis: Desert	A. Lunch : Desert B. Inveigh: Inveigle C. Forest : Jungle D. Ocean : Bay E. Affluence: Poverty
399	BOMBASTIC	A. Creative B. Selfish C. Artistic D. Polite E. Overbearing
400	BANE	A. Benefit B. Abundant C. Zenith D. Virtuous E. Undulate

401	ELECTRON : NUCLEUS::	A. Electric : exciting B. Earth : Sun C. Magnet : pole D. Cell : membrane
402	The Chairmen rejected the proposal of increasing employees salary because:	A. The company had already gained three thousand crore profit B. The company did not have sufficient funds to afford the rise C. The number of employees in the company was very small D. The employees had been demanding it for a long time E. It was not difficult for the company to bear additional burden
403	BALEFUL	A. Doubtful B. Virtual C. Deadly D. Headless E. Virtuous
404	EXACERBATE	A. Prolific B. Inert C. Insane D. Ameliorate E. Bronze
405	When the first Constitution Making Assembly was dissolved?	A. 1953 B. 1954 C. 1958 D. 1962
406	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutans, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.</p> <p>Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful than orangutans, the latter provide anthropologists with useful information about the behavior of prehomimid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.</p> <p>The author of the passage discusses orangutans taken from poachers in order to</p>	A. Stress the importance of preserving orangutans as a species B. Indicate the widespread practice of animal poaching C. Refute the theory that orangutans can live in a variety of environments D. Contrast the behavior of orangutans with that of other apes E. Emphasize the consequences of orangutan territoriality
407	The passengers were very happy _____ the friendly and warm treatment given to them	A. From B. To C. By D. About
408	INEXORABLE	A. Repetitive B. Tractable C. Garish D. Brackish E. Mnemonics
409	AUTHOR : INVENTOR::	A. Copy right : Patent B. Plot : Machine C. Technology : Gadget D. Book : Factory
410	Although I had pledged not to tell anyone of the previous evening trauma, the compulsive urge to unburden myself became _____	A. Preposterous B. Overwhelming C. Impassive D. Irresistible
411	After completing her usual morning walk, Salma found herself ----- tired.	A. Surprisingly B. More C. Slowly D. Unceasingly E. Incessantly

412	MOAT : CASTLE	A. Bridge : River B. Propel : Ship C. Archer : Bow D. Cummerbund : Waist E. Shoe : Foot
413	A legislation was passed to punish brokers who _____ their clients funds	A. Defalcate B. Devastate C. Devour D. Embezzle
414	ICE : SWELL::	A. Escape : Manacles B. Cramp : Stress C. Antiseptic : Infect D. Regicide : Ruler
415	<p>Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.</p> <p>However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.</p> <p>Q: The advent of science and technology has increased the</p>	A. Freedom of people B. Tyranny of the political parties C. Powers of the government D. Chances of economic inequality
416	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.</p> <p>Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.</p> <p>In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.</p> <p>Q: In the context of the passage, what is the meaning of the sentence "The writing is already on the wall"?</p>	A. Everything is uncertain now-a-days. B. changes have already taken place. C. The signs of change are already visible. D. You cannot change the future.
417	ENERGIZE : ACTIVE::	A. Gourmet : Curry B. Sever : Reckless C. Antiseptic : Infection D. Hone : Sharp
418	EBULLIENT	A. Feminine B. Dull C. Oily D. Salient E. Bulwark

419	BRACKISH	<p>A. Backward B. Having of foul smell C. Salty D. Woody E. Novelty</p>

424	The higher you go, the more difficult it is to breathe	<p>A. Is becoming B. Became</p>

424	The higher you go, the more difficult it _____ to breathe.	C. Has become D. Becomes
425	BANAL	A. Philosophical B. Original C. Dramatic D. Headless E. Commonplace
426	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.</p> <p>Q: The war song evolved out of</p>	A. Creative inspiration B. Necessity for protective measures C. Artistic urge D. Yelling and shouting
427	ORNATE	A. Monochromatic B. Balding C. Austere D. Severe E. Iconoclast

436	PILFER : ROB::	A. Doctor : Treatment B. Taste : Eat C. Affirm : Intimate

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

437 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, is the main purpose of public policy in the long run?

- A. Reducing the cost of living index by increasing supplies
- B. Providing enough food to all the citizens
- C. Good standard of living through productive employment
- D. Equalizing per capita income across different strata of society

438	ANIMOSITY	<ul style="list-style-type: none"> A. Friendliness B. Anxiety C. Eagerness D. Reliability E. Slender

...	Conservative historians who represent a traditional account as ----- because of its age.	<ul style="list-style-type: none"> A. Ancient ... established B. False ... reiterated

may be guilty of taking on trust what they should have ----- in a conscientious fashion.

- C. Mythical ... fabricated
D. Accurate ... examined
E. Suspicious ... challenged

444

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

- A. Catching
B. Hoping
C. Sustaining
D. Restraining

Q: Which of the following is the same in meaning as the phrase "holding out" as used in the passage?

445

ATTRACT

- A. Progress
B. Circummutates
C. Magnetic
D. Repel
E. Shy

446

The income tax raid was too sudden _____

- A. So that the man escaped
B. For the man escaping
C. Then the man escaped
D. For the man to escape

447

UNDERLING

- A. Topcoat
B. Yearling
C. Chief
D. Flying
E. Bridging

448

INANE

- A. Bawdy
B. Serious
C. Mature
D. Anonymous
E. Opposite

449

INDULGENT

- A. Active
B. Agile
C. Squanders
D. Oppressive
E. Discrete

450

The chairperson is a scintillating speaker whose lectures completely _____ students

- A. Entertain
B. Absorb
C. Enthrall
D. Alienate

451

If you persist in telling lies to me I shall sue you _____ slander.

- A. For
B. On
C. With
D. To

452

The whale shark is found in equatorial deep waters around the world, it is ----- encountered by divers.

- A. Rarely
B. Successfully
C. Anxiously
D. Constantly

453

SQUANDER

- A. Scale
B. Rebuff
C. Haunt
D. Hoard
E. Lessen

454

CHEF : RECIPE

- A. Celestial : Deferential
B. Musician : Score
C. People : Band
D. Novelist : Book

D. Novelist : Puzzle
E. Ambivalent : Dexterous

455	VESSEL : FLEET	A. Forest : Clearing B. Squadron : Rank C. Hound : Pack D. Wide : Trunk E. Lion : Lair
456	Work: Tired	A. Player: Field B. Swim : Pool C. Race: Fatigue D. Book: Knowledge E. Cook: Eat
457	LIKELY : PROBABILITY::	A. Sailor : Mutineer B. Bright : Radiance C. Funereal : Eulogy D. Defying : Enemy

When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement. Q: Which of the following, according to the passage, is compared with dearness allowance?</p>	A. Food for work program B. Unemployment allowance C. Food subsidy D. Procurement price of food grains
481	APATHY	A. Enemy B. Love C. Noble D. Temptation E. Lucrative
482	<p>Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.</p> <p>The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects</p>	A. Lower rate of babies surviving childhood diseases B. Larger proportion of babies who are deprived of immunization C. Lower proportion of new born babies with normal weight D. Higher incidence of adolescent girls becoming mothers E. Increasing cases of teenage couples getting divorced

are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Which of the following does not constitute the quite crisis in the U.S as per the task force report?

483	ETHEREAL : EMPHREAL	A. Fetus : Offspring B. Earnest : saccharine C. Novice : Expert D. Obsequious : Sycophantic E. Jargon : Authentic
484	BOTANY : PLANTS::	A. Land : Shrubs B. Astronomy : Stars C. Anthropology : Thorn D. Philosophy : Encyclopedia
485	When I saw him through the window_____	A. I ran out to open the door B. I have run out to open the door C. I should run out to open the door D. I am running out to open the door

501	Wheel: Hub	A. Sea: Island B. Body: Heart C. Ruling Part: Cabinet D. Life: Happiness E. Watch: Needle
502	Who was the Prime Minister of Pakistan at the time of Khatm-i-Nabuwat Movement against the Qadianis?	A. Liaqat Ali Khan B. Khawaja Nazmi ud Din C. Muhammad Ali Ch D. Muhammad Ali Bogra

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, educational planning should attempt to

- A. Train the people at the core.
- B. Encourage conventional schools and colleges
- C. Decide a terminal point to education
- D. Fulfill the education needs of everyone

Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.

However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the

- A. Time of prosperity
- B. Time of adversity
- C. time without government
- D. Time of police atrocities

government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.

Q: 'Era of good feeling' in the paragraph refers to

505	SCOWL : SMILE	A. Jazz : Harsh B. Acid : Vinegar C. Tendentious : Buck D. Wine : Water E. Despair : Hope
506	Dowry is no longer permitted by law even in _____ marriage	A. Natural B. Bigamous C. Love D. Conventional E. Polygamous
507	TACITURN	A. Sentimental B. Uncommunicative C. Diplomatic D. Calculating E. Bifurcates
