Sr	Questions	Answers Choice
1	<p>The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country. Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS). Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented. The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need. It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement. Q: Which of the following words is the same in meaning as "power" as used in the passage?</p>	<p>A. Vigor B. Energy C. Influence D. Capacity</p>
2	<p>He very successfully _____ all the allegations leveled against him</p>	<p>A. Retaliated B. Rebutted C. Extricated D. Eradicated E. Protected</p>
3	<p>CHURCH : SPIRE::</p>	<p>A. Temple : Shrine B. Opera : Stage C. Courtroom : Bench D. Mosque : Minaret</p>
4	<p>A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.</p> <p>Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.</p> <p>Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained</p>	<p>A. Formulated very ambitious plans of protecting habitat in the region B. Laid a great stress on the conservation of natural resources in their educational endeavour C. Carefully dovetailed environmental conservation with the overall strategy of planned economic development D. Sought the help of US experts in solving the problem of environmental degradation.</p>

development.

Q: Some of the developing countries of Asia and Africa have

5	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q: In the passage, "abused" means</p>	<p>A. Insulted B. Talked about C. Killed D. Misused</p>
6	<p>The China got the membership of the United Nations?</p>	<p>A. Aug 14, 1970 B. Oct 24 ,1970 C. Oct 26, 1971 D. None of these</p>
7	<p>Wheel: Hub</p>	<p>A. Sea: Island B. Body: Heart C. Ruling Part: Cabinet D. Life: Happiness E. Watch: Needle</p>
8	<p>ADMONISH</p>	<p>A. Hypnotic B. Honor C. Encourage D. Scold E. Prepare</p>
9	<p>When was Muhammad Ali Jinnah given the title of Quaid-e-Azam,?</p>	<p>A. 1928 B. 1938 C. 1948 D. 1940</p>
10	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.</p> <p>Q: The first war-song</p>	<p>A. Was inspired by God B. Developed spontaneously C. Was a song traditionally handed down D. Was composed by leading dancers</p>
11	<p>BLITHE</p>	<p>A. Despondent B. Mysterious C. Angelic D. Rigid E. Opaque</p>
		<p>A. Bird : Worm</p>

12	CAT : MOUSE::	B. Dog : Tail C. Trap : Attic D. Hide : Seek
13	CREDULOUS	A. Gullible B. Skeptical C. Unrewarded D. Humorous E. Endebted
14	MENTOR	A. Lawyer B. Counselor C. Enemy D. Curator E. Compiler
15	AUTHOR : INVENTOR::	A. Copy right : Patent B. Plot : Machine C. Technology : Gadget D. Book : Factory
16	OBLIVION	A. Remembrance B. Bounced C. Slaughter D. Sentimentality E. Whirlpool
17	Crestfallen :	A. Humiliated B. Hard C. Elite D. Frustrated
18	DEVOID	A. Liberty B. Innermost C. Faithless D. Replete E. Cosmos
19	SUCCINCT	A. Helpless B. Overbearing C. Felonious D. Long-winded E. Blemish
20	He has _____ people visiting him at his house because he fears it will cause discomfort to neighbours	A. Stopped B. Warned C. Curtailed D. Requested E. Forbidden
21	If you persist in telling lies to me I shall sue you _____ slander.	A. For B. On C. With D. To
22	How many sets were given to East Bengal in fist assembly?	A. 40 B. 41 C. 44 D. 47
23	BEEF : COW::	A. Venison : Buffalo B. Sheep : Mutton C. Mutton : Sheep D. Pork : Goat
24	If you are trying to make a strong impression on your audience you cannot do so by being understated, tentative for _____	A. Passionate B. Authoritative C. Restrained D. Argumentative
25	SLURP : SIP::	A. Watch : minute B. Snipe : skirmish C. Guffaw ; giggle D. Tiptoe : stumble
26	Mohtarma Fatima Jinnah constested the election against.	A. Zulficar Ali Butto B. Ayub Khan C. Liaqat Ali Khan D. Yahya Khan
27	PUERILE	A. Mature B. Servile C. Odoriferous D. Signify E. Juvenile
28	Turbid: Muddy	A. River: Lake B. Tree: Darkness C. Bell: Ring D. Sun: Shine

D. Huge: Colossal
E. Deep: Shallow

29	The telephone _____ several times before I answered it	A. Has rung B. Was ranging C. Would ring D. Had rung
30	TEMPERANCE	A. Miserliness B. Callousness C. Dissipation D. Sloth E. Hospitality
31	Flurry: Confusion	A. Water: Thirst B. Night: Sleep C. Colour: Attraction D. Job: Pay E. Intimidate: Fear
32	CAPTURE	A. Confined B. Free C. Apprehend D. Seize E. Dominate
33	We lost confidence in Salim because he never _____ the grandiose promises he had made	A. Tired of B. Delivered on C. Retreated from D. Forget about
34	GARRULOUS	A. Barren B. Funnel C. Censored D. Taciturn E. Notable
35	UNDERLING	A. Topcoat B. Yearling C. Chief D. Flying E. Bridging
36	Prelude: Symphony	A. Drama: Epilogue B. Epilogue: Prologue C. Meal: Dessert D. Ticket: Show E. Preamble: Constitution

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

37

- A. Possibility of abuse
B. It is confronted by ethical problems.
C. Increased tendency to manipulate gene cells
D. Acquired ability to detect genetic disorders in unborn babies

Q: Which of the following is not true of the genetic engineering movement?

38	PERORATION : ADDRESS	A. Preamble : Speech B. Orchestration : Overture C. Score : Finale D. Chapter : Fiction E. Denouement : Novel
----	----------------------	---

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He

yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

- 39 As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

- A. To be artistic
B. To write was song
C. To write literature
D. To record and communicate

Q: Man invented writing because he wanted

- 40 CANT
- A. Singing through the nose
B. A temporary catchword
C. Begging
D. A penny whistle
E. Affected manner of speech

- 41 RECALCITRANT
- A. Submissive
B. Maladroit
C. Audacious
D. Travail
E. Divert

- 42 His moral decadence was marked by his _____ from the ways of integrity and honesty.
- A. Obsession
B. Declivity
C. Departure
D. Opprobrium

- 43 Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

- A. Process
B. Focus
C. Fact
D. Goal

Q: Which of the following is the same in meaning as the word "feat" as used in the passage?

- 44 EVADE ; QUESTION::
- A. Shirk : malingerers
B. Elicit ; response
C. Parry : blow
D. Knowledge : thrust

- 45 IMPETUOUS
- A. Defensive
B. Ardent
C. Hobbyist
D. Wary
E. Squeal

- 46 BINOCULARS : SEE::
- A. Spectacle : Notice
B. Skeptic : Idea
C. Ear trumpet : Hear
D. Camera : Aperture

- 47 Culmination :
- A. Nadir
B. Apex
C. Lenient
D. Blunt

48	As ----- of the Sindh supreme selection board, Allah Bachayo had free ----- to all Government rest houses throughout the country.	A. A scholar - admission B. A survivor - passage C. An organizer - submission D. An institution - advice E. A member - entrance
49	SLIPHOD : ORGANIZATION::	A. Clever : Shroud B. Cringing : Obsequious C. Prodigal : Generosity D. Phelgmatic : Emotion
50	Belying has mother's worries, Amir's behavior throughout the function was_____	A. Imaginable B. Imperial C. Immodest D. Impeccable E. Impervious
51	VOLUBLE	A. Fat B. Loud C. Talkative D. Rambling E. Adore
52	Chains: Clang	A. Leaves: Twings B. Coins:Jangle C. Door: Lock D. Wolf: Roar E. Wire: Snap
53	When the first Constitution Making Assembly was dissolved?	A. 1953 B. 1954 C. 1958 D. 1962
54	DETACH	A. Separate B. Pack C. Bottom line D. Scratch E. Ambulatory
55	When Muhammad Ali Bogra presented his formula?	A. Dec 8, 1952 B. Dec 19, 1952 C. Oct 17, 1953 D. None of these
56	EAGLE : AMERICA::	A. Bath : Turkey B. John Bull : England C. Oriole : Baseball D. Statue : Liberty
57	Maria forced herself to eat every piece on her plate; although she found the food practically-----.	A. Delicious B. Spicy C. Inedible D. Nourishing
58	Because its chief accountant altered figures and completely fabricated other, the company's financial records were entirely	A. Hidden B. Spurious C. Transparent D. Taxable
59	Every person must learn_____	A. That his time needs a wise use B. Wise ways in his time's use C. That how wisely his time can be used D. To make wise use of his time E. To using his time in a wisely manner
60	What is the height of Minar-i-Pakistan?	A. 210 Feet B. 196 Feet C. 276 Feet D. 180 Feet

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tons of vast arcades

From aqueducts carried water hundreds of miles along the tops of vast arches. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

- 61 Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

It can be inferred from the passage that the framers of the Constitution

- A. Were familiar with certain aspects of Roman government
B. Were similar to the Roman elders
C. Embraced the veto as the hallmark of Roman democracy
D. Overlooked Cicero's contributions to the theory of democracy
E. Formed a government based on world-wide democracy

- 62 SHORTAGE

- A. Paucity
B. Niggardly
C. Wastage
D. Hostage
E. Foliage

- 63 URBANE

- A. Loitering
B. Rustic
C. Churlish
D. Misguided
E. Square

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

- 64 As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: As for the war songs and prayers each generations

- A. Added something of its own to the stock
B. Blindly repeated the songs and prayers
C. Composed its own songs and prayers
D. Repeated what was handed down to it

- 65 She stood _____ Ahsan, but could not utter a single word for quite some time.

- A. About
B. Before
C. For
D. To
E. Towards

- 66 PATHOLOGICAL

- A. Sick
B. Healthy
C. Unrealizable
D. Selective
E. Chemicals

- 67 SIMULATED

- A. Sequential
B. Authentic
C. Discouraged
D. Mixed
E. Depressed

- 68 UPBRAID

- A. Hurdle
B. Praise
C. Downcast
D. Dishevel
E. Clump

69	ABOLITIONIST : SLAVERY::	A. Prohibitionist : Liquor B. Capitalist : Commerce C. Peace : War D. Glass : Jug
70	SCREAM : WHISPER::	A. Staircase : Elevator B. Pedal : Bicycle C. Blaze : Spark D. Repel : Attract
71	In order to raise the company profit, the employees	A. Decided to raise the cost of raw material B. Requested the management to implement new welfare schemes C. Demanded two additional increments D. Decided to go on paid holidays E. Offered to work over time without any compension
72	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.</p> <p>Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costums agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehomimid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.</p> <p>Which of the following can be inferred between the behavior of orangutans and that of other ape species?</p>	A. While orangutans spend much of their time on the treetops, other apes live exclusively on the ground B. Orangutans and other types of apes are all sociable species but orgutants are more likely to bond for life C. Apes such as chimpanzees rely less upon their size than average orangutans do D. Orangutans spend less time in the company of their members of their species than do some other apes E. Because of their stringent territoriality orangutans are less likely to elude capture by poachers than are other apes
73	AUTHOR : ROYALTIES::	A. Archive : Presidents B. Writer : Monarch C. Agent : Percentage D. Patron : Patronage
74	SQUANDER	A. Scale B. Rebuff C. Haunt D. Hoard E. Lessen
75	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and wee repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.</p> <p>Q: Before men invented writing,</p>	A. Literature was passed on by word of mouth B. Prayers were considered literature C. Literature was just singing and dancing D. there was no literature
		A. Death : fight

76	APPEARANCE : SUBPOENA::	B. Payment : bill C. Health : game D. Applause : encore
77	Cupidity :	A. Extravagance B. Sherwd C. Compainsant D. Avarice
78	The ----- manner in which the trainee manager candidate addressed the board of selection committee was basic reason for his rejection; the board members agreed that enthusiasm is an essential is an essential quality in a manager.	A. Imaginative B. Superior C. Timorous D. Perfunctory E. Suspicious
79	BANAL	A. Philosophical B. Original C. Dramatic D. Headless E. Commonplace
80	ENERGIZE : ACTIVE::	A. Gourmet : Curry B. Sever : Reckless C. Antiseptic : Infection D. Hone : Sharp
81	How many sets wre givne to Punjab in first assembly.	A. 22 B. 23 C. 24 D. 26
82	TERSE	A. Chattering B. Threefold C. Lean D. Miserly E. Lumped together

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- 83 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

- A. Sense of insecurity
B. Increased dependence
C. Shortage of food grains
D. Decrease in food grains production

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: Food subsidy leads to which of the following?

84	GIDDY	A. Level-headed B. Mourn C. Portable D. Swirl E. Withdraw
85	We were amazed that a man who had been heretofore the most _____ of public speakers could in a single speech electrify an audience and bring them cheering.	A. Pedestrian B. Accomplished C. Masterful D. Auspicious
86	ELECTRON : NUCLEUS::	A. Electric : exciting B. Earth : Sun C. Magnet : pole D. Cell : membrane
87	STETHOSCOPE : PHYSICIAN::	A. Microscope : amoeba B. Psychiatrist : couch C. Wrench : plumber D. Bat : baseball

- Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

- 88
- A. Ignored
B. Hotly debated
C. Unanswered
D. Left to the scientists to decide

Q: According to the passage, the question of abortion is

- Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.
- The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

- 89
- A. 3 times
B. 3.5 times
C. 1.5 times
D. 2 times
E. Not mentioned in the passage

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects

children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

from infancy through preschool years that sets the stage for a child's future.

The number of children born to married mothers in the U.S. is approximately how many times the number of children born to unwed mothers?

Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutans, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.

- 90 Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehomimid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.

The author of the passage discusses orangutans taken from poachers in order to

- A. Stress the importance of preserving orangutans as a species
B. Indicate the widespread practice of animal poaching
C. Refute the theory that orangutans can live in a variety of environments
D. Contrast the behavior of orangutans with that of other apes
E. **Emphasize the consequences of orangutan territoriality**

164	<p>Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.</p> <p>However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.</p> <p>Q: 'Era of good feeling' in the paragraph refers to</p>	<p>A. Time of prosperity B. Time of adversity C. time without government D. Time of police atrocities</p>
165	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

172

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

- A. Traditional systems should be strengthened.
B. Formal education is more important than non-formal.
C. One should never cease to learn.
D. It is impossible to meet the needs of everyone.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: What is the main thrust of the author?

173

JAUNDICED

- A. Unprejudiced
B. Servile
C. Remitted
D. Discounted Variable

174

Quaid-e-Azam spend the last days of his life at which of the following places.

- A. Karachi
B. Lahore
C. Ziarat
D. Quetta

175

RUNE : ALPHABET

- A. Range : Mountain
B. Team : Player
C. Suspicious : Thief
D. Stream : Water
E. Star : Constellation

176

He passed the examination in the first class because he _____

- A. Worked hardly for it
B. Was hard working for it
C. Was working hard for it
D. Had worked hard for it

177

True health and true success go together for they are inseparably _____ in the thought realm.

- A. Interwined
B. Tied up
C. Bound up
D. Inter-related

178

DIET : ANOREXIA::

- A. Teasing : Provocation
B. Laughter : Irrepressible
C. Appraisal : Army
D. Revolutionaries : Intrigue

179

SOPHIST : TRUTH::

- A. Quack : medicine
B. Director : plan
C. Alarmist : legend
D. Actor : shoot

180

FOIBLE

- A. Feasible
B. Gull
C. Luxurious
D. Forte
E. Powerful

181

DOUR

- A. Implausible
B. Cheerful
C. Boring
D. Portal
E. Spotted

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, educational planning should attempt to

- A. Train the people at the core.
- B. Encourage conventional schools and colleges
- C. Decide a terminal point to education
- D. Fulfill the education needs of everyone

182

183

Thin: Sparse

- A. Tract: Tome
- B. Prologue: Epilogue
- C. Preface: Book
- D. Tree: Tall
- E. Corpulent: Obese

184

When the last session of the All India Muslim League working committee was held?

- A. Aug 13, 1947
- B. Sep, 11, 1947
- C. Dec 13, 1947
- D. 1st July, 1948

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. <p>The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.</p> <p>Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).</p> <p>Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.</p>		
194	The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.	A. It has improved its effectiveness over the years. B. It has remained effective only in the cities. C. It is unique in the world because of its effectiveness. D. It has reached the remotest corner of the country.
<p>It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.</p> <p>Q: Which of the following is true of public distribution system?</p>

200	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.Q:According to the author, the present state of knowledge about heredity has made geneticists</p>	A. The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided

is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

210 Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

The author describes "two of the great disasters in intellectual history" in order to

- A. Establish a point directly related to the main argument
- B. Show that certain historical claims are inaccurate
- C. Demonstrate the importance of certain historical data
- D. Disprove the claims made by other with a different views
- E. Concede the partial accuracy of an opposing view

211 TACITURN

227	ANIMOSITY	A. Friendliness B. Anxiety C. Eagerness D. Reliability E. Slender
228	<p>Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.</p> <p>The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>Decide which of the following factors is/are responsible for the physical, intellectual and social under-development of infants in the U.S?</p> <p>A. Illiteracy of parents</p> <p>B. Lack of parental care</p> <p>C. Poverty</p>	<p>A. Only A</p> <p>B. Only B</p> <p>C. Only C</p> <p>D. Both A & C</p> <p>E. Both B & C</p>
229	BEHOLD	A. To hold B. To heat C. To see D. To speak E. Sigh

A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.

Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.

Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.

Q: Technical know-how developed in the USA

- A. Cannot be easily assimilated by the technocrats of the developing countries
- B. Can be properly utilized on the basis of developing countries being able to launch an in-depth study of their specific problems
- C. Can be easily borrowed by the developing countries to solve the problem of environmental degradation
- D. Can be very effective in solving the problem of resource management in tropical countries

232

233

ATHEIST

- A. Hypnotic
- B. Bane
- C. Believer
- D. Theorist
- E. Alarmist

234

LINEAL

- A. Unconnected
- B. Isolated
- C. Directly descended
- D. Wrinkled
- E. Circular

235

He is believed to be a very industrious worker.

- A. Successful
- B. Sensible
- C. Punctual
- D. Diligent

236

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires. Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence. Many of these major cities lie for beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original. It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tributes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape. The primary purpose of the package is to

- A. Reveal the indifferent attitude taken by the ancient Romans towards the fine arts
- B. Discuss the lasting accomplishments achieved by ancient Romans
- C. Analyse the use of the Latin language by the framers of the Constitution
- D. Show that the construction of roads and aqueducts could not have been accomplished in ancient Greece.
- E. Compare the destruction of the library at Alaxandria to the murder of Archimedes

237

BROOM : SWEEP::

- A. Rack : Leaves
- B. Attic : Basement
- C. Dove : Peace
- D. Admire : Disdain

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity

its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains

production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: The word "square" as used in the passage means

- A. Rich
- B. Sumptuous
- C. Sufficient
- D. Quality

238

239

Research has also _____ the illusion that childhood dreams are pure innocence.

- A. Dispelled
- B. Discovered
- C. Accepted
- D. Observed
- E. Established

240

Who was the representative of Pakistan in the Boundary commission of Punjab.

- A. Justice Abu Salih
- B. Justice S.A Rehman
- C. Din Muhammad
- D. Even Jinkins

241

With the current wave of crime, travelers on Lahore route are ----- to make sure their wallet is secure.

- A. Banned
- B. Irreverent
- C. Illiterate
- D. Urged
- E. Permitted

242

ABHOR : DISLIKE::

- A. Calcify : Petrify
- B. Rebuke : Ridicule
- C. Torture : Discomfort
- D. Fodder : Cattle

243

Usually your work very hard _____

- A. You are not being successful
- B. You will not be successful
- C. You ought to be successful
- D. You be not successful

244

FASTIDIOUS : VULGARITY::

- A. Vacillating : action
- B. Fade : intensity
- C. Security : mob
- D. Speeding : bourgeois

245

Foot : Toe

- A. Body: Legs
- B. Belly: Intestines
- C. Nail: Fingers
- D. Hand: Fingers
- E. Leaves: Tree

A. Fertile

- B. Rejecting
C. Crater
D. Lacking freedom
E. Concave

Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.

247

The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

The main focus of the passage is on the plight of

- A. Low birth weight babies
B. Unwed mothers
C. Orphaned children
D. Teenage mothers
E. None of these

248

SOOTHE

- A. Simmer
B. Eat greedily
C. Excite
D. Purify
E. Vibrate

249

MUMBLE : SHOUT::

- A. Tickle : poke
B. Hunger : lunch
C. Provoke : tease
D. Flipper : swim

250

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: why, according to the author, is genetic misinformation severely damaging?

- A. The cost involved is very high.
B. Some people are unjustly branded as inferior.
C. Both A and B
D. Neither A nor B

251

At the inception of Pakistan the portfolio of the governor of Sindh was given to.

- A. Sir Ghulam Hussain Hidayat Ullah
B. Justice Din Muhammad
C. Muhammad Ayub Khoro
D. —————

252	AUSPICIOUS	A. Pictorial B. Ill-starred C. Trusting D. Blunt E. Scions	
253	HORRIBLE	A. Sabotage B. Agreeable C. Dogmatic D. Repulsive E. Appealing	
254	INANE	A. Bawdy B. Serious C. Mature D. Anonymous E. Opposite	
255	TACTFUL	A. Unbound B. Boorish C. Lazy D. Renowned E. Polished

A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.

273	<p>Developing countries are becoming more aware of the ways in which present and future economic development must be built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.</p> <p>Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.</p> <p>Q: There has been pronounced deterioration of habitat all over the globe because of</p>	<p>A. 293	After completing her usual morning walk, Salma found herself ----- tired.	A. Surprisingly B. More C. Slowly D. Unceasingly E. Incessantly
294	<p>Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.</p> <p>However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.</p> <p>Q: "Tolerable state of balance" in the last sentence of the first paragraph may mean</p>	A. An adequate level of police force B. A reasonable level of economic equality C. A reasonable amount of government interference D. A reasonable check on economic power
295	BRAZEN	A. Red-handed B. Irony C. Modest D. Trespass E. Fireplace
296	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. There is a lack of advance technology to explore hidden areas of human brain. B. Technicians have not been able to manipulate germ cells. C. Ordinary microscope is unable to observe nerve cells D. Genetics is too complex to resolve

detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: Which of the following, according to the author, could be the short-coming of genetic in becoming an exact science?

some useful information

297 ACCUMULATE

- A. Proliferate
- B. Abuse
- C. Congress
- D. Rally
- E. Board

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

298

As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: The war song evolved out of

- A. Creative inspiration
- B. Necessity for protective measures
- C. Artistic urge
- D. Yelling and shouting

299 GREGARIOUS

- A. Posterior
- B. Outstanding
- C. Poisonous
- D. Reclusive
- E. Congenital

300 OCCULT

- A. Intelligible
- B. Crooked
- C. Sectary
- D. Medieval
- E. Society

301 FRAGILE:

- A. Strong
- B. Grave
- C. Weak
- D. Showy

302 DRAMA : STAGE::

- A. Disease : relapse
- B. Commercial : program
- C. Eclipse : gulf
- D. Movie : cinema

303 Nobody has come to see us _____ we bought these fierce dogs

- A. Since
- B. For
- C. When
- D. Till

304 The green supernova is still ----- cosmetologists, as it had never been seen clearly, making it impossible to study its nature.

- A. Admiring for
- B. Enigmatic to
- C. Dangerous to
- D. Exploited by
- E. Famous among

305 GARGOYLE

- A. Stone spout
- B. Golden eagle
- C. Garish
- D. Vile
- E. Negation

306 GENEROUS

- A. Cruel
- B. Noble
- C. Selfish
- D. Lavish
- E. Intellectual

307 Who was the Chairman of the Punjab Boundary commission .

- A. Justice Abu Salih
- B. Justice S.A. Rehman
- C. Even Jinkins
- D. Baderoff

324	you drop in it	C. Immortal D. Inexhaustible
325	There are _____ views on the issue of getting bonus to the employees.	A. Modest B. Adverse C. Independent D. Divergent E. Valuable
326	Who inaugurated the National Bank of Pakistan.	A. Liaqat Ali Khan B. Muhammad Ali Jinnah C. Shoaib Quraishi D. Sikandar Mirza

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left

out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

327	<p>The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.</p> <p>It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.</p> <p>Q: Which of the following is the main reason for insufficient supply of enough food to the poorest?</p>	<p>A. Mismanagement of food stocks B. Absence of proper public distribution system C. Production of food is less than the demand D. Government's apathy towards the poor</p>

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people

A. Catching

329	<p>as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q: Which of the following is the same in meaning as the phrase "holding out" as used in the passage?</p>	<p>B. Hoping C. Sustaining D. Restraining</p>
330	<p>The benefits of the cooperative program are -----, with both companies acquiring new production techniques.</p>	<p>A. Challenging B. Exclusive C. Normal D. Mutual</p>
331	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.</p> <p>Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.</p> <p>In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.</p> <p>Q: According to the author, the concept of "lifetime education" is</p>	<p>A. As old as traditional education B. Still in formative stages C. In vogue in advanced countries D. Not practical</p>

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- 346 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

- A. It has been able to develop confidence in the people at large.
B. It has not been able to utilize the entire food grains stock available.
C. It has effectively channelized the food grains to all sectors.
D. It has not been able to provide sufficient food to the poorer section of the society.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS

supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, is the main concern about the PDS?

347	BULK	A. Cheat B. Smallness C. Stalk D. Magnetize E. Eyewitness
-----	------	---

Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.

348	<p>The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>Children born out of unplanned pregnancies are highly vulnerable because</p>	A. They are mostly malnourished B. They are less likely to receive parental care C. They are raised by single parents D. Their parents are mostly poor E. Their parents are emotionally immature

-----	---------	---

Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.

354

However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.

Q: The advent of science and technology has increased the

- A. Freedom of people
- B. Tyranny of the political parties
- C. Powers of the government
- D. Chances of economic inequality

355 SYNCHRONIZED

- A. Arhythmic
- B. Resonating
- C. Harmonized
- D. Bough
- E. Chronological

356 GROVEL : SERVILE

- A. Elevator : Skyscraper
- B. Neglect : fortuitous
- C. Summary : Narration
- D. Foresee : Prescient
- E. Risk : Indiscriminate

357 Immaculate: Spotless

- A. Fastidious: Punctilious
- B. Careless: Carefree
- C. Mitigate: Pain
- D. Allay: Aggravate
- E. Ally: Lesson

358 SUPPLE

- A. Cram
- B. Rigid
- C. Theoretical
- D. Lofty
- E. Emaciate

359 The income tax raid was too sudden_____

- A. So that the man escaped
- B. For the man escaping
- C. Then the man escaped
- D. For the man to escape

360 DETECTIVE : INFORMER::

- A. Author : book
- B. Architect : draftsman
- C. Reporter : source
- D. Vacancy : empty

361 Who was the Prime Minister of Pakistan at the time of Khatm-i-Nabuwat Movement against the Qadianis?

- A. Liaqat Ali Khan
- B. Khawaja Nazmi ud Din
- C. Muhammad Ali Ch
- D. Muhammad Ali Bogra

362 Zenith: Nadir

- A. Serious: Sober
- B. Food: Hungry
- C. Fat: Protiens
- D. Majestic: Sublime
- E. Peak: Foot

363 VIABLE

- A. Feasible

381	BENEDICTION:	A. Rise B. Blessing C. Curse D. Prayer
382	PALTRY	A. Stallion B. Mastery C. Significant D. Absent

383 PARROT : APE::

- A. Curve : Arc
 B. Wood : Tree
 C. Crane : Boar
 D. Alarm : Fire

384 The ----- workshop had not been used in years

- A. Orphan
 B. Advanced
 C. Decorated
 D. Renovated
 E. Derelict

Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutans, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.

385 Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful than orangutans, the latter provide anthropologists with useful information about the behavior of prehuman primates and how apelike behavior influenced our ancestors search for the food and family beneath the forest canopy.

The primary purpose of this passage is to

- A. Describe some behavioral and evolutionary characteristics of organisms
 B. Analyse the reason why early primates left their forest dwellings
 C. Illustrate the dangers posed to orangutans by poachers
 D. Show how orangutan behavior differs from that of other primates
 E. Criticise anthropologists who misinterpret orangutan behavior

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much

386

progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: Which of the following is the same in meaning as the word "obliterate" as used in the passage?

- A. Wipe off
 B. Eradicate
 C. Give birth to
 D. Wipe out

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in

- A. It has become popular to abort female fetuses.
 B. Human beings are extremely interested in heredity.
 C. Economically sound and

387 deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

C. Economically sound and scientifically advanced countries can provide the infrastructure for such research.
D. Poor countries desperately need genetic information

Q: Which of the following is true regarding the reasons for progress in genetic engineering?

388	EXACERBATE	A. Prolific B. Inert C. Insane D. Ameliorate E. Bronze
389	PAUCITY	A. Treachery B. Profusion C. Vixen D. Tincture E. Envious
390	Producers of Punjabi films have long decried the ----- of the Lahore movie critics, whose reviews can determine the fate of a film in a month.	A. Fallacy B. Poverty C. Cruelty D. Power E. Absent mindedness

401	Sad : Morose	A. Robust: Weak B. Ingress: Egress C. Grass: Food D. Glad: Happy
402	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and wee repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.</p> <p>Q: The word "measure" in the context of the passage means</p>	A. 404

1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following best describes the purpose of the author?

- A. To criticize the present educational system
- B. To strengthen the present educational practices
- C. To support non-conventional educational organizations
- D. To present a pragmatic point of view.

405

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, what should be the basis for awarding credentials?

- A. Duration of the course
- B. Competence of the course teachers
- C. Diversity of the topics covered
- D. Real grasp of matter or skill

406

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal

- A. Different modules with same function
- B. Same module for different groups
- C. No modules but standard compulsory program for all
- D. None of these.

with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: What should be the major characteristic of the future educational system?

407	When I saw him through the window_____	A. I ran out to open the door B. I have run out to open the door C. I should run out to open the door D. I am running out to open the door

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factor can lead to educational and

A. Lower rate of babies surviving

parents when taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.

434

The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Which of the following does not constitute the quite crisis in the U.S as per the task force report?

- A. Lower rate of babies surviving childhood diseases
- B. Larger proportion of babies who are deprived of immunization
- C. Lower proportion of new born babies with normal weight
- D. Higher incidence of adolescent girls becoming mothers
- E. Increasing cases of teenage couples getting divorced

435

- D. Solo

438

Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangulants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.

Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costums agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.

Which of the following are factors that the author indicates contribute to the orangutan's territoriality?

- A. The lack of available food and the antisocial nature of orangutans
- B. The orangutans need for large quantities of food and the infrequency with which it mates
- C. The threat posed by poachers and the orangutan's inability to protest itself from them.
- D. The difficulties that orangutansface when compelled to a socialize with other species such as chimpanzees
- E. The constant dangers that present themselves whenever one orangutans encounters another

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular

- A. Connected many major cities in ancient Europe
- B. Are engineering marvels unequaled in modern times
- C. Are similar in some respects to modern highways
- D. Were products of democratic political institutions
- E. Caused the development of modern European cities

prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

According to the passage, ancient Roman Roads

449	<p>Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.</p> <p>However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.</p> <p>Q: The growth of government is necessitated to</p>	A. Make the rich and the poor happy B. Curb the accumulation of wealth in a few hands C. Monitor science and technology D. Deploy the police force wisely
450	ANARCHY : GOVERNMENT::	A. Democracy : Republic B. Penury : Wealth C. Verbosity : Words D. Socialism : Custom

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the

- A. All people can be educated as per their needs.
- B. Present educational planning is very much practical.
- C. Education is a one time process.
- D. Simple rearrangement of the present educational system is a must.

learners of different categories and increasing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the passage, the present education structures assume which of the following?

462 The Chairmen rejected the proposal of increasing employees salary because:

- A. The company had already gained three thousand crore profit
- B. The company did not have sufficient funds to afford the rise
- C. The number of employees in the company was very small
- D. The employees had been demanding it for a long time
- E. It was not difficult for the company to bear additional burden

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

463 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

- A. It will abolish the imbalance of urban and rural sector.
- B. It will remove poverty.
- C. It will give food to the poorest without additional cost.
- D. It will motivate the target group population to work more.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a

psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, would be the outcome of making the PDS target group oriented?

464 The second Islamic Conference of the heads of states took place in which city of Pakistan.

- A. Lahore
- B. Islamabad
- C. Karachi
- D. None of these

465 The waiter hasn't bought the coffee _____ I've been here an hour already.

The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>Which of the following statement is not true in the context of the passage?</p>	<p>A. In the US the number of infants living in poverty is about 3 million B. Only 20 percent of all the pregnancies in the U.S are planned C. The number of single-parent families today is approximately three times that of four decades ago D. The number of children in the U.S. entering foster care has decreased after 1991 E. About 6 million infants in the U.S. are likely to develop educational and health problems.</p>
470	Axiom:	A. Absurdity B. Shirk C. Elude D. Maxim
471	CONSEQUENCE	A. Effective B. Plan C. Cause D. Retaliation E. Shame
472	To succeed in a difficult task_____	A. You need a person of persistent B. One needs to be persistent C. One needs to be persistence D. Persistent is needed E. Persistent is what one needs
473	Dormant :	A. Active B. Vigilant C. Warbling D. Inert
474	INCIDENCE	A. Stubbornness B. The range of occurrence C. Anecdotes D. Conclusion E. Drastic
475	He ran _____	A. Quickly B. So quickly C. Quick D. So quick
		A. Vanish : Tale B. Woe! : Supter

476	LOOM : YARN::	B. Wool : Sweater C. Smithy : Iron D. Admire : Disdain
477	REDUNDANT	A. Insufficient B. Expanded C. Profound D. Numerous E. Verbose

479	Dowry is no longer permitted by law even in _____ marriage	A. Natural B. Bigamous C. Love D. Conventional E. Polygamous
480	Her reaction was not the only _____ one.	A. Workable B. Possible C. Likely D. Good
481	ACT : STAGE::	A. Swim : Pool B. Whale : River C. Cat : Dog D. Fish : Trout
482	CAMERA : SIGHT::	A. Pictures : anthology B. Type : touch C. Headphone : hearing D. Thirst : water
483	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at tis infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as</p> <p>inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q:What is the tone of the author in the last sentence of the passage?</p>	A. Resignation B. Cautious C. Relief D. Concert
484	<p>The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.</p> <p>Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).</p> <p>Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally don not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.</p> <p>The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of P.A. to the poor, the self-employed and those in the unorganized</p>	A. Reducing the cost of living index by increasing supplies B. Providing enough food to all the citizens C. Good standard of living through productive employment D. Equalizing per capita income across different strata of society

subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, is the main purpose of public policy in the long run?

485	BATTER	A. To improve B. To beat C. To finish D. To rise E. Baking
486	Who of the following formed the Jinnah Muslim League??	A. Muzafar Ali Qazalbash B. Malik feroz khan noon C. Mian Iftikhar uddin D. Iftikhar hussain mamdoot
487	ILLICIT	A. Enlighten B. Illusive C. Legal D. Cover up E. Reflect
488	PORTLY	A. Briskly B. Vessel C. Slender D. Entirely E. Empty
489	The more we looked at the price of modern art_____	A. We liked it less B. The less we liked it C. it looked better D. The more we like it E. Better we liked it
490	LISTLESS	A. Turbulent B. Prolific C. Peace D. Dynamic E. Precious
491	He seized control of the country _____	A. By using diplomacy and force B. By diplomacy and being forceful C. By being a diplomat and forceful D. Not only because of diplomacy force
492	EQUILIBRIUM	A. Parallel B. Tranquilizer C. Membrane D. Imbalance E. Overseer
493	Who was the first Defence Minister of Pakistan.	A. Sardar Abdul Rasheed B. I.I. Chandrigar C. Ayub Khan D. Liaqat Ali Khan
494	GLORIFY	A. Rectify B. Appraise C. Extol D. Abase E. Exalt
495	The unruly behavior of the children _____ their parents	A. Aggrieved B. Impeached C. Incensed D. Tempered
496	Bizzare :	A. Normal B. Strange C. Logical

		D. Tense
497	DISPARAGE	A. Compare B. Optimism C. Acclaim D. Peerage E. Regroup
498	Who was the first Muslim Governor of Punjab.	A. I.I. Chandrigar B. A.R.Nishtar C. Mushtaq gormani D. Mian abdul bari
499	IMPAIR	A. Supplant B. Enhance C. Extend D. Graceful E. Singly
500	Who was the second Governor General of Pakistan?	A. Sikandar Mirza B. Liaqat Ali Khan C. Khawaja Nazim Uddin D. Malik Ghulam Muhammad
501	When the elections were held in East Bengal during the Bogra Govt?	A. Feb 1953 B. April, 1955 C. March 1954 D. May 1955
502	HYPOTHETICAL	A. Methodical B. Based on supposition C. Double faced D. To do with superstition E. Mathematical law
503	Work: Tired	A. Player: Field B. Swim : Pool C. Race: Fatigue D. Book: Knowledge E. Cook: Eat
504	CALIBER : RIFLE::	A. Army : ammunition B. Compass : bore C. Quality : shoot D. Gauge : rails
505	MENDICANT : BEGGING::	A. Coup : Thunder B. Proponent : Abstained C. Player : Chess D. Charlatan : Deception

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- 506 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.
- A. To make it target group oriented
B. To increase the amount of food grains per ration card
C. To decrease the allotment of food grains to urban sector
D. To reduce administrative cost

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What should be an appropriate step to make the PDS effective?

507

TORPOR

- A. Rankle
- B. Impeach
- C. Commentator
- D. Vigor
- E. Teetotaler
