

## NAT II Oriental & Islamic Studies Verbal

Sr	Questions	Answers Choice
1	TAWDRY	A. Marble B. Humidity C. Insolvent <b>D. Elegant</b> E. Awestruck
2	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.</p> <p>Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.</p> <p>In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.</p>	A. Different modules with same function B. Same module for different groups C. No modules but standard compulsory program for all <b>D. None of these.</b>
3	<p>Q: What should be the major characteristic of the future educational system?</p> <p>Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.</p> <p>The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are</p>	A. Lower rate of babies surviving childhood diseases B. Larger proportion of babies who are deprived of immunization C. Lower proportion of new born babies with normal weight D. Higher incidence of adolescent girls becoming mothers <b>E. Increasing cases of teenage couples getting divorced</b>

the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Which of the following does not constitute the quite crisis in the U.S as per the task force report?

4 ABRUPT

- A. Above
- B. Sudden**
- C. Noisy
- D. Calm
- E. Agnation

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

5 As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measures in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: The war song evolved out of

6 The doctor advised him to go \_\_\_\_\_ several medical tests.

- A. Through**
- B. Into
- C. Under
- D. About

7 Derogate:

- A. Exaggerate
- B. Calm
- C. Deflenerate**
- D. Ordain

8 Whichever way you approach the problem

- A. It will not solve
- B. It will not be solved**
- C. No one will not solve it
- D. It will not be solve

9 BOTANY : PLANTS::

- A. Land : Shrubs
- B. Astronomy : Stars**
- C. Anthropology : Thorn
- D. Philosophy : Encyclopedia

10 He applied for and was \_\_\_\_\_ legal aid by the Labour Ministry.

- A. Allowed
- B. Awarded
- C. Offered
- D. Granted**
- E. Implemented

11 Although I had pledged not to tell anyone of the previous evening trauma, the compulsive urge to unburden myself became \_\_\_\_\_

- A. Preposterous
- B. Overwhelming
- C. Impassive
- D. Irresistible**

12 PARROT : APE::

- A. Curve : Arc**
- B. Wood : Tree
- C. Crane : Boar
- D. Alarm : Fire

Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance

- A. Unhappy with the rich people
- B. More interested in freedom and security

13

However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.

Q: A spirit of moderation on the part of economically sound people would make the less privileged

C. Unhappy with their lot  
D. Clamourless for absolute equality

14 ABSTRACT

A. Theoretical  
B. Confused  
C. Indefinite  
D. Unrealistic  
E. Paintings

15 After completing her usual morning walk, Salma found herself ----- tired.

A. Surprisingly  
B. More  
C. Slowly  
D. Unceasingly  
E. Incessantly

16 UPBRAID

A. Hurdle  
B. Praise  
C. Downcast  
D. Dishevel  
E. Clump

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: What is the tone of the author in the last sentence of the passage?

A. Resignation  
B. Cautious  
C. Relief  
D. Concert

18 ANGER : INSULT::

A. Business : Judgment  
B. Admiration : Happiness  
C. Conduct : Behavior  
D. Felicitous : Appreciate

19 Who was the third President of Pakistan?

A. Sikandar Mirza  
B. Zulfiqar Ali Butto  
C. Ayub Khan  
D. Agha Muhammad Yahya Khan

20 Some of the sculptures formerly ----- the Hindu artist are now thought to have been created by one of his Muslim students.

A. Denied by  
B. Attributed to  
C. Adapted from  
D. Submitted to
