

NAT-IIB Biological Science Verbal Hard Test

Sr	Questions	Answers Choice
1	<p>Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.</p> <p>The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>Children falling in which age group are most severely affected by the quite crisis?</p>	<p>A. Between 2 & 3 years B. Between 1 & 3 years C. Below 1 year D. Below 3 years E. None of these</p>
2	If they share burden alternatively, then	<p>A. Won't get tired B. Will get fatigued C. Can't feel tiring D. Will get tired soon E. Don't get tired</p>
3	PROFUSION	<p>A. Penetration B. Abundance C. Scarcity D. Ordinance E. Audacity</p>
4	ABHOR : DISLIKE::	<p>A. Calcify : Petrify B. Rebuke : Ridicule C. Torture : Discomfort D. Fodder : Cattle</p>
5	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.</p> <p>Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing</p>	<p>A. Lifelong learning is a recent concept. B. Worker's knowledge and skills also need to be updated constantly. C. "I earning to Be" defends that</p>

is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following is not true in context of the given passage?

C. Learning to be a scientist that there is a terminal point to education.
D. Schools and colleges should open extension services.

6	Who inaugurated the National Bank of Pakistan.	A. Liaqat Ali Khan B. Muhammad Ali Jinnah C. Shoaib Quraishi D. Sikandar Mirza
7	SOPHIST : TRUTH::	A. Quack : medicine B. Director : plan C. Alarmist : legend D. Actor : shoot
8	SIESTA : NAP::	A. Lariat : rope B. Farm : plantation C. Sauerkraut : cabbage D. Coin : rug
9	Prelude: Symphony	A. Drama: Epilogue B. Epilogue: Prologue C. Meal: Dessert D. Ticket: Show E. Preamble: Constitution
10	The waiter hasn't bought the coffee_____ I've been here an hour already.	A. Up B. Till C. Still D. Yet
11	MACHINE GUN : MUSKET::	A. Tank : Chain B. Frigate : Cruiser C. Autumnal : Vernal D. Palace : Cottage
12	GROAN : SCREAM::	A. Stroll : Amble B. Clown : Crone C. Strained : Wit D. Grin : Guffaw
13	Fresh: New	A. Disease: Malaise B. Supercilious: Meek C. Epical :Homorous D. Indigent : Affluent E. Strident: Polite

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

His Cicero and his like who are perhaps the most overlooked legacy of Rome. While

A. Establish a point directly related to the main argument
B. Show that certain historical claims are inaccurate
C. Demonstrate the importance of certain historical data
D. Disprove the claims made by other with a different views
E. Concede the partial accuracy of an opposing view

14

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

The author describes "two of the great disasters in intellectual history" in order to

15

Who of the following formed the Jinnah Muslim League??

- A. Muzafar Ali Qazalbash
- B. Malik feroz khan noon
- C. Mian Iftikhar uddin
- D. Iftikhar hussain mamdoot

16

Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.

- A. Time of prosperity
- B. Time of adversity
- C. time without government
- D. Time of police atrocities

However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.

Q: 'Era of good feeling' in the paragraph refers to

17

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left

out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- A. Sense of insecurity
- B. Increased dependence
- C. Shortage of food grains
- D. Decrease in food grains production

The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest

initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: Food subsidy leads to which of the following?

18	Quaid-e-Azam spend the last days of his life at which of the following places.	A. Karachi B. Lahore C. Ziarat D. Quetta
19	AVIARY	A. A weighing machine B. A birdbath C. An old measure of weight D. A bird enclosure E. Group of birds
20	Bequeath:	A. Alienate B. stab C. Obstruct D. Dispose of
21	Zenith: Nadir	A. Serious: Sober B. Food: Hungry C. Fat: Protiens D. Majestic: Sublime E. Peak: Foot
22	LOOM : YARN::	A. Vanish : Tale B. Wool : Sweater C. Smithy : Iron D. Admire : Disdain
23	BIZARRE	A. Fair B. Lottery C. Muddled D. Ordinary E. Lull
24	LUMBER : WALK::	A. Splinter : Fly B. Flounder ; Swim C. Seed : Rind D. Coal : Asphalt
25	URBANE	A. Loitering B. Rustic C. Churlish D. Misguided E. Square
26	The more we looked at the price of modern art_____	A. We liked it less B. The less we liked it C. it looked better D. The more we like it E. Better we liked it
27	INDULGENT	A. Active B. Agile C. Squanders D. Oppressive E. Discrete
28	INCIDENCE	A. Stubbornness B. The range of occurrence C. Anecdotes D. Conclusion E. Drastic

Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.

However, with necessity of meeting all these dangers and threats to liberty, the power of government are unavoidably increased, regardless of the political parties

- A. An adequate level of police force
- B. A reasonable level of economic equality
- C. A reasonable amount of government interference
- D. A reasonable check on economic power

powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.

Q: "Tolerable state of balance" in the last sentence of the first paragraph may mean

30	He had the nerve to face the robbers all alone.	A. Strength B. Capacity C. Audacity D. Courage
31	HOVEL	A. Crowd B. Whisk C. Pudding D. Palace E. Dust
32	DRAMA : STAGE::	A. Disease : relapse B. Commercial : program C. Eclipse : gulf D. Movie : cinema
33	He has_____ people visiting him at his house because he fears it will cause discomfort to neighbours	A. Stopped B. Warned C. Curtailed D. Requested E. Forbidden
34	REDUNDANT	A. Insufficient B. Expanded C. Profound D. Numerous E. Verbose
35	When I saw him through the window_____	A. I ran out to open the door B. I have run out to open the door C. I should run out to open the door D. I am running out to open the door
36	The income tax raid was too sudden_____	A. So that the man escaped B. For the man escaping C. Then the man escaped D. For the man to escape
37	SLICE : SCALPEL::	A. Knit : Gloves B. Signal : Flare C. Yarn : Fiber D. Air : Tube
38	FOIBLE	A. Feasible B. Gull C. Luxurious D. Forte E. Powerful
39	INITIATE : END	A. Enthusiasm : Euphemism B. Sum : Difference C. Malignant : Cancer D. Attend : Ignore E. Start : Begin
40	SHORTAGE	A. Paucity B. Niggardly C. Wastage D. Hostage E. Foliage

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing

- A. Traditional systems should be strengthened.
- B. Formal education is more important than non-formal.

41

is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: What is the main thrust of the author?

- C. One should never cease to learn.
- D. It is impossible to meet the needs of everyone.

42	Whichever way you approach the problem	<ul style="list-style-type: none">A. It will not solveB. It will not be solvedC. No one will not solve itD. It will not be solve
43	BANE	<ul style="list-style-type: none">A. BenefitB. AbundantC. ZenithD. VirtuousE. Undulate
44	Who of the following formed the Awami League?	<ul style="list-style-type: none">A. Shaikh Mujeeb ur RehmanB. Hussain Shaheed SuhrawardiC. Maulana BhashaniD. A.K. Fazal ul Haq
45	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangulants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.</p> <p>Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costums agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.</p> <p>Which of the following can be inferred between the behavior of orangutans and that of other ape species?</p>	<ul style="list-style-type: none">A. While orangutans spend much of their time on the treetops, other apes live exclusively on the groundB. Orangutans and other types of apes are all sociable species but orgutants are more likely to bond for lifeC. Apes such as chimpanzees rely less upon their size than average orangutans doD. Orangutans spend less time in the company of their members of their species than do some other apesE. Because of their stringent territoriality orangutans are less likely to elude capture by poachers than are other apes
46	APATHY	<ul style="list-style-type: none">A. EnemyB. LoveC. NobleD. TemptationE. Lucrative
47	Maria forced herself to eat every piece on her plate; although she found the food practically- -----.	<ul style="list-style-type: none">A. DeliciousB. SpicyC. InedibleD. Nourishing
48	DEBAUCH	<ul style="list-style-type: none">A. CleanseB. ConniveC. EdifyD. MalingerE. Provenance
49	He is so lazy that he	<ul style="list-style-type: none">A. Cant delay the schedule of completing the workB. Cant depend on others for getting his work doneC. Always extends help to others to complete their work

		D. Can seldom complete his work on time
50	TACITURN	A. Sentimental B. Uncommunicative C. Diplomatic D. Calculating E. Bifurcates
51	DOLLAR : DIME	A. Rupee : Frank B. Saleswoman : Pitch C. Retreat : Victory D. Century : Decade E. Ring : Necklace
52	ILLICIT	A. Enlighten B. Illusive C. Legal D. Cover up E. Reflect
53	GREGARIOUS	A. Posterior B. Outstanding C. Poisonous D. Reclusive E. Congenital
54	When the elections were held in East Bengal during the Bogra Govt?	A. Feb 1953 B. April, 1955 C. March 1954 D. May 1955
55	GROVEL : SERVILE	A. Elevator : Skyscraper B. Neglect : fortuitous C. Summary : Narration D. Foresee : Prescient E. Risk : Indiscriminate
56	NOVICE	A. Deletion B. Beatitude C. Volley D. Veteran E. Democrat
57	True health and true success go together for they are inseparably _____ in the thought realm.	A. Intertwined B. Tied up C. Bound up D. Inter-related
58	AUTHOR : INVENTOR::	A. Copy right : Patent B. Plot : Machine C. Technology : Gadget D. Book : Factory
59	LIKELY : PROBABILITY::	A. Sailor : Mutineer B. Bright : Radiance C. Funereal : Eulogy D. Defying : Enemy
60	How much did it _____ to reach Bombay by car?	A. Cost B. Estimate C. Charge D. Price E. Pay

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of

- A. Train the people at the core.
- B. Encourage conventional schools and colleges
- C. Decide a terminal point to education
- D. Fulfill the education needs of everyone

61

advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, educational planning should attempt to

62	HYPOTHETICAL	A. Methodical B. Based on supposition C. Double faced D. To do with superstition E. Mathematical law
63	SLIPPHOD : ORGANIZATION::	A. Clever : Shroud B. Cringing : Obsequious C. Prodigious : Generosity D. Phlegmatic : Emotion
64	TACTFUL	A. Unbound B. Boorish C. Lazy D. Renowned E. Polished
65	The doctor warns him that unless he gives up smoking	A. His health will soon be recovered B. He will not recover C. Will he be able to recover D. He will not suffer

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: In the context of the passage, what is the meaning of the sentence "The writing is already on the wall"?

67	HAPHAZARD	A. Systematic B. Ecstasy C. Linear D. Follower E. Dangerous
68	Bloated :	A. Privileged B. Emaciated C. Swollen D. Rapture

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity

continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left

out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What should be an appropriate step to make the PDS effective?

- A. To make it target group oriented
- B. To increase the amount of food grains per ration card
- C. To decrease the allotment of food grains to urban sector
- D. To reduce administrative cost

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: The war song evolved out of

- A. Creative inspiration
- B. Necessity for protective measures
- C. Artistic urge
- D. Yelling and shouting

Who was the first Muslim Governor of Punjab.

- A. I.I. Chandrigar
- B. A.R. Nishtar
- C. Mushtaq gormani
- D. Mian abdul bari

UPBRAID

- A. Hurdle
- B. Praise
- C. Downcast
- D. Dishevel
- E. Clump

Where are my spectacles?

- A. There are they, on your nose!
- B. There they are, on your nose!
- C. Here are they, on your nose!
- D. Here they are, on your nose!

		B. Here they are, on your nose.
74	Man power is the _____ means of converting other resource to mankind'd use and benefit	A. Indivisible B. Indispensable C. Insuperable D. Inimitable
75	When the Ameer of Kuwait visited Pakistan.	E. Inequitable A. Sep 1947 B. Nov 1947 C. Dec 1947 D. None of these
76	GLORIFY	A. Rectify B. Appraise C. Extol D. Abase E. Exalt
77	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at tis infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.Q:According to the author, the present state of knowledge about heredity has made geneticists</p>	A. Introspective B. Accusative C. Arrogant D. Optimistic

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the passage, the present education structures assume which of the following?

- A. All people can be educated as per their needs.
B. Present educational planning is very much practical.
C. Education is a one time process.
D. Simple rearrangement of the present educational system is a must.

97	Giggle: Chortle	A. Smile: Grin B. Melancholy: Antipathy C. Emancipation: Bondage D. Insipid: Charming E. Edifice: Fecade
98	BRAZEN	A. Red-handed B. Ironic C. Modest D. Trespass E. Fireplace

102 ORNATE

- A. Monochromatic
- B. Balding
- C. Austere
- D. Severe
- E. Iconoclast

A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.

103

Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.

- A. Formulated very ambitious plans of protecting habitat in the region
- B. Laid a great stress on the conservation of natural resources in their educational endeavour
- C. Carefully dovetailed environmental conservation with the overall strategy of planned economic development
- D. Sought the help of US experts in solving the problem of environmental degradation.

Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.

Q: Some of the developing countries of Asia and Africa have

104 CONSEQUENCE

- A. Effective
- B. Plan
- C. Cause
- D. Retaliation
- E. Shame

105 When India exploded its first nuclear test?

- A. Feb 16, 1974
- B. April 14, 1975
- C. June 16, 1976
- D. May 18, 1974

106 Liaqat Ali Khan was murdered by

- A. Muhammad Ahmed
- B. Sayyad Akbar
- C. Akbar khan
- D. Saeed Ahmed

107 When Muhammad Ali Bogra presented his formula?

- A. Dec 8, 1952
- B. Dec 19, 1952
- C. Oct 17, 1953
- D. None of these

108 What is the height of Minar-i-Pakistan?

- A. 210 Feet
- B. 196 Feet
- C. 276 Feet
- D. 180 Feet

109 DISCONCERT

- A. Sing in harmony
- B. Pretend
- C. Cancel program
- D. Confuse
- E. Interrupt

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still

form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

110 Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

It can be inferred from the passage that the framers of the Constitution

- A. Were familiar with certain aspects of Roman government
- B. Were similar to the Roman elders
- C. Embraced the veto as the hallmark of Roman democracy
- D. Overlooked Cicero's contributions to the theory of democracy
- E. Formed a government based on world-wide democracy

<p>The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.</p> <p>Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).</p> <p>Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.</p> <p>The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.</p> <p>It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.</p> <p>Q: The word "square" as used in the passage means</p>

131	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangulants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.</p> <p>Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.</p> <p>The primary purpose of this passage is to</p>	A. Describe some behavioral and evolutionary characteristics of organisms B. Analyse the reason why early primates left their forest dwellings C. Illustrate the dangers posed to orangutans by paochers D. Show how orangutan behavior differs from that of other primates E. Criticise anthropologists who misinterpret orangutan behavior
132	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors

nation's 12 infants and toddlers live in poverty. As many as half suffer from factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.

149 The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of

children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Which of the following does not constitute the quite crisis in the U.S as per the task force report?

- A. Lower rate of babies surviving childhood diseases
- B. Larger proportion of babies who are deprived of immunization
- C. Lower proportion of new born babies with normal weight
- D. Higher incidence of adolescent girls becoming mothers
- E. Increasing cases of teenage couples getting divorced

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

174

The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, is the main concern about the PDS?

- A. It has been able to develop confidence in the people at large.
- B. It has not been able to utilize the entire food grains stock available.
- C. It has effectively channelized the food grains to all sectors.
- D. It has not been able to provide sufficient food to the poorer section of the society.

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

175

As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: As for the war songs and prayers each generations

- A. Added something of its own to the stock
- B. Blindly repeated the songs and prayers
- C. Composed its own songs and prayers
- D. Repeated what was handed down to it

176

With great difficulty, _____

- A. He could keep his cool
- B. He could get annoyed
- C. He could not tolerate his nonsense
- D. He could lose his temper
- E. He could perform his usual functions easily

192	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall. In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.Q: Which of the following is most opposite in meaning to the word "integral" as used in the passage?</p>	
193	Who was the third President of Pakistan?	A. Sikandar Mirza B. Zulfikar Ali Butto C. Ayub Khan D. Agha Muhammad Yahya Khan

199	TEDIOUS : BOREDOM	A. Burglar : Warning B. Witty : Rejuvenation C. Enigmatic : Uncertainty D. Square : Circle E. Cliche : Epigram
-----	-------------------	--

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

200

- A. Wipe off
- B. Eradicate
- C. Give birth to
- D. Wipe out

Q: Which of the following is the same in meaning as the word "obliterate" as used in the passage?

A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount importance.

Developing countries are becoming more aware of the ways in which present and future economic development must be built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection

201

and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.

Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.

234	<p>Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.</p> <p>The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>Children born out of unplanned pregnancies are highly vulnerable because</p>	A. They are mostly malnourished B. They are less likely to receive parental care C. They are raised by single parents D. Their parents are mostly poor E. Their parents are emotionally immature

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinkers outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to

library – both occurred under Rome’s watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome’s economic and political influence.

241

Many of these major cities lie far beyond Rome’s original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome’s decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master orator as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. “Republic” itself is Latin for “the people’s business,” a notion cherished in democracies worldwide. Senators owe their name to Rome’s class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

According to the passage, ancient Roman Roads

A. Connected many major cities in ancient Europe

- B. Are engineering marvels unequalled in modern times
- C. Are similar in some respects to modern highways
- D. Were products of democratic political institutions
- E. Caused the development of modern European cities

242

The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>The main focus of the passage is on the plight of</p>	A. Low birth weight babies B. Unwed mothers C. Orphaned children D. Teenage mothers E. None of these
247	The doctor advised him to go _____ several medical tests.	A. Through B. Into C. Under D. About
248	VOLUBLE	A. Fat B. Loud C. Talkative D. Rambling E. Adore
249	The defending champion justified his top _____by clinching the title	A. Technique B. Supremacy C. Skill D. Form E. Billing
250	ANTIPATHY	A. Liking B. Pathetic C. Provocation D. Bluntness E. Venom
251	_____ was apponted the first commander in Chief of the Pakistan Army.	A. Major General Sikandar Mirza B. General Ayub Khan C. General Gracey D. None of these

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which

252	<p>would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q:What is the tone of the author in the last sentence of the passage?</p>	<p>A. Resignation B. Cautious C. Relief D. Concert</p>
253	ABRUPT	<p>A. Above B. Sudden C. Noisy D. Calm E. Agnation</p>
254	BALEFUL	<p>A. Doubtful B. Virtual C. Deadly D. Headless E. Virtuous</p>
255	BOTANY : PLANTS::	<p>A. Land : Shrubs B. Astronomy : Stars C. Anthropology : Thorn D. Philosophy : Encyclopedia</p>

277	INCRIMINATE	A. Exculpate B. Sporadic C. Appropriate D. Exhume E. Subjugate

279

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country. Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS). Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented. The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need. It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement. Q: Which of the following, according to the passage, is compared with dearness allowance?

- A. Food for work program
 B. Unemployment allowance
 C. Food subsidy
 D. Procurement price of food grains

280

A glue produced by bees to _____ their hives appears to contain antibiotic substances

- A. Build
 B. Decorate
 C. Collect
 D. Design
 E. Structure

281

ACCUMULATE

- A. Proliferate
 B. Abuse
 C. Congress
 D. Rally
 E. Board

282

Who was the Prime Minister of Pakistan at the time of Khatm-i-Nabuwat Movement against the Qadianis?

- A. Liaqat Ali Khan
 B. Khawaja Nazmi ud Din
 C. Muhammad Ali Ch
 D. Muhammad Ali Bogra

283

LUGUBRIOUS : DOLEFUL

- A. Banal : Insipid
 B. Tractable : Recalcitrant
 C. Pensive : Vacuous
 D. Profligate : Miserly
 E. Tangible : Illusory

284

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires. Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence. Many of these major cities lie for beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original. It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tributes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the legends of Latin life. These accomplishments, as mentioned in the passage, are

- A. Reveal the indifferent attitude taken by the ancient Romans towards the fine arts
 B. Discuss the lasting accomplishments achieved by ancient Romans
 C. Analyse the use of the Latin language by the framers of the Constitution
 D. Show that the construction of roads and aqueducts could not have been accomplished in ancient Greece.
 E. Compare the destruction of the library at Alexandria to the murder of Archimedes

from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape. The primary purpose of the package is to

285	EVADE ; QUESTION::	A. Shirk : malingerers B. Elicit ; response C. Parry : blow D. Knowledge : thrust
286	Misrepresentative graphs and drawings ----- the real data and encourage readers to accept ----- arguments.	A. Obscure ... legitimate B. Distort ... spurious C. Illustrate ... controversial D. Complement ... unresolved E. Replace ... esteemed

290	The unruly behavior of the children _____ their parents	A. Aggrieved B. Impeached C. Incensed D. Tempered
291	EBULLIENT	A. Feminine B. Dull C. Oily D. Salient E. Bulwark
292	Wheel: Hub	A. Sea: Island B. Body: Heart C. Ruling Part: Cabinet D. Life: Happiness E. Watch: Needle

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: According to the author, the concept of "lifetime education" is

294	MOAT : CASTLE	A. Bridge : River B. Propel : Ship C. Archer : Bow D. Cumberbund : Waist E. Shoe : Foot
-----	---------------	---

295	SCOWL : SMILE	A. Jazz : Harsh B. Acid : Vinegar C. Tendentious : Buck D. Wine : Water E. Despair : Hope
296	To succeed in a difficult task_____	A. You need a person of persistent B. One needs to be persistent C. One needs to be persistence D. Persistent is needed E. Persistent is what one needs

While humans, like chimpanzees, are more gregarious and resourceful than orangutans, the latter provide anthropologists with useful information about the behavior of prehuman primates and how apelike behavior influenced our ancestors search for the food and family beneath the forest canopy.</p> <p>According to the author, anthropologists study the behavior of orangutans in order to</p>	A. Prevent orangutans from becoming the target of poaching B. Assist customs agents in the relocation of orangutans C. Analyse the causes and consequences of contemporary human behavior D. Prevent larger orangutans from eliminating their weaker rivals E. Better understand the factors that influenced human evolution
325	Her reaction was not the only _____ one.	A. Workable B. Possible C. Likely D. Good
326	The passengers were very happy _____ the friendly and warm treatment given to them	A. From B. To C. By D. About
327	<p>Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.</p> <p>The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.</p> <p>Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.</p> <p>Which of the following statement is not true in the context of the passage?</p>	A. In the US the number of infants living in poverty is about 3 million B. Only 20 percent of all the pregnancies in the U.S are planned C. The number of single-parent families today is approximately three times that of four decades ago D. The number of children in the U.S. entering foster care has decreased after 1991 E. About 6 million infants in the U.S. are likely to develop educational and health problems.

328	Foot : Toe	A. Body: Legs B. Belly: Intestines C. Nail: Fingers D. Hand: Fingers E. Leaves: Tree
329	_____ by people's perception it seems that democracy has succeeded in Pakistan	A. Making B. Planned C. Following D. Going E. Liked
330	Dowry is no longer permitted by law even in _____ marriage	A. Natural B. Bigamous C. Love D. Conventional E. Polygamous
331	ANIMOSITY	A. Friendliness B. Anxiety C. Eagerness D. Reliability E. Slender
332	<p>Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Stress the importance of preserving orangutans as a species B. Indicate the widespread practice of animal poaching C. Refute the theory that orangutans can live in a variety of environments D. Contrast the behavior of orangutans with that of other apes E. Emphasize the consequences of orangutan territoriality
333	<p>A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.</p> <p>Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.</p> <p>Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.</p> <p>Q: How much environmental pollution has taken place in the developing and developed world?</p>	A. There has been a marginal pollution of environment in the developed world and extensive damage in the developing world. B. There has been a considerable pollution of environment all over the globe. C. There has been an extensive environmental degradation both in the developed and developing world. D. The environmental pollution that has taken place all over the globe continues to be a matter of speculation and enquiry.

334	Who was the first chief Minister of the West Pakistan.	A. Mumtaz Daultana B. Dr. Khan Sahib C. Sardar Abdul Rab Nashar D. Nawab Muzzafar Ali
335	Sad : Morose	A. Robust: Weak B. Ingress: Egress C. Grass: Food D. Glad: Happy
336	The cheerful, lively sound of folk music ----- almost everyone.	A. Expired B. Consoled C. Revived D. Accustomed E. Bared
337	<p>A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount important.</p> <p>Developing countries are becoming more aware of the ways in which present and future economic development must built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.</p> <p>Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.</p> <p>Q: Technical know-how developed in the USA</p>	A. Cannot be easily assimilated by the technocrats of the developing countries B. Can be properly utilized on the basis of developing countries being able to launch an in-depth study of their specific problems C. Can be easily borrowed by the developing countries to solve the problem of environmental degradation D. Can be very effective in solving the problem of resource management in tropical countries
338	<p>The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and wee repeated from one generation to another, each generation adding something of its own.</p> <p>As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.</p> <p>Q: The word "measure" in the context of the passage means</p>	A. Weight B. Rhythm C. Size D. Quantity
339	TAPESTRY : LOOM	A. Emulsion : Wall B. Inflation : Poor C. Painting : Easel D. Plan : Trip E. Computer : Mouse
340	FLACCID	A. Dark-haried B. Torpid C. Tactile D. Sinewy E. Soapy

341	As ----- of the Sindh supreme selection board, Allah Bachayo had free ----- to all Government rest houses throughout the country.	A. A scholar - admission B. A survivor - passage C. An organizer - submission D. An institution - advice E. A member - entrance
342	Belying his mother's worries, Amir's behavior throughout the function was _____	A. Imaginable B. Imperial C. Immodest D. Impeccable E. Impervious
343	ADAPT	A. Approve B. Applaud C. Shed D. Reject E. Fit
344	MOUNTAIN : TUNNEL	A. Window : Frame B. Door : Handle C. Charcoal : Fire D. River : Bridge E. Wall : Height
345	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.</p> <p>Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.</p> <p>In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.</p> <p>Q: According to the author, what measures should Open University adopt to meet modern sequence means?</p>	A. Develop various programs for adult learners. B. Open more colleges on traditional lines. C. cater to the needs of those who represent "core" D. Primary education should be under the control of open universities.
346	Nobody has come to see us _____ we bought these fierce dogs	A. Since B. For C. When D. Till

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country. Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS). Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally don not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented. The growing salaried class is provided job security, regular income, and percent insulation

against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need. It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement. Q: Which of the following words is the same in meaning as "power" as used in the passage?

- C. Influence
- D. Capacity

364 Usually your work very hard _____

- A. You are not being successful
- B. You will not be successful
- C. You ought to be successful
- D. You be not successful

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

365

- A. Catching
- B. Hoping
- C. Sustaining
- D. Restraining

Q: Which of the following is the same in meaning as the phrase "holding out" as used in the passage?

366 RIDDLE : SPHINX::

- A. Luxury : Limousine
- B. Love : loathe
- C. Fire : Prometheus
- D. Scylla : ore

367 RANKLE

- A. Fragrant
- B. Subordinate
- C. Linear
- D. Soothe
- E. Condone

368 The petition before the court prayed for _____ the appointment orders issued by the management

- A. Posting
- B. Quashing
- C. Granting
- D. Removing
- E. Dismissing

369 SERRATED

- A. Oily
- B. Joined
- C. Smooth
- D. Greeted
- E. Indecisive

Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the

needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors

that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.

- 370 The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

The number of children born to married mothers in the U.S. is approximately how many times the number of children born to unwed mothers?

- A. 3 times
B. 3.5 times
C. 1.5 times
D. 2 times
E. Not mentioned in the passage

- 371 FLURRY : BLIZZARD::

- A. Anger : bluster
B. Drizzle : downpour
C. Draw : doodle
D. Simmer : cook

- 372 PATHOLOGICAL

- A. Sick
B. Healthy
C. Unrealizable
D. Selective
E. Chemicals

- 373 DIAPHANOUS

- A. Transitive
B. Secular
C. Schematic
D. Opaque
E. Elephantine

- 374 The author monotonously numerates the ----- points of scientific development, while omitting the details that might ----- the reader's interest.

- A. week ... sell to
B. Trivial ... boost
C. Stylistic ... irritate
D. Essential ... limit

- 375 ABOLITIONIST : SLAVERY::

- A. Prohibitionist : Liquor
B. Capitalist : Commerce
C. Peace : War
D. Glass : Jug

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- 376 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food

- A. It has improved its effectiveness over the years.
B. It has remained effective only in the cities.
C. It is unique in the world because of its effectiveness.
D. It has reached the remotest corner of the country.

subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: Which of the following is true of public distribution system?

377	PARROT : APE::	A. Curve : Arc B. Wood : Tree C. Crane : Boar D. Alarm : Fire

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

- 391 The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

- A. Mismanagement of food stocks
B. Absence of proper public distribution system
C. Production of food is less than the demand
D. Government's apathy towards the poor

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

- A. Insulted
- B. Talked about
- C. Killed
- D. Misused

like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: In the passage, "abused" means

The Romans – for centuries is the masters of war and polities across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

406 Many of these major cities lie for beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tributes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

Which of the following is Not described in the passage as a part of ancient Roman life that left a lasting legacy?

- A. The Latin languages
- B. Military accomplishments
- C. An extensive system of roads
- D. A democratic system of governments
- E. Wide-ranging economic influence

While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people

- A. The cost involved is very high.
- B. Some people are unjustly branded

- 411 as inferior. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

as inferior.
C. Both A and B
D. Neither A nor B

Q: why, according to the author, is genetic misinformation severely damaging?

- 412 Democratic societies from the earliest times have expected their government to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government inference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.
- However, with necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful.
- Q: A spirit of moderation on the part of economically sound people would make the less privileged

A. Unhappy with the rich people
B. More interested in freedom and security
C. Unhappy with their lot

D. Clamorous for absolute equality

- 413 Muslim alchemists tried to attain wealth by ----- copper and other base metals into gold.

A. Placing
B. Coin aging
C. Melting
D. Transforming

- 414 Everyone should _____ himself against illness since medical care has now become expensive.

A. Brace
B. Ensure
C. Vaccinate
D. Insure
E. Inoculate

- 415 Until its defeat by Ireland, Pakistan team won most of its test matches by innings and had achieved an ----- series of wins.

A. Defeated
B. Unbroken
C. Difficult
D. Aggressive

- 416 We lost confidence in Salim because he never _____ the grandiose promises he had made

A. Tired of
B. Delivered on
C. Retreated from
D. Forget about

- 417 CAPTURE

A. Confined
B. Free
C. Apprehend
D. Seize
E. Dominate

- 418 TEMPERANCE

A. Miserliness
B. Callousness
C. Dissipation
D. Sloth
E. Hospitality

The Romans – for centuries is the masters of war and politics across Europe, Northern Africa and Asia Minor – have often been criticized for producing few original thinker outside the realm of positive. This criticism, while in many ways true, is not without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the known world could not have been devoid of the creativity that characterizes so many other ancient empires.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

Many of these major cities lie far beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

- A. I only
- B. II only
- C. I and II only
- D. I and III only
- E. II and III only

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tribunes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

According to the passage, which of the following accurately describes the Latin languages?

- I. It spread in part due to Rome's military power
- II. It is reflected in modern political concepts
- III. It is spoken today in some part of Europe

420	DOUR	<ul style="list-style-type: none"> A. Implausible B. Cheerful C. Boring D. Portal E. Spotted
421	LISTLESS	<ul style="list-style-type: none"> A. Turbulent B. Prolific C. Peace D. Dynamic E. Precious
422	No sooner did he go in _____ came out	<ul style="list-style-type: none"> A. Than B. And C. Then D. When
423	If you are trying to make a strong impression on your audience you cannot do so by being understated, tentative for _____	<ul style="list-style-type: none"> A. Passionate B. Authoritative C. Restrained D. Argumentative

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern

should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following is most nearly the same in meaning as the word "meeting" as used in the passage?

- A. Approaching
- B. Contacting
- C. Introducing

D. Satisfying

428

429

How many sets were given to East Bengal in fist assembly?

- A. 40
- B. 41
- C. 44
- D. 47

430

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at tis infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: Which of the following is the same in meaning as the word "squarely" as used in the passage?

- A. Rigidly
- B. Firmly
- C. Directly
- D. At right angle

431

CALIBER : RIFLE::

- A. Army : ammunition
- B. Compass : bore
- C. Quality : shoot
- D. Gauge : rails

432

CHURCH : SPIRE::

- A. Temple : Shrine
- B. Opera : Stage
- C. Courtroom : Bench
- D. Mosque : Minaret

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and wee repeated from one generation to another, each generation adding something of its own.

As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, much for utility reasons, he used this new method for expressing his own

- A. To be artistic
- B. To write was song
- C. To write literature
- D. To record and communicate

433

to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: Man invented writing because he wanted

434	We were amazed that a man who had been heretofore the most _____ of public speakers could in a single speech electrify an audience and bring them cheering.	A. Pedestrian B. Accomplished C. Masterful D. Auspicious

		A. Forest : Clearing B. Squadron : Rank C. Hunt : Pack

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Integrating the concepts of lifelong learning with educational structure would imply

- A. Closing down conventional schools and colleges
- B. Longer durations for all formal courses
- C. Simple rearrangement of present educational organizations
- D. More weight for actual performance than real understanding

445 ICE : SWELL::

- A. Escape : Manacles
- B. Cramp : Stress
- C. Antiseptic : Infect
- D. Regicide : Ruler

446 CAT : FELINE::

- A. Fate : fortune
- B. Puppet : statue
- C. Horse : Equine
- D. Tiger : Lion

447 BUTCHER : MEAT::

- A. Cobbler : Nail
- B. Juggler : Feats
- C. Shoes : Cobbler
- D. Carpenter : Wood

448 Although officials claimed that its hull was -----, the Titanic sank after hitting an iceberg.

- A. Iron made
- B. Impenetrable
- C. Prominent
- D. Oval

449 MAUDLIN : DISPASSION

- A. Dauntless : Trepidation
- B. Mawkish : Sentiment
- C. Vociferous : Predilection
- D. Avuncular : Kinship
- E. Perfunctory : Laxity

450 POSTHUMOUS

- A. Grand
- B. Born after father's death
- C. Given to enjoyment
- D. Hard working
- E. Origen

451 OCCULT

- A. Intelligible
- B. Crooked
- C. Sectary
- D. Medieval
- E. Society

452 Who was behind the formation of azad pakistan party?

- A. Sir sikandar hayat
- B. Malik feroz khan noon
- C. Mian Iftikhar uddin
- D. Iftikhar hussain mamdoot

453 The Chairmen rejected the proposal of increasing employees salary because:

- A. The company had already gained three thousand crore profit
- B. The company did not have sufficient funds to afford the rise
- C. The number of employees in the company was very small
- D. The employees had been

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following best describes the purpose of the author?

- A. To criticize the present educational system
- B. To strengthen the present educational practices
- C. To support non-conventional educational organizations
- D. To present a pragmatic point of view.

455 MANACLE : MALEFACTOR::

- A. Juvenile : Delinquent
- B. Suave : Maniac
- C. Muzzle : Dog
- D. Pinto : Tether

456 Cataclysm :

- A. Reverse
- B. Upheaval
- C. Pungent
- D. Trash

457 When was Muhammad Ali Jinnah given the title of Quaid-e-Azam,?

- A. 1928
- B. 1938
- C. 1948
- D. 1940

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: Which of the following is not true, according to the passage?

- A. Society is not affected by the research in genetic engineering.
- B. Genetic engineers are not able to say some things with certainty.
- C. If genetic information is not properly handled, it will create problems.
- D. Manipulation of genes is presently does only in tissue cell.

459 TEMPT

- A. Paramount
- B. Wish
- C. Abstemious
- D. Provoke
- E. Hoax

460 PALTRY

- A. Stallion
- B. Mastery
- C. Significant
- D. Absent
- E. Enmitv

461	BARREN	A. Fertile B. Rejecting C. Crater D. Lacking freedom E. Concave
462	The incident of Fall of Dhakka took place in.	A. 1970 B. 1972 C. 1971 D. 1973

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

- 463 As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.
- Q: Before men invented writing,
- A. Literature was passed on by word of mouth
B. Prayers were considered literature
C. Literature was just singing and dancing
D. there was no literature

464	MENDICANT : BEGGING::	A. Coup : Thunder B. Proponent : Abstained C. Player : Chess D. Charlatan : Deception
-----	-----------------------	--

Through the U.S. prides itself on being a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factors can lead to educational and health problems that are much harder and more costly to reverse.

- 465 The crisis begins in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.
- A. Only A
B. Only B
C. Only C
D. Both A & C
E. Both B & C

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

Decide which of the following factors is/are responsible for the physical, intellectual and social under-development of infants in the U.S?

- A. Illiteracy of parents
B. Lack of parental care
C. Poverty

466	SQUANDER	A. Scale B. Rebuff C. Haunt D. Hoard E. Lessen
467	SIMULATED	A. Sequential B. Authentic C. Discouraged D. Mixed E. Depressed

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: Which of the following is true regarding the reasons for progress in genetic engineering?

482	Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.	A. It has become popular to abort female fetuses. B. Human beings are extremely interested in heredity. C. Economically sound and scientifically advanced countries can provide the infrastructure for such research. D. Poor countries desperately need genetic information
483	DISPARAGE	A. Compare B. Optimism C. Acclaim D. Peerage E. Regroup

484	CORRESPONDENCE : CLERK::	A. Office : Manager B. Secretary : Stenographer C. Proceeds : Accounts D. Records : Archivist
485	Bizzare :	A. Normal B. Strange C. Logical D. Tense
486	PRICE : EXORBITANT::	A. Listening : boredom B. Motion : distance C. Fire : overshoot D. Fatigue : exhaustion
487	HORSE : STEED::	A. Offspring : Spawn B. Compass : Bore C. Dampness : Mildew D. Girl : Damsel
488	DEVOID	A. Liberty B. Innermost C. Faithless D. Replete E. Cosmos
489	RETICENT : PRATTLE::	A. Hedonist : war B. Phlegmatic : emotive C. Ascetic : austerity D. Chasten : chide
490	From where the Quaid-e-Azam started his political activities during his studies.	A. London B. Bombay C. Delhi D. Kolkatta
491	BINOCULARS : SEE::	A. Spectacle : Notice B. Skeptic : Idea C. Ear trumpet : Hear D. Camera : Aperture
492	A legislation was passed to punish brokers who _____ their clients funds	A. Defalcate B. Devastate C. Devour D. Embezzle
493	CHEF : RECIPE	A. Celestial : Deferential B. Musician : Score C. People : Band D. Novelist : Puzzle E. Ambivalent : Dexterous
494	His moral decadence was marked by his _____ from the ways of integrity and honesty.	A. Obsession B. Declivity C. Departure D. Opprobrium

A great deal of discussion continues as to the real extent of global environment degradation and its implications. What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude. These pressures are brought about, in part, by increased population and the quest for an ever expanding food supply. Because the health, nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources, the capability of government to manage them effectively over the long term becomes of paramount importance.

- 495 Developing countries are becoming more aware of the ways in which present and future economic development must be built upon a sound and sustainable natural resource base. Some are looking at our long tradition in environmental protection and are receptive to U.S. assistance which recognizes the uniqueness of the social and ecological system in these tropical countries. Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management. In February 1981, for example, AID funded a national Academy of Sciences panel to advise Nepal on its severe natural resource degradation problems. Some countries such as Senegal, India, Indonesia and Thailand, are now including conservation concerns in their economic development planning process.

Because so many governments of developing nations have recognized the importance of these issues, the need today is not merely one of raising additional consciousness, but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development.

Q: The poor people of the developing world can lead a happy and contented life if

- A. There is a North-South dialogue and aid flows freely to the developing world.
B. Industries based on agriculture are widely developed.
C. Economic development takes place within the ambit of conservation of natural resources.
D. There is an assured supply of food and medical care.

496	LINEAL	A. Unconnected B. Isolated C. Directly descended D. Wrinkled E. Circular
497	DISCREDITED : REPUTATION::	A. Choleric : heat B. Stronghold : facility C. Stilted : simplicity D. Apprehensive : shyness
498	I shall not desert him _____ all the world	A. By B. For C. With D. From
499	The Movement against the Qadianis was started from a procession in Karachi held on.	A. May 18 ,1952 B. Sep 27 ,1952 C. March 10 ,1953 D. April 15, 1953
500	WANE:	A. Decline B. Tired C. Dead D. Shine
501	SCREAM : WHISPER::	A. Staircase : Elevator B. Pedal : Bicycle C. Blaze : Spark D. Repel : Attract
502	The chairperson is a scintillating speaker whose lectures completely _____ students	A. Entertain B. Absorb C. Enthral D. Alienate
503	The task seemed impossible but somehow Jalil _____ very skilfully in the end	A. Pulled it up B. Pulled it off C. Pulled it away D. Pulled it out
504	STRIKING	A. Inconspicuous B. Vibrating C. Straight D. Symmetric E. Harmonious
505	ATHEIST	A. Hypnotic B. Bane C. Believer D. Theorist E. Alarmist
506	CONFIDANT	A. Silt B. Confession C. Enemy D. Acquaintance E. Reliable

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

507	The growing salaried class is provided job security, regular income, and percent	A. It will abolish the imbalance of urban and rural sector. B. It will remove poverty. C. It will give food to the poorest
-----	--	--

The growing educated class is provided job security, regular income, and personal insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: What, according to the passage, would be the outcome of making the PDS target group oriented?

C. It will give food to the poorest without additional cost.

D. It will motivate the target group population to work more.
