

PPSC Computer Science Topic 10 Programming Language

Sr	Questions	Answers Choice
1	Which of the following is most oriented to scientific programming.	A. FORTRAN B. COBOL C. BASIC D. RPG
2	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump B. Trace routine C. Deletail listing D. Source listing
3	Which of the following is an example of problem oriented language.	A. BASIC B. PL/1 C. FORTRAN D. All above
4	A factor in the selection of a source language is.	A. Programmer skill B. Language availability C. Program compatibility with other software D. All of above
5	Which of the following is not true of FORTRAON.	A. It was developed for scientific and mathematical application B. It is one of the oldest high level languages C. It is a problem oriented language D. All of above
6	All of the following are divisions of the COBOL program except.	A. Input output B. Identification C. Procedure D. Data
7	Which of the following is most oriented to scientific programmiing.	A. FORTRON B. COBOL C. BASIC D. RPG
8	A computer generated output that lets programmer follow the execution of their program line by line is a	A. Core dump B. Ltrace routine C. Predetail listing D. All of the above
9	Sequential file organization is most appropriate for which of following application.	A. grocery store checkout B. Bank checking account C. Pay roll D. None
10	All of the following are dis advantage of RPG except.	A. It is a very machine dependent langauge. B. It is very limited in scope C. Is not suited for complex problems rearing extensive programming logic D. All of the above are dis advantages
11	Which of the following generations of language will likely include the language of the feature.	A. First generation B. Second generation or third generation C. Fourth generation D. Fifth generation
12	All computers execute	A. BASIC programs B. COBOL programs C. Machine language program D. FORTRAN program
13	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
14	Sequential file organization is most appropriate for which of following applications.	A. Grocery store checkout B. Bank checking account C. Pay roll D. ...

		D. None
15	All of the following are disadvantage of RPG except.	<p>A. It is a very machine dependent language.</p> <p>B. It is very limited in scope</p> <p>C. Is not suited for complex problems requiring extensive programming logic.</p> <p>D. All of the above are dis advantages</p>
16	Which of the following is not characteristic of COBOL	<p>A. It is a very standardized language</p> <p>B. It is very efficient in terms of coding and execution</p> <p>C. It has limited facilities for mathematical notation</p> <p>D. It is very readable language</p>
17	One dis advantage of a direct access file is.	<p>A. The delay in computing the storage address.</p> <p>B. Duplication of address locations</p> <p>C. Unsued, but available, storage locations.</p> <p>D. All of above</p>
18	Which file organization is allowed by a direct access storage derive.	<p>A. Direct only</p> <p>B. Sequential and direct only</p> <p>C. Indexed and direct only</p> <p>D. Sequential, indexed an direct</p>
19	In a COBOL program the input output section is within thedivision	<p>A. Identification</p> <p>B. Procedure</p> <p>C. Configuration</p> <p>D. Environment</p>
20	Electronic spreadsheets are most useful in situating where relativelydata must be input but...calculations are required.	<p>A. little, simple</p> <p>B. large, simple</p> <p>C. large , complex</p> <p>D. liittle, complex</p>
