

## PPSC Computer Science Chapter 10 Programming Language Online Test

_		
Sr	Questions	Answers Choice
1	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump     B. Trace routine     C. Deletail listing     D. Source listing
2	All of the following are dis advantage of RPG except.	A. It is a very machine dependent langauge.     B. It is very limited in scope     C. Is not suited for complex problems rearing extensive programming logic D. All of the above are dis advantages
3	Which of the following is not true of FORTRAON.	A. It was developed for scientific and mathematical application B. It is one of the oldest high level languages C. It is a problem oriented language D. All of above
4	Which of the following is not one of the process that a high level language program must go through before it ready to be executed.	A. Translation B. Controlling C. lading D. Linking
5	The two basic types of record access methods are	A. Sequential and random B. Direct and immediate C. Sequential and indexed D. None
6	All of the following are disadvantage of RPG except.	A. It is a very machine dependent language. B. It is very limited in scope C. Is not suited for complex problems requiring extensive programming logic. D. All of the above are dis advantages
7	In the evaluation of a computer language al of the following characteristics should be considered except.	A. Application oriented features     B. Efficiency     C. Readability     D. Hardware maintenance costs
8	In a COBOL program the input output section is within thedivision	A. Indentification B. Procedure C. Configuration D. Environment
9	Which file organization is allowed try a direct access storage device.	A. Direct only     B. Sequential and direct only     C. Indexed and direct only     D. Sequential indexed and direct
10	Sequential file organization is most appropriate for which of following application.	A. grocery store cheackout B. Bank checking account C. Pay roll D. None
11	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
12	Which of the following is an example of problem oriented language.	A. BASIC B. PL/1 C. FORTRAN D. All above
13	Which of the following is most oriented to scientific programmling.	A. FORTRON B. COBOL C. BASIC D. RPG
		A. It is a very standardized language

14	Which of the following is not characteristic of COBOL	B. It is very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable language
15	Which of the following file organization is most efficient for a file with a hinge degree of file activity.	A. Sequential B. ISAM C. VSAM D. B-Tree
16	In Basic description comments are put in the source program with the.	A. Print statement B. REMARK statement C. INPUT Statement D. DATA Statement
17	In the evaluation of computer language all of the following characteristics should be considered except.	A. Application oriented features     B. Efficiency     C. Readability     D. Hardware maintenance costs
18	Electronic spreadsheets are most useful in situating where relativelydata must be input butcalculations are required.	A. little, simple B. large, simple C. large, complex D. little, complex
19	Which of the following generations of language will likely include the language of the feature.	A. First generation B. Second generation or third generation C. Fourth generation D. Fifth generation
20	Which of the following is not one of the process that a high level language program must go through before it is ready to be executed.	A. Transition B. controlling C. Lading D. Linking
