

PPSC Computer Science Topic 10 Programming Language

Sr	Questions	Answers Choice
1	Which of the following is not characteristic of COBOL	A. It is a very standardized language B. It is very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable language
2	Which of the following is an example of problem oriented language.	A. BASIC B. PL/1 C. FORTRAN D. All above
3	Electronic spreadsheets are most useful in situating where relativelydata must be input but...calculations are required.	A. little, simple B. large, simple C. large , complex D. little, complex
4	Which of the following is not one of the process that a high level language program must go through before it is ready to be executed.	A. Transition B. controlling C. Lading D. Linking
5	Which file organization is allowed by a direct access storage derive.	A. Direct only B. Sequential and direct only C. Indexed and direct only D. Sequential, indexed an direct
6	In Basic description comments are put in the source program with the.	A. Print statement B. REMARK statement C. INPUT Statement D. DATA Statement
7	The two basic types of record access methods are	A. Sequential and random B. Direct and immediate C. Sequential and indexed D. None
8	One disadvantage of a direct access file is.	A. The delay in commuting the storage address B. Duplication of address locations C. Unused but available storage locations D. All of above
9	Which of the following file organization is most efficient for a file with a hinge degree of file activity.	A. Sequential B. ISAM C. VSAM D. B-Tree
10	Which of the following is not characteristics of COBOL	A. It is a very standardized language. B. It is a very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable langage
11	In a COBOL program the input output section is within the division	A. Identification B. Procedure C. Configuration D. Environment
12	A computer generated output that lets programmer follow the execution of their program line by line is a	A. Core dump B. Ltrace routine C. Predetail listing D. All of the above
13	All of the following are disadvantage of RPG except.	A. It is a very machine dependent language. B. It is very limited in scope C. Is not suited for complex problems requiring extensive programming logic. D. All of the above are dis advantages

14	Which file organization is allowed try a direct access storage device.	A. Direct only B. Sequential and direct only C. Indexed and direct only D. Sequential indexed and direct
15	A factor in the selection of a source language is.	A. Programmer skill B. Language availability C. Program compatibility with other software D. All of above
16	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
17	Which of the following is not true of FORTRAN.	A. It was developed for scientific and mathematical applications B. It is one of the oldest high -level languages C. it is a problem oriented langauge. D. It requires extensive internal documentation.
18	Which of the following is not true of FORTRAON.	A. It was developed for scientific and mathematical application B. It is one of the oldest high level languages C. It is a problem oriented language D. All of above
19	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump B. Trace routine C. Deletail listing D. Source listing
20	Electronic spread sheets are most useful n a situation where relatively data must be input but calculations are required.	A. Little, simple B. Large, simple C. Large, complex D. Little, complex
