PPSC Computer Science Topic 10 Programming Language

Sr	Questions	Answers Choice
1	In a COBOL program the input output section is within the ....division	A. Indentification B. Procedure C. Configuration D. Environment
2	All of the following are dis advantage of RPG except.	A. It is a very machine dependent langauge. B. It is very limited in scope C. Is not suited for complex problems rearing extensive programming logic D. All of the above are dis advantages
3	Electronic spreadsheets are most useful in situating where relatively ....data must be input but...calculations are required.	A. little, simple B. large, simple C. large , complex D. little, complex
4	Which file organization is allowed by a direct access storage derive.	A. Direct only B. Sequential and direct only C. Indexed and direct only D. Sequential, indexed an direct
5	Which of the following is most oriented to scientific programmiing.	A. FORTRON B. COBOL C. BASIC D. RPG
6	Which of the following is not true of FORTRAON.	A. It was developed for scientific and mathematical application B. It is one of the oldest high level languages C. It is a problem oriented language D. All of above
7	In Basic description comments are put in the source program with the.	A. Print statement B. REMARK statement C. INPUT Statement D. DATA Statement
8	Sequential file organization is most appropriate for which of following applications.	A. Grocery store checkout B. Bank checking account C. Pay roll D. None
9	One disadvantage of a direct access file is.	A. The delay in commuting the storage address B. Duplication of address locations C. Unused but available storage locations D. All of above
10	Which of the following is not one of the process that a high level language program must go through before it is ready to be executed.	A. Transition B. controlling C. Lading D. Linking
11	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump B. Trace routine C. Deletail listing D. Source listing
12	A factor in the selection of a source language is.	A. Programmer skill B. Language availability C. Program compatibility with other software D. All of above
13	In a COBOL program the input output section is within the division	A. Identification B. Procedure C. Configuration D. Environment
14	Sequential file organization is most appropriate for which of following application.	A. grocery store cheackout B. Bank checking account

	Sequential file organization is most appropriate for which of following application.	C. Pay roll D. None
15	Which of the following generations of language will likely include the language of the feature.	A. First generation B. Second generation or third generation C. Fourth generation D. Fifth generation
16	A computer generated output that lets programmer follow the execution of their program line by line is a	A. Core dump B. Ltrace routine C. Predetail listing D. All of the above
17	In the evaluation of a computer language al of the following characteristics should be considered except.	A. Application oriented features B. Efficiency C. Readability D. Hardware maintenance costs
18	Which of the following is not one of the process that a high level language program must go through before it ready to be executed.	A. Translation B. Controlling C. lading D. Linking
19	All of the following are divisions of the COBOL program except.	A. Input output B. Identification C. Procedure D. Data
20	All of the following are disadvantage of RPG except.	A. It is a very machine dependent language. B. It is very limited in scope C. Is not suited for complex problems requiring extensive programming logic. D. All of the above are dis advantages
