

PPSC Computer Science Topic 2 Computer Fundamentals

Sr	Questions	Answers Choice
1	The transistor program used in assembly language is called	A. Compiler B. Assembler C. Interpreter D. Transister
2	A disadvantage of the laser printer is.	A. It is quieter than an impact printer B. It is very slow C. The output is of a lower quality D. None
3	In which year was UK's premier computing event called "The which computer started.	A. 1980 B. 1985 C. 1986 D. 1987
4	Which of the following devices can be sued to directly image printed text.	A. OCR B. OMR C. MICR D. All of above
5	Regarding a VDU .Which statement is more correct.	A. It is an output device B. It is an input device C. It is a peripheral device D. It is hardware item
6	Easily relocatable language is	A. Machine language B. Assembly language C. High Level language D. Medium level language
7	The computer that process both analog and digital called.	A. Analog computer B. Digital comptuer C. Hybrid computer D. Main frame computer
8	Which is the following is called low level language.	A. Machine language B. Assembly language C. Both of above D. None
9	Software in computer.	A. Enhance the capabilities of the hardware machine B. Increase the speed of central processing unit C. Both of above D. None
10	Which language is directly understood by the computer without traslation program.	A. Machine language B. Assembly language C. High level language D. None
11	Which operation is not performed by computer.	A. Inputting B. Processing C. Controlling D. Understanding
12	A name or number used to identify a storage location devices.	A. A byte B. A record C. An address D. All of above
13	IBM 1401 is	A. First generation computer B. Second generation computer C. Third Generation computer D. Fourth Generation Computer
14	What is meant by a dedicated computer.	A. Which is used by one person only B. Which is assigned one and only one task C. Which uses one kind of software D. Which is meant for application software
		A. ASCII

15	The most commonly used standard data code to represent alphabetical numerical and punctuation characters used in electronic data processing system is called.	B. EBCDIC C. BCD D. All above
16	The process of starting a or restoring a computer system by loading instructions from a secondary storage device into the computer memory is called	A. Duping B. Booting C. Padding D. CPS
17	The ALU of a computer responds to the commands coming from	A. Primary memory B. Control section C. External memory D. Cache memory
18	A computer program that translates one program instructions at a time into machine language is called a	A. Interpreter B. CPU C. Compiler D. Simulator
19	Fifth generation computer is also known as.	A. Knowledge information processing system B. Very large scale integration C. Both of above D. None
20	Which of the following is not true for a magnetic disk.	A. It is expensive relative to magnetic tape B. It provides only sequential access to stored data C. Users can easily update records by writing over the old data D. All of above
