

## Computer Science 7th Class Online Test

Sr	Questions	Answers Choice
1	The algorithm which goes through all possible solutions until the required solution is found is.	A. Recursive Algorithm B. Searchign algorithm C. Brute force algorithm D. Sortig algorithm
2	The devices which send data to computer are known as.	A. Inpute devices B. Output devices C. Processing devices D. Both a and b
3	How does media bias manifest.	A. In the selection of news stories B. In the way news stories are covered C. Both A and B D. None of the above
4	What is the most significant bit in a binary number.	A. The bit to the extreme left B. The bit to the extreme right C. The middle bit D. It depends on the number
5	What is an ethical issue related to the digital environment.	A. Individual responsibility B. Misuse of personal information C. Issues related to race and ethnicity D. Implementation of laws
6	Why is the management and personnel section important in a business plan?	A. It lists all competitors in the market B. It helps investors evaluate risk C. It lists all competitors in the market D. It provides a list of all employees in the company
7	What is a transaction in business bookkeeping.	A. The legal obligation to transfer money B. The exchange of goods or services of money C. The recording of financial events in a business D. The agreement between a buyer and seller
8	Which of the following is an example of below the line promotions.	A. Press releases B. Schemes and discounts C. Advertisements D. Incentive trips
9	----- enables the populace to understand and contribute to the public discourse, and eventually make a sound decision when electing their leaders.	A. Media Literacy B. Project management C. Quality assurance D. Social media marketing
10	What is the primary application of virtual reality.	A. Entertainment B. Education C. Medical and manufacturing industries. D. None of the above
11	Which does the diamond symbol represent in a flowchart.	A. Input/Output B. Arrow C. Terminal D. Decision
12	Which step involves breaking down complex problems into smaller parts.	A. Decompostion B. Pattern recognition C. Generalization and Abstraction D. Algorithm Design
13	How many bits make up a byte of data.	A. 2 B. 4 C. 8 D. 16
14	Which type of algorithm goes through all possible solutions until the required solution is	A. Brute force algorithm B. Recursive algorithm

	found?	C. Sorting algorithm D. Divide and conquer algorithm
15	What is the first step in solving a problem with an algorithm.	A. Designing the algorithm B. Fulfilling the prerequisites C. Implementing the algorithm D. Testing the algorithm
16	The term refers to the use of internet-based social media site.	A. Social networking B. Media networking C. Social websites D. Web sites
17	What does "AI" stand for?	A. Advanced Interface B. Automated Intelligence C. Artificial Intelligence D. Actual Interaction
18	What is the purpose of the step method in Scratch.	A. To turn the sprite around while it moves B. To change the background color C. To create a new sprite D. To add sound effect
19	Which type of loop stops when the condition is false	A. Finite loop B. Infinite loop C. Sequence loop D. Recursive loop
20	What is the purpose of duplicating and editing code in Scratch.	A. To create a new sprite B. To change the background color C. To allow a sprite to move in different directions D. To add sound effects
