13	Choose the one which best express the meaning of given word.(SYNONYMS). Palpable:	A. Depressed&nbsp; B. Obvious C. Nobel&nbsp; D. Urge&nbsp; E. Tremble&nbsp;

Q-3. For me, scientific knowledge is divided into mathematical sciences, natural sciences dealing with the natural world (physical and biological sciences), and sciences dealing with mankind (psychology, sociology, all the sciences of cultural achievements, every kind of historical knowledge). Apart from these sciences is philosophy, about which we will talk shortly. In the first place, all this is pure or theoretical knowledge sought only for the purpose of understanding in order to fulfil the need to understand that is intrinsic and comsubstantial to man. What distinguishes man from animal is that he knows and needs to know. If man did not know that the world existed, and that the world was of a certain kind, that he was in the world and that he himself was of a certain kind, he wouldn't be man. The technical aspects of applications of knowledge are equally necessary for man and are of the greatest importance, because they also contribute to defining him as man and permit him to pursue a life increasingly more truly human.

But even while enjoying the results of technical progress, he must defend the primacy and autonomy of pure knowledge. Knowledge sought directly for its practical applications will have immediate and foreseeable success, but not the kind of important result whose revolutionary scope is in large part unforeseen, except by the imagination of the Utopians. Let me recall well-known example. If the Greek mathematicians had not applied themselves to the investigation of conic sections, zealously and without the least suspicion that it might someday be useful it would not have been possible centuries later to navigate far from shore. The first men to study the nature of electricity could not imagine that their experiments, carried on because of mere intellectual curiosity, would eventually lead to modern electrical technology without which we can scarcely conceive of contemporary life. Pure knowledge is valuable for its own sake, because the human spirit cannot resign itself to ignorance but in addition it is the foundation for practical results that would not have been reached if this knowledge had not been sought disinterestedly.

iii. It can be inferred from the passage that to the author man's need to know is chiefly important in that it?

- A. Allows the human race to progress technically
- B. Encompasses both the physical and social sciences
- C. Demonstrates human vulnerability
- D. Defines man's essential humanity
- E. Has increased as our knowledge of the world has grown
