16	Choose the one which best express the meaning of given word.(SYNONYMS). Ameliorate:	A. To appease B. To make excuses C. To humiliate D. To improve E. Lovely
17	<p>Q-5.Rocks which have solidified directly from molten materials are called igneous rocks.Igneous rocks are commonly referred to as primary rocks because they are the original source of material found in sedimentaries and metamorphics.Igneous rocks compose the greater part of the earth's crust,but they are generally covered at the surface by a relatively thin layer of sedimentary or metamorphic rocks.Igneous rocks are distinguished by the following characteristics:(1) they contain no fossils;(2) they have no regular arrangement of layers;and (3) they are nearly always made up of crystals.</p> <p>Sedimentary rocks are composed largely of minute fragments derived from the disintegration of existing rocks and in some instances from the remains of animal As sediments are transported.Individual fragments are assorted according to size.Distinct layers of such sediments as gravels,sand,and clay build up as they are deposited by water and occasionally wind.These sediments vary in size with the material and the power of the eroding agent.Sedimentary materials are laid down in layers called strata.</p> <p>When sediments harden into sedimentary rocks,the names applied to them change to indicate the change in physical state.Thus,small stones and gravel cemented together are known as conglomerates;cemented sand becomes sandstone;and hardened clay becomes shale.In addition to these,Other sedimentary rocks such as limestone frequently result from the deposition of dissolved material.The ingredient parts are normally precipitated by organic substance such as shells of clams or hard skeletons of other marine life.</p> <p>Both igneous and sedimentary rocks may be changed by pressure,heat,solution,or cementing action.When individual grains from existing rocks tend to deform and interlock they are called metamorphic rocks.For example granite,an igneous rock,may be metamorphosed into a gneiss or a schist.Limestone,a sedimentary rock,when subjected to heat and pressure may become marble,a metamorphic rock.Shale under pressure becomes slate.</p> <p>vi.Which of the following methods is NOT used by the author?</p>	A. Inclusion of concrete examples B. Classification and discussion C. Comparison and contrast D. Observation and hypothesis E. Cause and effect
18	Choose the one which best express the meaning of given word.(SYNONYMS). Mulct:	A. Appreciate B. Hinder C. Occupy D. Swindle E. Investigate
19	Choose the one which best express the meaning of given word.(SYNONYMS). Convene:	A. Provide B. Restore C. Disperse D. Gather E. Motivate
20	Select the appropriate word that is SIMILAR in meaning to the numbered word.(IDIOMS) Deadpan face means:	A. Ugly face B. Look deceitful C. Without emotions D. Looking older than actual age
