

# CSS General Abilities Chapter 5 Online Entry Test

Sr	Questions	Answers Choice
1	A bus has exactly six stops on its route. The bus first stops at stop one and then at stops two, three, four, five, and six respectively. After the bus leaves stop six, the bus turns and returns to stop one and repeats the cycle. The stops are at six building that are, in alphabetical order L, M, N, O, P, and Q. P is the third stop.  M is the sixth stop.  The stop O is the stop immediately before Q. N is the stop immediately before L. In case a passenger gets on the bus at O, rides past one of the stops, and gets off at P, which of the following must be true?	A. O is stop one B. Q is stop three C. P is stop four D. N is stop five E. L is stop six
2	A bus has exactly six stops on its route. The bus first stops at stop one and then at stops two, three, four, five, and six respectively. After the bus leaves stop six, the bus turns and returns to stop one and repeats the cycle. The stops are at six building that are, in alphabetical order L, M, N, O, P, and Q. P is the third stop.  M is the sixth stop.  The stop O is the stop immediately before Q. N is the stop immediately before L. In case L is the second stop, which among the following must be the stop immediately before M?	A. N B. L C. P D. O E. Q
3	A bus has exactly six stops on its route. The bus first stops at stop one and then at stops two, three, four, five, and six respectively. After the bus leaves stop six, the bus turns and returns to stop one and repeats the cycle. The stops are at six building that are, in alphabetical order L, M, N, O, P, and Q. P is the third stop.  M is the sixth stop.  The stop O is the stop immediately before Q. N is the stop immediately before L. In case N is the fourth stop, which among the following must be the stop immediately before P?	A. O B. Q C. N D. L E. M
4	Nine individuals - Z, Y, X, W, V, U, T, S and R - are the only candidates, who can serve on three committees A, B and C, and each candidate should serve on exactly one of the committees.  Committee A should consist of exactly one member more than committee B. It is possible that there are no members of committee C.  Among Z, Y and X none can serve on committee A.  Among W, V and U none can serve on committee G.  Among T, S and R none can serve on committee C.  Among the following combinations which could constitute the membership of committee C?	A. Y and T B. X and U C. Y, X and W D. W, V and U E. Z, X, U and R
5	Nine individuals - Z, Y, X, W, V, U, T, S and R - are the only candidates, who can serve on three committees A, B and C, and each candidate should serve on exactly one of the committees.  Committee A should consist of exactly one member more than committee B. It is possible that there are no members of committee C.  Among Z, Y and X none can serve on committee A.  Among W, V and U none can serve on committee G.  Among T, S and R none can serve on committee C.  In case T, S and X are the only individuals serving on committee B, the total membership of committee C should be:	A. Z and Y B. Z and W C. Y and V D. Y and U E. X and V
6	Nine individuals - Z, Y, X, W, V, U, T, S and R - are the only candidates, who can serve on three committees A, B and C, and each candidate should serve on exactly one of the committees.  Committee A should consist of exactly one member more than committee B. It is possible that there are no members of committee C.  Among Z, Y and X none can serve on committee A.  Among W, V and U none can serve on committee G.	A. Z B. Y C. W D. T E. S

ATTIONS 1, S AND INTRODUC CAN SELVE ON COMMITTEE C.

In case any of the nine individuals serves on committee C, which among the following should be the candidate to serve on committee A?

Nine individuals - Z, Y, X, W, V, U, T, S and R - are the only candidates, who can serve on three committees-- A, B and C, and each candidate should serve on exactly one of the Committee A should consist of exactly one member more than committee B. A. W and S It is possible that there are no members of committee C. B. V and U Among Z, Y and X none can serve on committee A. C. V and T 7 Among W, V and U none can serve on committee G. D. U and S Among T, S and R none can serve on committee C. E. T and S In case R is the only individual serving on committee B, which among the following should serve on committee A? Nine individuals - Z, Y, X, W, V, U, T, S and R - are the only candidates, who can serve on three committees-- A, B and C, and each candidate should serve on exactly one of the committees. Committee A should consist of exactly one member more than committee B. It is possible that there are no members of committee C. B. 8 Among Z, Y and X none can serve on committee A. 8 C. 7 Among W, V and U none can serve on committee G. D. 6 E. 5 Among T, S and R none can serve on committee C. Of the nine individuals, the largest number that can serve together on committee C is Nine individuals - Z, Y, X, W, V, U, T, S and R - are the only candidates, who can serve on three committees-- A, B and C, and each candidate should serve on exactly one of the Committee A should consist of exactly one member more than committee B. A. 3 It is possible that there are no members of committee C. Among Z, Y and X none can serve on committee A. C. 5 9 Among W, V and U none can serve on committee G. Among T, S and R none can serve on committee C In case T and Z are the individuals serving on committee B, how many of the nine individuals should serve on committee C? Two or more essences out of a stock five essences-- L, M, N, O, and P are used in making all perfumes by a manufacturer. He has learned that for a blend of essences to be agreeable it should comply with all the rules listed below. . A perfume containing L, should also contain the essence N, and the quantity of A. One part L, one part M, one part N should be twice as that of L. N, four parts P . A perfume containing M, must also have O as one of its components and they B. One part L, two parts N, one part should be in equal proportion. four parts P C. One part L, one part M, one part • A single perfume should never contain N as well as O. 10 O, one part P • O and P should not be used together. D. Two parts L, two parts N, one part . A perfume containing the essence P should contain P in such a proportion that O, two parts P the total amount of P present should be greater than the total amount of the E. Two parts M, one part N, two parts O, three parts P other essence or essences used. Among the below mentioned formulas, which can be made agreeable by the eliminating some or all of one essence? Two or more essences out of a stock five essences-- L, M, N, O, and P are used in making

all perfumes by a manufacturer. He has learned that for a blend of essences to be agreeable it should comply with all the rules listed below.

- . A perfume containing L, should also contain the essence N, and the quantity of N should be twice as that of L.
- . A perfume containing M, must also have O as one of its components and they should be in equal proportion.
- A single perfume should never contain N as well as O.
- O and P should not be used together.

11

• A perfume containing the essence P should contain P in such a proportion that the total amount of P present should be greater than the total amount of the other essence or essences used.

Among the following which combination cannot be used together in an agreeable perfume containing two or more essences?

A. L and M

B. L and N

C. L and P D. M and O

E. P and N

- . A perfume containing L, should also contain the essence N, and the quantity of N should be twice as that of L.
- . A perfume containing M, must also have O as one of its components and they should be in equal proportion.
- · A single perfume should never contain N as well as O.
- O and P should not be used together.

12

13

14

• A perfume containing the essence P should contain P in such a proportion that the total amount of P present should be greater than the total amount of the other essence or essences used.

A. One part L

- B. One part M
- C. Two parts N D. One part O
- E. Two parts P

#### Among the following, the addition of which combination would make an unagreeable perfume containing two parts N and one part P agreeable?

Two or more essences out of a stock five essences-- L, M, N, O, and P are used in making all perfumes by a manufacturer. He has learned that for a blend of essences to be agreeable it should comply with all the rules listed below.

- . A perfume containing L, should also contain the essence N, and the quantity of N should be twice as that of L.
- A perfume containing M, must also have O as one of its components and they should be in equal proportion.
- · A single perfume should never contain N as well as O.
- O and P should not be used together.
- A perfume containing the essence P should contain P in such a proportion that the total amount of P present should be greater than the total amount of the other essence or essences used.

## A. One part L, one part N, five parts

- B. Two parts M, two parts N, two parts P
- C. One part M, one part N, one part
- D. Two parts M, one part N, four parts F
- E. Two parts N, one part O, three parts P

#### Adding more amount of essence N will make which of the following perfumes agreeable?

Two or more essences out of a stock five essences-- L, M, N, O, and P are used in making all perfumes by a manufacturer. He has learned that for a blend of essences to be agreeable it should comply with all the rules listed below.

- . A perfume containing L, should also contain the essence N, and the quantity of N should be twice as that of L.
- . A perfume containing M, must also have O as one of its components and they should be in equal proportion.
- A single perfume should never contain N as well as O.
- O and P should not be used together.
- A perfume containing the essence P should contain P in such a proportion that the total amount of P present should be greater than the total amount of the other essence or essences used.
- A. One part L, one part P
- B. Two parts M, two parts L
- C. Three parts N, three parts L D. Four parts O. four parts M
- E. five parts, P, five parts M

#### Among the following which is an agreeable formula for a perfume?

Successfully adjusting to one's environment leads to happiness. War at a universal level war destroys the weaker people, who are the most unable to adjust to their environment. Thus, war at the universal level puts weaklings out of their misery and allows more space for their predators to enjoy life in a better manner. As those actions have to be performed, which maximize the level of happiness of the greatest number, war at a universal level should take place.

### The author's discussion would be greatly if he agreed to which of the following?

- i. Technology could change the environment.
- ii. War at the universal level would be an integral part of the environment.
- iii. It is possible for the strong to survive without suppressing the weak.

A. i only B. ii only

C. iii only D. i and iii only

E. i, ii and iii only

Successfully adjusting to one's environment leads to happiness. War at a universal level war destroys the weaker people, who are the most unable to adjust to their environment. Thus, war at the universal level puts weaklings out of their misery and allows more space for their predators to enjoy life in a better manner. As those actions have to be performed, which maximize the level of happiness of the greatest number, war at a universal level should take place

## What response would the author of the above discussion come up with, in the case of the objection that the weaklings far exceed strong people?

- i. He would respond with the statement that the person making the objection is a weakling.
- ii. He would respond by saying that weaklings will be miserable no matter what
- iii. He would respond with the statement that the strong would be frustrated if the weaklings are destroyed.

A. i only

- B. ii only C. iii only
- D. i and ii only
- E. ii and iii only

happens.

A. Some of the elements in Serum D

15

16

In an experiment conducted at a laboratory, 160 white mice were injected with Serum D. 160 other white mice were injected with a harmless sugar solution. In two weeks time 39% of the white mice, who were injected with Serum D contracted the highly contagious and often fatal disease, jungle fever. Hence, it can be concluded that jungle fever is caused by some elements similar to the elements in Serum D.

The above argument would be highly empowered in case it were shown that:

are extracted form the root of certain poisonous jungle wildflower. B. Within a period of two weeks about 40% of the white mice, who were injected with a harmless sugar solution also contracted jungle fever. C. Almost all the white mice died within a period of two days after the first symptoms appeared.

D. Normally the rate of jungle fever among white mice is less than 0.01%. E. Invariably the blood of the victims of jungle fever victims contains a

high level of a certain toxic substance also found in serum D.

In an experiment conducted at a laboratory, 160 white mice were injected with Serum D. 160 other white mice were injected with a harmless sugar solution. In two weeks time 39% of the white mice, who were injected with Serum D contracted the highly contagious and often fatal disease, jungle fever. Hence, it can be concluded that jungle fever is caused by some elements similar to the elements in Serum D.

The above discussion would be weakened most severely in case it is shown

A. People contracting jungle fever are usually the victims of the bite of the South American Lesser Hooded Viper.

B. One among the 160 white mice had already contracted jungle fever prior to the laboratory experiment

C. The natural habitats of white mice does not contain any of the elements found in Serum D.

D. The scientists administered the injections being ignorant of the contents of the solutions used. E. The 160 white mice used in the laboratory experiment were kept isolated from each other.

Directions: Answer the questions below based on the following information: Delegations from India and Pakistan are meeting to discuss military, trade and diplomatic problems. Each delegation consists of a chair person, two military attaches, and two trade experts. The Indian delegation consists of A, B, C, D and E while the Pakistani delegation consists of F, G, H, I and J. Each chairperson is to occupy the middle seat in a row of five on two sides of a rectangular table.

(i) A insists on being seated at the opposite and of the table from B.

(ii) G, who is deaf in his right ear, must be at the right end of the table.

(iii) Neither D nor F is chairperson.

(iv) The Indian military attaches, one of whom is B, are seated together, and neither is opposite either of the Pakistan military attaches, neither of whom is G.

If J is a military attache, which of following is true?

1. The pakistani chairperson is I

2. I is a trade expert.

3. Is a military expert.

A. 1 only B. 2 only

1 and 2

D. 1 or 3 but not both E. 2 or 3, but not both

Directions: Answer the questions below based on the following information: Delegations from India and Pakistan are meeting to discuss military, trade and diplomatic problems. Each delegation consists of a chair person, two military

attaches, and two trade experts. The Indian delegation consists of A, B, C, D and E while the Pakistani delegation consists of F, G, H, I and J. Each chairperson is to occupy the middle seat in a row of five on two sides of a rectangular table.

(i) A insists on being seated at the opposite and of the table from B.

(ii) G, who is deaf in his right ear, must be at the right end of the table.

(iii) Neither D nor F is chairperson.

(iv) The Indian military attaches, one of whom is B, are seated together, and neither is opposite either of the Pakistan military attaches, neither of whom is G.

F may be a

A. Trade expert seated next to I

B. Military attache seated next to I C. Military attache seated next to J

D. Trade expert seated next to H

E. Trade expert seated opposite B
