19	Most large retail stores hold sales in the month of January. The original idea of price reduction campaigns in January became popular when it was realized that sales or products would generally slow down following the Christmas rush, were it not for some incentive. The lack of demand could be solved by the simple solution of reducing prices. There is now an increasing tendency among major department stores in large urban centers to have their January sales being before Christmas, some time before the end of the calendar year. The idea behind this trend is to endeavor to sell the maximum amount of stock at a profit, even if that may not be at the maximum profit. Which of the following conclusions cannot be drawn from the above ?	A. The incidence of early January sales results in the lower holdings of stocks with the corollary of lower stock holding costs. B. Demand is a function of price; as you lower price, demand increases. C. Major stores seem to think it makes sense to have to January sales campaigns pre-Christmas. D. It is becoming less popular to star the January sales in the New Year. E. The major department stores do not worry as much about profit maximization as they do about sales maximization.
