| 1  | The ozone layer protect the earth from rays sent by the sun                                                                                                                                               | A. Ultraviolet rays<br>B. Infrared rays<br>C. Gamma rays<br>D. Radio active rays<br>E. none of these                                                            |
| 2  | Question Image                                                                                                                                                                                            | A. 9<br>B. 18<br>C. 27<br>D. 36                                                                                                                                 |
| 3  | 15 litres of mixture contains 20% alcohol and the rest water. If 3 litres of water be mixed in it, the percentage of alcohol in the new mixture will be                                                   | A. 17%<br>B. 16 2/3 %<br>C. 18 1/2 %<br>D. 15%                                                                                                                  |
| 4  | The L.C.M. of 148 and 185 is:                                                                                                                                                                             | A. 680<br>B. 740<br>C. 3700<br>D. 2960                                                                                                                          |
| 5  | The hottest planet of our solar system is                                                                                                                                                                 | A. Mercury<br>B. Venus<br>C. Mars<br>D. Earth                                                                                                                   |
| 6  | The average monthly salary of a staff of 9 persons is Rs. 2450. One number of the staff whose monthly salary is Rs. 2650 is transferred. Find the average salary of the remaining 8 persons of the staff. | A. Rs. 2425<br>B. Rs. 2625<br>C. Rs. 3025<br>D. Rs. 2825                                                                                                        |
| 7  | Stone used in whitewash:                                                                                                                                                                                  | A. Claystone<br>B. Stonelime<br>C. Sandstone<br>D. None of these                                                                                                |
| 8  | Shahzad said to hira "your mother's husband sister sister is my aunt". how is hira related to shahzad?                                                                                                    | A. Daughter<br>B. niece<br>C. Sister<br>D. Mother                                                                                                               |
| 9  | Question Image                                                                                                                                                                                            | A. 120 <sup>o</sup><br>B. 52 <sup>o</sup><br>C. 78 <sup>o</sup><br>D. 130 <sup>o</sup>                                                                          |
| 10 | Plaster of paris is obtained from                                                                                                                                                                         | A. Brochantite<br>B. Gypsum<br>C. Chalcantite<br>D. None of these                                                                                               |
| 11 | Number Series Test<br>1/8, 1/6, 1/4, .....                                                                                                                                                                | A. 1/2<br>B. 1/10<br>C. 1/18<br>D. 1/118                                                                                                                        |
| 12 | Those at greatest risk for food-borne illness include                                                                                                                                                     | A. Infant and children<br>B. Pregnant women<br>C. Immunosuppressed individuals<br>D. All of above                                                               |
| 13 | Which of the following explains the reason why there no total eclipse of the sun?                                                                                                                         | A. Size of the earth in relation to that of moon<br>B. Orbit of moon around earth<br>C. Direction of earth around sun<br>D. Area of the sun covered by the moon |
| 14 | Who is known as the father of the atomic bomb?                                                                                                                                                            | A. Albert einstein<br>B. J robert oppenheimer<br>C. General laslie groves<br>D. Edward teller                                                                   |
|    |                                                                                                                                                                                                           | A. 8 sides                                                                                                                                                      |

|    |                                                                                                                                                 |                                                                                                               |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|
| 15 | The sum of the interior angles of a polygon is twice the sum of its exterior angles. how many sides does the polygon have?                      | B. 9 sides<br>C. 12 sides<br>D. 6 sides                                                                       |
| 16 | Association of Southeast Asian Nations (ASEAN) has                                                                                              | A. 8 member states<br>B. 10 member states<br>C. 12 member states<br>D. 15 member states                       |
| 17 | If FRIEND is coded as HUMJTK, how is CANDLE written code?                                                                                       | A. EDRIRL<br>B. DCQHQK<br>C. ESJFME<br>D. FYOBOC                                                              |
| 18 | Resolve into factors: $4x^2 + 12xy + 9y^2 - 8x - 12y$                                                                                           | A. $(3x + 2y)(4x + 2y - 3)$<br>B. $(2x + 3y)(2x + 3y - 4)$<br>C. $(2x - 3y)(2x + 3y + 4)$<br>D. None of these |
| 19 | If $p^2 - 18p + 77 = 0$ and $3q^2 - 25q + 28 = 0$ , then:                                                                                       | A. $p \geq q$<br>B. $p \leq q$<br>C. $p > q$<br>D. $p < q$                                                    |
| 20 | The densities of three liquids are D, 2D, 3D. What will be the density of the resulting mixture if equal volumes of the three liquid are mixed? | A. 1.5D<br>B. 2D<br>C. 3D<br>D. 6D                                                                            |
