

ECAT Computer Science MCQ's Test For Full Book

Sr	Questions	Answers Choice
1	A graph prepared by a computer.	A. Is its output B. Is the piece of information to user C. Is a hard copy D. All of the above
2	A typical microcomputer has 64 K memory. It has 65,536 registers,each register storing 1 byte Each register is called	A. memory location B. address C. byte D. word
3	How many types of loop stricture are available in C?	A. 4 B. 3 C. 2 D. 6
4	Which of the following is increasing as computer technology progresses?	A. speed B. efficiency C. hardware reliability D. all of these are inceasing
5	NAND gates are preferred over others because these.	A. have lower fabrication area B. can be used to make any gate C. consume least elctronic power D. provide maximum density in a chip
6	is used to product attractive documents using photos. artwork and graphics	A. Reprographics B. Desktop publishing C. Spreadsheet D. Image processing
7	The Process of automatic office tasks using computer is called	A. Office support B. Office automation C. Data management D. Reprographics
8	The process of producing multiple copies of a document is called	A. Reprographics B. Word processing C. Spreadsheet D. Image Processing
9	A dump terminal signifies that	A. It has lower IQ compared to an intelligent terminal B. It can not be used as an independent computer C. It does not have a keyboard connected to it D. It belongs to firs generation computers
10	A string of binary digits treated as a unit is called a.	A. bit B. byte C. word D. character
11	The following register keeps track of the program during execution.	A. Address register B. Program counter C. Data register D. Accumulator
12	The process of detecting, locating and correcting logic error is called	A. desk-checking B. translating C. debugging D. documenting
13	The system that translates an IP address into an human-readable name is called:	A. IP system B. Domain name system C. Domain D. Domain numbering system
14	The heart of a digital computer is	A. control unit B. memory unit C. logic unit D. visual display unit

15	Laser beam technology is used for	A. terminals B. optical disk C. keyboard D. magnetic tape
16	Who is responsible of security of online data?	A. User B. LAN Administrator C. Internet Service Provider D. Organization obtaining the data
17	ls an automatic programmable machine :	A. CAD B. CAM C. CBT D. Robot
18	Where should be the loop control variable initialized?	A. Before the loop starts B. In the first statement of the loop body C. In the last statement of the loop body D. Anywhere in the loop body Which loop
19	In a C program, two functions can have:	A. Same name B. Same parameters C. Same name and same parameters D. Same name but different parameters
20	Most of the errors in computer system could be attributed due to	A. virus B. programming errors C. hardware problems D. data entry errors
