

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	<p>(Complete the sentence with suitable words)</p> <p>The counselor decided _____ the application</p>	<p>A. To accept B. Accepting C. Accepts D. To accepts</p>
2	<p>(Complete the sentence with suitable words)</p> <p>Having been served lunch _____</p>	<p>A. He told the whole story B. He tells the whole story C. He has told the story D. He had told the whole story</p>
3	<p>(Complete the sentence with suitable words)</p> <p>Dr.Khawaja is having the students _____ a composition</p>	<p>A. Writed B. Writeing C. Write</p>
4	<p>Acceptor</p>	<p>A. get used to B. late C. leave D. adherent</p>
5	<p>Identify Error</p> <p><u>The value of dollar declines as the rate of inflation rises</u> No error</p>	<p>A. A B. B C. C D. D E. E</p>
6	<p>Library cards will expire when they are not used.</p>	<p>A. cost more money B. cease to be effective C. be mailed to the holder's address D. be continued automatically</p>
7	<p>Choose correct word or phrase that is most similar to the word given</p> <p>LINEAL</p>	<p>A. Unconnected B. Isolated C. Directly descended D. Wrinkled E. Circular</p>
8	<p>(Complete the sentence with suitable words)</p> <p>If _____ your job what would you do</p>	<p>A. You had lost B. You have lost C. You loss D. You lost</p>
9	<p>What do you do with your orange peels and corn cobs after you are done eating? Most people throw them in the trash can. But food leftovers do not have to go into the trash. They are biodegradable, which means that they can be broken down by bacteria into natural materials. People who like to garden often put their fruit and vegetable scraps in a special place known as a compost pile. A compost pile is a spot outdoors where food waste can break down into compost, which gardeners use. This process takes several months. Once the compost is created, people spread this mixture in their gardens to add nutrients to the soil. The compost in the soil helps new plants grow in the garden. How do you take care of a compost pile? It needs air, water, and heat. Bacteria and other microorganisms break down the food waste into more basic elements like water and carbon dioxide. This process requires oxygen, so people use a shovel to turn compost regularly and help air reach all parts of the pile. The pile cannot dry out, so it could be covered to keep moisture in. Finally, heat speeds up the process. This means a compost pile should be in the sun for at least part of the day. Food leftovers are not the only things that turn into compost. You can also add yard waste like grass clippings, dried leaves, and straw. In fact, you should add these things to create a healthy balance in your compost. But do not add any weeds to your compost pile unless you want to grow weeds in your garden. Sometimes seeds are left behind in the compost. This can be a welcome surprise if you find a tomato plant sprouting where you had not planted one. The tomato seed was hiding in the compost, waiting to begin a new life in the garden.</p> <p>Question: Gardeners use compost to</p>	<p>A. reduce the amount of trash on the planet B. break down food waste C. add nutrients to the soil D. take care of bacteria and other microorganisms</p>
10	<p>Beat a retreat:</p>	<p>A. To retire before the enemy B. To face the enemy C. To object D. Feel greatly</p>

11 protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self – denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government interference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.

- A. Freedom of people
- B. Tyranny of the political parties
- C. Powers of the government
- D. Chances of economic inequality

However, with the necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, whichever political party may be in office. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government in our nation, must take on more powers to meet its problems, there is no way to preserve freedom except by making democracy more powerful.

The advent of science and technology has increase the

12 Fastidious

- A. Newfangled
- B. Tedious
- C. Obese
- D. Coarse

13 Charlatan

- A. knowledgeable doctor
- B. trickster
- C. comedian
- D. senior government official

14 Anxiety

- A. apprehension
- B. tranquility
- C. carelessness
- D. fury

15 Have you ever wondered what keeps a hot air balloon flying? The same principal that keeps food frozen in the open chest freezers at the grocery store allows hot air balloons to fly. It's very basic principle: Hot air rises and cold air falls. So while the super-cooled air in the grocery store freezer settles down around the food , the hot air in a hot air in a hot air balloon pushes up, keeping the balloon floating above the ground. In order to understand more about how this principal works in hot air balloons, it helps to know more about hot air balloons themselves. A hot air balloon has three major parts: the basket, the burner, and the envelope. The basket is where passengers ride. The basket is usually made of wicker. This ensures that it will be comfortable and add little extra weight. The burner is positioned above the passenger's heads and produced a huge flame to heat the air inside the envelope. The envelope is the colorful fabric balloon that holds the hot air. When the air inside the envelop is heated, the balloon rises. The pilot can control the up-and-down movements of the hot air balloon by regulating the heat in the envelope. To ascend, the pilot heats the air in the envelope. When the pilot is ready to land, the air in the balloon is allowed to cool and the balloon becomes heavier than air. This make the balloon descend. Before the balloon is launched, the pilot knows which way the wind is blowing. This means that she has a general idea about which wau the balloon will go. But, sometimes the pilot can actually control the direction that the balloon flies while in flight. This is because the air above the ground is sectioned into layers in which the direction of the wind may be different. So even though the pilot can't steer the balloon, she can fly higher or lower into a different layer of air. Some days the difference between the directions of the wind between layers is negligible. But other days the difference is so strong that it can actually push the balloon in a completely different direction. As used in paragraph 3, which is the best synonym for 'ascend'?

- A. move
- B. fly
- C. sink
- D. climb

16 He is taking some _____ this semester

- A. Histories class
- B. History classes
- C. History class
- D. None

17 Murtaza scored _____ in his last entrytest

- A. The least points
- B. A least points
- C. The fewest points
- D. The fewer points

18 Parchment : Paper

- A. Pity : Feeling
- B. Book : Paging
- C. Trees : Lumber
- D. Quill : Pen

19 Identify Error
Of the three brothers the elder is the most religious. No error

- A. A
- B. B
- C. C
- D. D
- E. E

The hammer may be oldest tool we have record of. Stone hammers-some of the oldest human artifacts ever discovered-date back as early as 2,600,000 BCE. Not only is the hammer the oldest tool, but it is also the greatest. What make the hammer so great is its simplicity, power, and usefulness. The structure of the hammer is relatively simple-a fact largely responsible for its early invention and widespread distribution across cultures and geographic regions. The hammer is composed of two main parts: a handle and a head. The

- A. Jean-Micheal finds a prize at the bottom of a cereal box. Once he digs

geographic regions. The hammer is composed of two main parts: a handle and a head. The handle is used to swing the hammer. The head is used to hit other objects. While the hammer is a very simple tool, it is still able to generate tremendous power. This power results from two factors: the weight of the head, and the speed at which the hammer is swung. Every hammer (though some more than other) has a large distribution of weight at the head. When a hammer is swung, this weight pivots about the hand, which acts as a fulcrum. The handle carries the weight at a distance, acting as a lever arm, so a longer handle means increased speed. The weight of the head together with the speed generated by the lever arm is what gives the hammer so much power. The heavier the head and the faster it is swung, the more power a hammer produces. In addition to the hammer's great power, it also has an exceptionally wide range of useful applications. The purpose of the hammer -- to hit-- is a universal action that can accomplish many tasks. Let's start with the obvious: a hammer can be made to pound nails. But a hammer has many other uses as well. It can break apart hard objects such as brick or concrete. It can bend and shape metal or steel. It can gently tap objects to make small adjustments. It can be used to make sculpture or pottery. It can be used in the hot, harsh business of blacksmithing as well as in delicate operations like crafting jewelry. In times of desperation, it can even be used as a weapon. The hammer truly is a great tool. It is simple, powerful, and useful. A quintessential symbol of labor, the hammer has come to represent hard work and embody the spirit of human industry.

Question:

As used in the final paragraph, which of the following describes something quintessential?

it out, he sees that it is a cheap plastic toy car. After playing with it for a few minutes, he throws it in the trash

B. Veterans agree that there are many songs that accurately depict the struggles faced by U.S. soldiers during the Vietnam War

C. While the buildings that line the streets in downtown Manhattan are very impressive, what visitors tend to remember most about New York City are the signature yellow taxi cabs that appear nearly everywhere

D. During the first three months of its life, our newborn baby cried at night. It was only after we implemented a strict routine of feeding, sleeping, and activity time that we finally able to enjoy a soundless night
