

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	The leader broke _____ in the middle of the speech as he was not feeling well.	A. After B. On C. Into D. Off
2	Take your air conditioner back to the _____ sold it to you	A. Man who B. Man that C. Man whom D. Man which
3	Averse	A. loath B. agreeable C. chance D. edible
4	Choose correct word or phrase that is most opposite of the word given. Credulous	A. Gullible B. Skeptical C. Unrewarded D. Humorous E. Indebted
5	Disparage	A. Compare B. Optimism C. Acclaim D. Peerage
6	Identify Error The government <u>requires</u> that a census <u>be taken</u> every ten years <u>so accurate</u> statistics may be <u>compiled</u> . <u>No erroe</u>	A. A B. B C. C D. D E. E
7	Cravat : Neck	A. Artist : Smock B. Bib : Dinner C. Muzzle : Biting D. Spats : Ankles
8	Choose correct word or phrase that is most opposite of the word given. Becalmed	A. Genrous B. Tranquil C. In motion D. Simulated E. Inquisitive
9	Khalid's score on the test is _____ in the class	A. The highest B. More high C. High D. Highest

Fleas are perfectly designed by nature to feast on anything containing blood. Like a shark in the water or a wolf in the woods, fleas are ideally equipped to do what they do, making them very difficult to defeat. The bodies of these tiny parasites are extremely hardy and well-suited for their job.

A flea has a very hard exoskeleton, which means the body is covered by a tough, tile-like plate called a sclerite. Because of these plates, fleas are almost impossible to squish. The exoskeletons of fleas are also waterproof of fleas are also waterproof and shock resistant, and therefore fleas are highly resistant to the sprays and chemicals used to kill them.

Little spines are attached to his plate. The spine the flea scurries through an animal's fur in – search of grooming pet tries to pull a flea off through the hair coat, these spines will extend and stick to the fur like Velcro.

Fleas are some of the best jumpers in the natural world. A flea can jump seven inches, or 150 times its own length, either vertically or horizontally. An equivalent jump for a person would be 555 feet, the height of the Washington Monument. Fleas can jump 30,000 times in a row without stopping, and they are able to accelerate through the air at an incredibly high rate – a rate which is over ten times what humans can withstand in an airplane.

- A. Fleas extend their little spines if threatened
- B. Fleas have the ability to jump higher than humans
- C. Fleas are able to accelerate through the air at an incredibly high rate

Fleas have very long rear legs with huge thigh muscles and multiple joints. When they get ready to jump. They fold their long legs up and crouch like a runner on a starting block. Several of their joints contain a protein called resilin, which helps catapult fleas into the air as they jump, similar to the way a rubber band provides momentum to a slingshot. Outward facing claws on the bottom of their legs grip anything they touch when they land.

- C. Humans can jump higher if they consume foods containing resilin
- D. The resilin found in fleas is used to make rubber bands

The adult female flea mates after her first blood meal and begins producing eggs in just 1 to 2 days. One flea can lay up to 50 eggs in one day and over 2,000 in her lifetime. Flea eggs can be seen with the naked eye, but they are about the size of a grain of salt. Shortly after being laid, the eggs begin to transform into cocoons. In the cocoon state, fleas are fully developed adults, and will hatch immediately if conditions are favorable. Fleas can detect warmth, movement, and carbon dioxide in exhaled breath, and these three factors stimulate them to emerge as new adults. If the flea does not detect appropriate conditions, it can remain dormant in the cocoon state for extended periods. Under ideal conditions, the entire life cycle may only take 3 weeks, so in no time at all, pets and homes can become infested.

Because of these characteristics, fleas are intimidating opponents. The best way to control fleas, therefore, is to take steps to prevent an infestation from ever occurring.

According to the passage, which of the following statements is true?

11	A clever politician will take advantages of every speaking engagement to campaign for the next election.	A. rasg B. intrepid C. crude D. shrewd
12	Choose Relative Pair Of Word Cat: Feline	A. Fate: Fortune B. Puppet: statue C. Horse: Equine D. Tiger: Lion
13	Take you application to the _____ you think can help you	A. Person whom B. Peron C. person who D. Person which

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.

- A. Introspective
- B. Accusative
- C. Arrogant
- D. Optimistic

14	According to the author, the present state of knowledge about heredity has mad geneticists	
15	Saqib got an opportunity to have fellowship at _____ School of Medicine in Lahore	A. the B. a C. that D. none
16	Choose Relative Pair Of Word Crochet: Fingers	A. Head: ear B. Rug: gloves C. Bursitis: shoulder D. Tread: feet
17	Identify Error <u>The water</u> released <u>from</u> the dam will <u>further</u> intensify the food <u>situation</u> . <u>No error</u>	A. A B. B C. C D. D E. E

- 18 The old woman said to the porter, "You are a nice boy,"
- A. The old woman told the porter that he has been a nice boy
 - B. The old woman told the porter that he were a nice boy
 - C. The old woman told the porter that he was a nice boy
 - D. The old woman told the porter that he is a nice boy
-

- 19 The history of literature really began was the earliest of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own. As man slowly grew more civilized, he was compelled to invent some method of writing by three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with person who were some distance away and it was necessary to protect one's property by making tools, cattle and so on, in some distinctive manner. So man taught himself to write and having learned to write purely for utilitarian reasons he used this new method for preserving his war songs and his prayers. Of course, among these ancient peoples, There were only a very few individuals who learned to write, and only a few could read what was written.

- A. Weight
- B. Rhythm
- C. Size
- D. Quantity

The word 'measure' in the context of the passage means

- 20 A man is one of those blessed artists who combine profundity and _____.
- A. Fun
 - B. Education
 - C. Depth
 - D. Wisdom
-
