

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	ADDENDUM: BOOK	A. Signature letter B. Vote : Constitution C. Codicil : Will D. Heading : Folder
2	Choose correct word or phrase that is most similar to the word given  GARGOYLE	A. Stone spout B. Golden eagle  C. Garish D. Vile E. Negation
3	Brackish	A. Backward B. Having of foul smell C. Salty D. Woody
4	Choose correct word or phrase that is most opposite of the word given.  Jaundiced	A. Unprejudiced B. Servile C. Remitted D. Discounted E. Variable
5	By hook or crock:	A. By fair means B. By fair of foul means C. For ever D. Straightforward
6	She has three children her first husband.	A. of B. in C. by D. from
7	Where can one find the leather shop, sells school bags at lower price?	A. Which B. That C. Who D. Whom
8	Q.2 The public distribution system which provides food at low prices is a subject of vital concern There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day the monster of starvation and food insecurity continues to haunt the poor in our country Increasing the purchasing power of the poor through providing productive employment leading to rising income and thus good standard of living is the ultimate objective of public policy. However till then there is a need to provide assured supply of food through a restructured more efficient and decentralized public distribution system (PDS). Although the PDS is extensive it is one of the largest such systems in the world it has yet to reach the rural poor and the far off places it remains an urban phenomenon with the majority of the rural poor still out of its reach due to lack of economic and physical access the poorest in the cities and the migrants are left out for they generally do not possess ration cards The allocation of PDS supplies in big cities is larger than in rural areas in view of urgently needs to be streamlined. In addition considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other there is a strong case for making PDS target group oriented. The growing salaried class is provided job security regular income and percent insulation against these gains of development have not percolated down to the vast majority of our working population. If one only dearness allowance to the employees in public and private sector and looks at its growth in the past few years the rising food subsidy is insignificant to the point of inequity The food subsidy is a kind of D.A to the poor the self-employed and those in the unorganized sector of the economy. It is true that subsidies should not become a permanent feature except for the destitute disabled widows and the old it is also true dependence and hence i	A. It will abolish the imbalance of urban and rural sector B. It will remove poverty C. It will give food to the poorest without additional cost D. It will motivate the target group population to work more
9	Antecedent	A. anticipate B. dilemma C. secondary D. posterior

10	Giddy	A. Level-headed B. Mourn C. Portable D. Swirl
11	Identify Error <u>To protect</u> yourself <u>from</u> dangerous exposure to the <u>suns rays using</u> a sun screen <u>No error</u>	A. A B. B C. C D. D E. E
12	ENGINE : CAR	A. Lens : Microscope B. Day : Night C. Picture : Frame D. Club : Member
13	At the time of difficulty, do not turn your friend when he seeks your help.	A. into B. upon C. up D. down
14	Choose Relative Pair Of Word  Disperse: Assemble	A. Atmosphere: clouds B. Anarchy: Order C. Book: Title D. Table: legs
15	Choose correct word or phrase that is most opposite of the word given.  Profusion	A. Penetration B. Abundance C. Scarcity D. Ordinance E. Audacity

Yellowstone National Park is the U.S. States of Wyoming, Idaho and Montana. It became the first National Park in 1872. There are geysers and hot springs at Yellowstone. There are also many animals at Yellowstone. There are elk, bison, sheep, grizzly, black bears, moose, coyotes, and more.

More than 3 million people visit Yellowstone National Park year. During the winter, visitors can ski or go snowmobiling there. There are also snow coaches that give tours. Visitors can see steam (vapor water) come from the geysers. During other seasons, visitors can go boating or fishing. People can ride horses there. There are nature trails and tours. Most visitors want to see Old Faithful, a very predictable geyser at Yellowstone Visitors can check a schedule to see the exact time that Old Faithful is going to erupt. There are many other geysers and boiling springs in the area. Great Fountain Geyser erupts every 11 hours. Excelsior Geyser produces 4,000 gallons of boiling water each minute! Boiling water is 100 degrees Celsius, or 212 degrees Fahrenheit - that's very hot! People also like to see the Grand Prismatic Spring. It is the largest hot spring in the park. It has many beautiful colors. The beautiful colors are caused by bacteria in the water. These are forms of life that have only one cell. Different bacteria live in different water temperatures. Visiting Yellowstone National Park can be a week - long vacation or more. It is beautiful and there are activities for everyone.

A. People enjoy

B. People talk about

C. People know in advance D. People pay for in advance

Something predict table is something

On January 3, 1961, nine days after Christmas, Richard Legg, John Byrnes, and Richard McKinley were killed in a remote desert in eastern Idaho. Their deaths occurred when a nuclear reactor exploded at a top-secret base in the National Reactor Testing Station (NRTS). Official reports state that the explosion and subsequent reactor meltdown resulted from the improper retraction of the control rod. When questioned about the events that occurred there, officials were very reticent. The whole affair, in fact, was discussed much, and seemed to disappear with time.

In order to grasp the mysterious nature of the NRTS catastrophe, it help to know a bit about how nuclear reactors work. After all, the generation of nuclear energy may strike many as an esoteric process. However, given its relative simplicity, the way in which the NRTS reactor functions is widely comprehensible. In this particular kind of reactor, a cluster of nine-ton uranium fuel rods are positioned lengthwise around a central control rod. The reaction begins with the slow removal of the control ro, which starts a controlled nuclear reaction and begins to heat the water in the reactor. This heat generates steam, which builds pressure inside the tank. As pressure builds, the steam looks for a place to escape. The only place this steam is able to escape is through the turbine. As it passes through the turbine on its way out of the tank, it turns the giant fan blades and produces energy.

On the morning of January 3, after the machine had been shut down for the holidays, the three men arrived at the station to restart the reactor. The control rod needed to

A. Slow B. Difficult

C. Risky

16

be pulled out only four inches to be reconnected to the automated driver. However, records indicate that Byrnes yanked it out 23 inches, over five times the distance necessary. In milliseconds the reactor exploded. Legg was impaled on the ceiling; he would be discovered last. It took one week and a lead-shielded crane to remove his body. Even in full protective gear, workers were only able to work a minute at a time. The three men are buried in lead-lined coffins under concrete in New York, Michigan, and Arlington Cemetery, Virginia.

D. Involved

The investigation took nearly two years to complete. Did Byrnes have a dark motive? Or was it simply an accident? Did he know how precarious the procedure was? Other operators were questioned as to whether they knew the consequences of pulling the control rod out so far. They responded "Of course! We often talked about what we would do if we were at a radar station and the Russians came.

"We'd yank it out."

Official reports are oddly ambiguous, but what they do not explain, gossip does. Rumors had it that there was tension between the men because Byrnes suspected the other two of being involved with his young wife. There is little doubt than he, like the other operators, knew exactly what would happen when he yanked the control rod.

As used in paragraph 4, which is the best synonym for precarious?

18	Cowardly	A. Courageously B. Silently C. Secretly D. Timidity
19	One who is unable to read or write:	A. Genius B. Illiterate C. Palisade D. Pulverise
20	Choose Relative Pair Of Word  Prick: Stab	A. Point: swift B. Lend: Borrow C. Sip: Gulp D. Thread: Sew
