

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Axiom:	A. Absurdity B. Shirk C. Elude D. Maxim
2	Court	A. Reject B. Expose C. Contaminate D. Issue
3	TEACHER : IGNORANCE	A. light : darkness B. wattage : bulb C. lightening : electricity D. stream : current
4	Limpid : Mud	A. Harmonious : Discord B. Cool : Ice C. Hill : Mountain D. Smooth : Oil
5	Baleful	A. Doubtful B. Virtual C. Deadly D. Headless
6	<p>Where does chocolate come from? Believe it or not, it grows on trees. Not as a sweet chocolate candy bar wrapped in foil, but as a cocoa bean. These cocoa beans grow on a cacao tree, which is found in tropical areas such as Central and South America. The fruit of these are called pods, and they are long and hard. Inside the pods is a soft, white pulp that surrounds the thirty or so seeds. These seeds are what we call cocoa beans. They are very hard and bitter to the taste. To make chocolate, people start by carefully taking the beans out of the pods, still covered in the white pulp, and leaving them in a bucket. The bucket is often covered with banana leaves and left for anywhere from a few days to a few weeks. This process is called fermenting. Then the beans are left to dry in the sun. Fermenting and drying the beans makes them less bitter. Then the beans are shipped to a factory to be turned into chocolate. At the factory, beans are roasted in ovens to bring out their flavor. After roasting, the outer covering of the bean is removed. The inner bean is then crushed to form a paste known as chocolate liquor. From this paste, people can either make cocoa powder or the chocolate we buy in stores. To make cocoa powder, the paste is crushed and pressed repeatedly to remove the fat, leaving behind only a dry, ground powder. To make chocolate, people need to add other ingredients to the paste such as milk, sugar, and cocoa butter. They then mix and heat the concoction several times to create a substance we would recognize as chocolate. It may even have fruit, nuts, or candy added to it before it is molded into a shape. Considering all that must happen to turn a bitter cocoa bean into a chocolate bar, a dollar seems like a small price to pay for such a delicious sweet treat.</p> <p>Question:</p> <p>Based on information in the passage, it can be understood that the chocolate sold in stores is different from cocoa beans because chocolate is</p>	<p>A. sweet and cocoa beans are bitter</p> <p>B. cheap and cocoa beans are expensive</p> <p>C. a dry powder and cocoa beans are not</p> <p>D. uncooked and cocoa beans are cooked</p>
7	<p>Paul's wife knows Paul loves to read cookbooks. She decides to get him one for his birthday. Paul tells her he will try to make a new recipe for three days in a row. On Monday, Paul makes blueberry pancakes for breakfast. He gets the blueberries from the farmers' market. On Tuesday, Paul makes beef soup for dinner. He puts in cubes of beef, carrots, and onions. The recipe calls for cream, but Paul does not cream. He uses water instead. On Wednesday, Paul makes a tomato salad with cucumbers and onions. He picks the cucumbers and tomatoes from his garden. He likes this dish best. It was also the easiest for him to make.</p> <p>What does Paul get cucumbers and tomatoes?</p>	<p>A. From his wife</p> <p>B. From his store</p> <p>C. From his garden</p> <p>D. From the farmers' market</p>
8	<p>Why is it stressed that human can understand and utilize the principles of natural phenomenon in a restricted domain.</p>	<p>A. Because humans can make iron and wood</p> <p>B. Because humans cannot extract silicon from sand</p> <p>C. Because humans can make machines</p> <p>D. Because humans cannot extract silicon from sand</p>
		A. cooperate with others

9	<u>Strive</u> for excellence.	B. be patient C. make efforts D. pay well<div> </div>
