

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	<p>When we are young, we learn that tigers and sharks are dangerous animals. We might be scared of them because they are big and powerful. As we get older, however, we learn that sometimes the most dangerous animals are also the smallest animals. In fact, the animal that kills the most people every year is one that you have probably killed yourself many times: the mosquito.</p> <p>While it may seem that all mosquitoes are biters, this is not actually the case. Male mosquitoes eat plant nectar. On the other hand, female mosquitoes feed on animal blood. They need this blood to live and produce eggs. When a female mosquito bites a human being, it transmits a small amount of saliva into the blood. The saliva may or may not contain a deadly disease. The result of the bite can be as minor as an itchy bump or as serious as death.</p> <p>Because a mosquito can bite many people in the course of its life, it can carry diseases from one person to another very easily. Two of the most deadly diseases carried by mosquitoes are malaria and yellow fever. More than 700 million people become sick from these diseases every year. At least 2 million of these people will die from these diseases.</p> <p>Many scientists are working on safer and better ways to kill mosquitoes, but so far, there is no sure way to protect everyone in the world from their deadly bites. Mosquito nests can be placed over beds to protect people against being bitten. These nets help people stay safe at night, but they do not kill any mosquitoes. Mosquitoes have many natural enemies like bats, birds, dragonflies, and certain kinds of fish. Bringing more of these animals into places where mosquitoes live might help to cut down the amount of mosquitoes in that area. This is a natural solution, but it does not always work very well. Mosquitoes can also be killed with poisons or sprays. Even though these sprays kill mosquitoes, they may also harm other plants or animals.</p> <p>Although mosquitoes may not seem as scary as larger, more powerful animals, they are far more dangerous to human beings. But things are changing. It is highly likely that one day scientists will find a way to keep everyone safe from mosquitoes and the diseases they carry.</p> <p>Which of the following words best described the author's overall attitude towards the prospect of solving the mosquito problem?</p>	<p>A. Despondent, meaning hopeless or dejected B. Exasperated, meaning extremely irritated or annoyed C. Equivocal, meaning doubtful or uncertain D. Optimistic, meaning hopeful or taking a favorable view</p>
2	<p>Choose Relative Pair Of Word</p> <p>SCHOLAR : IGNORANT</p>	<p>A. Hardworking : Lazy B. Knife : Sword C. Courage : Bold D. Luxury : Wealth</p>
3	<p>The fans were _____ when their team lost its seventh game in a row.</p>	<p>A. happy B. despondent C. lucid D. didactic</p>
4	<p>Mujeeb, _____ who discovered the source of the gas in the town, was a man of many talents</p>	<p>A. The explorer B. Was the explorer C. Who was the explorer D. Is the explorer</p>

Educational planning should aim at meeting the educational needs of the entire population of all age group. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the age have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful

5 today. A UNESCO report entitled 'learning to Be' prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self – learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

- A. Traditional systems should be strengthened
- B. Formal education is more important than non-formal
- C. One should never cease to learn
- D. It is impossible to meet the needs of everyone

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

What is the main thrust of the author?

6 When Greg went to the giant aquarium near his house, he had one type of animal that he loved to watch. He liked dolphins and manatees, but he loved whales. Baluga whales from the arctic were really neat, but it was the Killer Whales especially that had his heart. For hours, from the park opening until closing, he could watch them. Their black-and-white patterned skin reminded him of a tuxedo, a penguin, or even a zebra, but on the whales it seemed even more special. It made them stand out in the water. Their playfulness and intelligence amazed him, too. He liked to watch the trainers coax them through jumps, leaps, and other tricks. They talked and squawked at the trainers. One time the trainer even got launched into the air off the whale's nose. It was an impressive feat. It always surprised him now fast and agile such a massive creature could be. He always expected them to be slow and lumbering, but they were fast like a bullet, darting through their huge tanks and exploding from the water. In the park, they were fast like a bullet, darting through their huge tanks and exploding from the water. In the park, they ate fish and other snacks, and lots of them. In the wild, he understood why they had their fierce name. They could eat seals, sea lions, small whales, and just about anything they could catch. Their teeth were sharp and predatory. They were the top of the food chain - even more dangerous than sharks. The Killer Whales were amazing animals. They inspired him to learn more about the sea. He thought that some day he might want to be a marine biologist. Then, he could learn about his favourite animals as a job. For now, he'd have to settle for watching them through the tank's glass and reading about them. However, there was always the future.

- A. their speed and power
- B. their colors
- C. their slowness
- D. their intelligence

Question:

Which of these is NOT a reason why Greg likes killer whales?

7 Choose Relative Pair Of Word

KNIFE : CUT

- A. Winter : Summer
- B. Sword : Sharp
- C. Run : Fast
- D. Drill : Hole

8 Choose Relative Pair Of Word

Error: Experience

- A. Training: skill
- B. Skill: Mistake
- C. Sharp: clever
- D. Success: victory

9 Blithe

- A. Despondent
- B. Mutinous
- C. Angelic
- D. Rigid

10 A place where a wild animal lives

- A. `Forest`
- B. `Stable`
- C. `Sanctuary`
- D. `Lair`

11 If I _____ there, I would make a speech

- A. Had been
- B. Have been
- C. Were
- D. Was

12 SUBMISSIVE : DEFIANCE

- A. agile : alertness
- B. courageous : fear
- C. doubtful : indecision

D. confident : poise

13 Rahim had a reputation for being a **prudent** businessman,

A. clever
B. wealthy
C. careful
D. dishonest

14 Sometimes, while living in a foreign country, one **craves** a special dish from home.

A. desires
B. eats
C. prepares
D. looks for

15 Adulation:

A. Praise
B. Sarcasm
C. Rebuke
D. Purity

16 Stage : Director

A. Choir : Soprano
B. Judge : Lawyer
C. Band : Clarinet
D. Meeting : Chairman

Yellowstone National Park is the U.S. States of Wyoming, Idaho and Montana. It became the first National Park in 1872. There are geysers and hot springs at Yellowstone. There are also many animals at Yellowstone. There are elk, bison, sheep, grizzly, black bears, moose, coyotes, and more.

17 More than 3 million people visit Yellowstone National Park year. During the winter, visitors can ski or go snowmobiling there. There are also snow coaches that give tours. Visitors can see **steam** (vapor water) come from the geysers. During other seasons, visitors can go boating or fishing. People can ride horses there. There are nature trails and tours. Most visitors want to see Old Faithful, a very **predictable** geyser at Yellowstone Visitors can check a schedule to see the exact time that Old Faithful is going to erupt. There are many other geysers and boiling springs in the area. Great Fountain Geyser erupts every 11 hours. Excelsior Geyser produces 4,000 gallons of **boiling** water each minute! Boiling water is 100 degrees Celsius, or 212 degrees Fahrenheit – that’s very hot! People also like to see the Grand Prismatic Spring. It is the largest hot spring in the park. It has many beautiful colors. The beautiful colors are caused by **bacteria** in the water. These are forms of life that have only one cell. Different bacteria live in different water **temperatures**. Visiting Yellowstone National Park can be a week – long vacation or more. It is beautiful and there are activities for everyone.

A. Forms of life with once cell
B. Multi-celled organisms
C. Sunshine
D. Various types of water

What are bacteria?

18 Choose Relative Pair Of Word

ANGER : INSULT

A. Business : judgment
B. Admiration : Happiness
C. Conduct : Behavior
D. Appreciation : Kindness
