

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	My wife is good French.	A. In B. On C. With D. At
2	Choose correct word or phrase that is most opposite of the word given. Foible	A. Feasible B. Gull C. Luxurious D. Forte E. Powerful
3	Aerobic	A. sky diving B. flying C. physical exercise D. self-defense
4	HE : HIS	A. I: me B. they: these C. he: him D. she: her
5	Identify Error Though he was busy <u>yet</u> he spared <u>some time</u> to <u>talk to me</u> . <u>No error</u>	A. A B. B C. C D. D E. E
6	Contumely	A. Monetary B. Immediacy C. Eminence D. Foretell
7	Complacent	A. content B. pleasant C. spiteful D. querulous
8	Cricket commentator, Iftikhar , had to yell to be heard above the <u>hubbub</u> .	A. noise and confused B. loud music C. argument D. sports activity
9	Choose correct word or phrase that is most opposite of the word given. Tactful	A. Unbound B. Boorish C. Lazy D. Renowned E. Polished

When you imagine the desert, you probably think of a very hot place covered with sand. Although this is a good description for many deserts. Earth's I with ice: Antarctica. In order for an area to be considered a desert, it must receive very little rainfall. More specifically, it must receive an average of less than ten inches of precipitation - which can be rain, sleet, hail, or snow - on the ground every year. Antarctica, the coldest place on earth, has an average temperature that usually falls below the freezing point. And because cold air holds less moisture than warm air, the air in Antarctica does not hold much moisture at all. This is evident in the low precipitation statistics recorded for Antarctica. For example, the central part of Antarctica receives an average of less than 2 inches of snow every year. The coastline of Antarctica receive a little bit more-between seven and eight inches a year. Because Antarctica gets so little precipitation every year, it is considered a desert. When precipitation falls in hot deserts, it quickly evaporates back into the atmosphere. the air over Antarctica is too cold to hold water vapor, so there is very little evaporation. Due to this low rate of evaporation, most of the snow that falls to the ground remains there permanently, eventually building up into thick ice sheets. Any snow that does not freeze into ice sheets becomes caught up in the strong winds that constantly blow over Antarctica. These snowfilled winds can make it look as if it is snowing. Even though snowfall is very rare there, blizzards are actually very common on Antarctica.

The author writes, " And because cold air holds less moisture than warm air, the air in Antarctica does not hold much moisture at all." Using this information, it can be understood that

A. air in Africa holds more moisture than the air in Antarctica

B. air surrounding a tropical island holds less moisture than the air in Antarctica

C. air in the second floor of a house is typically warmer than air on the first floor

D. air at the mountains is typically colder than the air at the beach

Choose correct word or phrase that is most opposite of the word given.

A. Volley

B. Encore

C. Triple

10

Stifle D. Promote E. Dapple Choose Relative Pair Of Word A. Mars: Earth B. Sun: Galaxy 12 Earth: Planet C. Moon: Satellite D. Star: Sun A. that I call B. to my calling 13 Most executives do not object _____ item by their first names. C. for calling D. that I do call A. Perennial B. Immortal 14 One who cannot die C. Stable D. Perpetual Q.4 Educational planning should aim at meeting the educational needs of the entire population of all age groups while the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core we should not overlook the periphery which is equally important Under modern conditions workers need to rewind or renew their enthusiasm or strike out in a new direction or improve their skills as much any university professor the retired and the aged have their needs as well Educational planning in their words should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education This basic defect has become all the more harmful today. A UNESCO report entitled Learning to be prepared by Edgar Faure and others in 1973 asserts that the education of A. Duration of the course children must prepare the future should consist of modules with different kinds of functions B. Competence of the course serving a diversity of constituent And performance not the period of study should be the 15 teachers basis for credentials the writing is already on the wall In view of the fact that the significance C. Diversity of the topics covered of a commitment of lifelong learning and lifetime education is being discussed only in recent D. Real grasp of matter or skill years even in educationally advanced countries the possibility of the idea becoming an integral part of the idea becoming an integral part of educational thinking seems to be a far cry For to move in that direction means such more than some simple rearrangement of the present organization of education but a good beginning can be made by developing open university programs for older learners of different categories and introducing extension services in the conventional colleges and schools also these institutions should learn to cooperate with the numerous community municipal recreational programs health services g.According to the author what should be the basis for awarding credentials Educational planning should aim at meeting the educational needs of the entire population of all age group. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the age have their needs as well. Educational planning, in their words, should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report entitled 'learning to Be' prepared by Edgar Faure and A. Closing down conventional schools others in 1973 asserts that the education of children must prepare the future adult for and colleges B. Longer durations for all formal various forms of self - learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. courses 16 C. Simple rearrangement of present And performance, not the period of study, should be the basis for credentials. The educational organizations writing is already on the wall. D. More weight for actual performance than real understanding

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of

learners of different categories and introducing extension services in the

educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older

conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries. Museums, municipal

recreational programs, health services etc.

Integrating the concept of lifelong learning with the educational structure would imply

17	Curtail	A. Lengthen B. Falsify C. Credible D. Fall into
18	Bliss:	A. Merge B. Suffering C. Disseminate D. Dull
19	Baffle:	A. Taciturnity B. Foil C. Abet D. Enlighten

Q.6 A great deal of discussion continues as to the real extent of global environmental degradation and its implications What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude these pressures are brought about in part by increased population and the quest for an ever expanding food supply Because the health nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources the capability of governments to manage them effectively over the long term becomes of paramount importance Developing countries are becoming more aware of the ways in which present and future economic development must build upon a sound and sustainable natural resource base some are looking at our long tradition in environmental protection and are receptive to US assistance which recognizes the uniqueness of the social and ecological systems in these tropical countries Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management in February 1981, for example AID funded a national Academy of Sciences panel to advise Nepal on their severe natural resource degradation problems Some countries such as Senegal India Indonesia and Thailand are now including conservation concerns in their economic development planning process. Because so many government of developing nations have recognized the importance of these issues the need today is not merely one of raising additional consciousness but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development a. Some of the developing countries of Asia and Africa have

A. Formulated very ambitious plans of protecting habitat in the region B. Laid a great stress on the conservation of natural resources in their educational endeavaour

C. Carefully dovetailed environmental conservation with the overall strategy of planned economic development

D. Sough the help of US experts in solving the problem of environmental degradation
