ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Choose Relative Pair Of Word BRITTLE : FRACTURE	A. Rain : Umbrella B. Flammable : Burn C. Perpetual : stop D. Ice : cold E. Opaque : dark
2	Expel	A. Supply B. Admit C. Implore D. Exhibit
3	**(Complete the sentence with suitable words)** Wheat production in Pakistan	A. Have taken slumps and rises in recent years B. Has been rather erratic recently C. Has been erratically lately D. Are going up and down all the patients
4	Mawkish	A. Attempt B. Majority C. Sentimental D. Fiat
5	**Choose correct word or phrase that is most opposite of the word given.** Expel	A. Supply B. Admit C. Implore D. Exhibit E. Insist upon
6	Many people like to eat pizza, but not everyone knows knows how to make it. Making the perfect pizza can be complicated, but there are lots of ways for you to make basic version at home. When you make pizza, you must begin with the crust. The crust can be hard to make. If you want to make the crust yourself, you will have to make dough using flour, water, and yeast. You will have to knead the dough with your hands. If you do not have enough time to do this, you can use a prepared crust that you buy from the store. After you have chosen your crust, you must then add the sauce. Making your own sauce from scratch can take a long time. You have to buy tomatoes, peel them, and then cook them with spices. If this sounds like too much work, you can also purchase jarred sauce from the store. Many jarred sauces taste almost as good as the kind you make at home. Now that you have your crust and your sauce, you need to add the cheese. Cheese comes from milk, which comes from cows. Do you have a cow in your backyard? Do you how to milk the cow? Do you know how to turn that milk into cheese? If not, you might want to buy cheese from the grocery store instead of making it yourself. When you have the crust, sauce, and cheese ready, you can add other toppings. Some people like to put meat on their pizza, while other people like to add vegetables. Some people even like to add pineapple! The best part of making a pizza at home is that you can customize it by adding your own favorite ingredients In paragraph 4, the author asks a series of question in order to	A. Support the idea that most people cannot make homemade cheese B. Reinforce the idea that most people probably live on farms C. Prove that store-bought cheese tastes better than homemade cheese D. Emphasize the superiority of homemade cheese over store bought cheese
7	**Choose correct word or phrase that is most opposite of the word given.** Acrimonious	A. Acid B. Bitter C. Clever D. Soothing E. Enervate
8	INCORRIGIBLE : REFORM	A. Immutable : Speak B. Intractable : Manage C. Impartial : Decide D. Intolerable : Criticize
		A. <span style="color: rgb(34, 34, 34); font-family: "Times New Roman"; font-size: 18px;

9	It is easy to make delicious-looking hamburger at home. But would this hamburger still look delicious after it sat on your kitchen table under very bright lights for six or seven hours? if someone took a picture or made a video of this hamburger after the seventh hour, would anyone want to eat it? More importantly, do you think you could get millions of people to pay money for this hamburger? These are the questions that fast food companies worry about when they produce commercials or print ads for their products. Video and photo shoots often last many hours. The lights that the photographers use can be extremely hot. These conditions can cause the food to look quite unappealing to potential consumers. Because of this, the menu items that you see in fast food commercials are probably not actually edible.Let's use the hamburger as an example. The first step towards building the commercial hamburger is the bun. The food stylist–a person employed by the company to make sure the products look perfect–sorts through hundreds of buns until he or she finds one with no wrinkles. Next, the stylist carefully rearranges the sesame seeds on the bun using glue and tweezers for maximum visual appeal. The bun is then sprayed with a waterproofing solution so that it will no get soggy from contact with other ingredients, the lights, or the humidity in the room.Next, the food stylist shapes a meat patty into a perfect circle. Only the outside of the meat gets cooked-the inside is left raw so that the meat remains moist. The food stylist then paints the outside of the meat patty with a mixture of oil, molasses, and brown food coloring. Grill marks are either painted on or seared into the meat using hot metal skewers.Finally, the food stylist searches through dozens of tomatoes and heads of lettuce to find the best-looking produce.One leaf of the crispest lettuce and one center slice of the reddest tomato are selected and then sprayed with glycerin to keep them looking fresh. So the next time you see a delectable hamburger in a fast food commercial, remember: you are actually looking at glue, paint, raw meat , and glycerin. Are you still hungry? Question: According to the passage, fast food companies use things like glue and glycerin on hamburgers that appear in advertisements because I. no one actually has to eat the food used in the commercial II.it is important that people who see advertisement would pay for the food being advertised III.filming a commercial or a print ad can take a very long time	background-color: rgb(255, 255, 248);">I only B. I andII only C. II and II I only D. I,I I and I I I
10	**Choose correct word or phrase that is most opposite of the word given.** Loutish	A. Dejected B. Vast C. Urbane D. Pitiful E. Silent
	Educational planning should aim at meeting the educational needs of the entire population of all age group. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the age have their needs as well. Educational planning, in their words, should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report entitled ‘learning to Be’ prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for	A. All people can be educated as per

11	various forms of self – learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall. In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries. Museums, municipal recreational programs, health services etc. According to the passage, the present education structures assume which of the following?	their needs B. Present educational planning is very much practical C. Education is a one time process D. Simple rearrangement of the present educational system is a must
12	Posthumous	A. Grand B. Born after father's death C. Given to enjoyment D. Hard working
13	He congratulated you _____ your promotion.	A. In B. Of C. On D. For
14	Arrowheads, which are ancient hunting tools, are often themselves 'hunted' for their interesting value both as artifacts and as art. Some of the oldest arrowheads in the United States date back 12,000 years. They are not very difficult to find. You need only to walk with downcast eyes in a field that has been recently tilled for the spring planting season, and you might find one. Arrowheads are tiny stones or pieces of wood, bone, or metal which have been sharpened in order to create a tipped weapon used in hunting. The material is honed to an edge, usually in a triangular fashion, and is brought to a deadly tip. On the edge opposite the tip is a flared tail. Though designs vary depending on the region, purpose, and era of the arrowhead's origin, the tails serve the same purpose. The tail of the arrowhead is meant to be strapped onto a shaft, which is a straight wooden piece such as a spear or an arrow. When combined, the arrowhead point and the shaft become a lethal projectile weapon to be thrown by arm or shot with a bow at prey. Indian arrowheads are important artifacts that give archeologists (scientists who study past human societies) clues about the lives of Native Americans. By analyzing an arrowhead's shape, they can determine the advancement of tool technologies among certain Native American groups. By determining the origin of the arrowhead material (bone, rock, wood, or metal), they can trace the patterns of travel and trade of the hunters. By examine the location of the arrowheads, archeologists can map out hunting grounds and other social patterns. Arrowheads are commonly found along riverbanks or near creek beds because animals drawn to natural water sources to sustain life were regularly found drinking along the banks. For this reason, riverbeds were a prime hunting ground for the Native Americans. Now, dry and active riverbeds are prime hunting grounds for arrowhead collectors. Indian arrowheads are tiny pieces of history that fit in the palm of your hand. They are diary entries in the life of a hunter. They are museum pieces that hide in the dirt. They are symbolic of the eternal struggle between life and death. As it is used in paragraph 2, which is the best antonym for honed	A. Flattened B. Chopped C. Dulled D. Baked
15	_____ is a very difficult profession for a lazy person as you are	A. That copper mining B. It is copper mining C. Although copper mining D. Copper mining
16	Choose Relative Pair Of Word SUGAR : SACCHARIN	A. Slimming : Fattening B. Lace : collar C. Cotton : polyester D. Syrup : molasses
17	One who is all powerful:	A. Embezzle B. Wait C. Effigy

		D. Omnipotent
18	WET	A. Parched B. Tempered C. Humid D. Soak
19	A small piece of wood	A. Scrap B. Chip C. Crumb D. Splinter
20	Pugnacity	A. Adhesion B. Inimical C. Influx D. Mildness
