

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Eternal : Duration	A. Temporary : Time B. Weak : Control C. Harmonious : Music D. Omnipotent : Power
2	Cynosure	A. Abomination B. Picturesque C. Mundane D. Fertile
3	There is no incentive for america to sign the treaty since there is every reason to_____no other nation intends to honour its provisions:	A. Regret B. Inform C. Believe D. Occupy
4	Becalmed	A. Generous B. Tranquil C. In motion D. Simulated
5	<b>Identify Error</b> <u>Everyone</u> should be and <u>must</u> remain loyal to <u>one's country come what may.No error</u>	A. A B. B C. C D. D E. E
6	Q.6 A great deal of discussion continues as to the real extent of global environmental degradation and its implications What few people challenge however is that the renewable natural resources of developing countries are today subject to stresses of unprecedented magnitude these pressures are brought about in part by increased population and the quest for an ever expanding food supply Because the health nutrition and general well-being of the poor majority are directly dependent on the integrity and productivity of their natural resources the capability of governments to manage them effectively over the long term becomes of paramount importance Developing countries are becoming more aware of the ways in which present and future economic development must build upon a sound and sustainable natural resource base some are looking at our long tradition in environmental protection and are receptive to US assistance which recognizes the uniqueness of the social and ecological systems in these tropical countries Developing countries recognize the need to improve their capability to analyze issues and their own natural resource management in February 1981,for example AID funded a national Academy of Sciences panel to advise Nepal on their severe natural resource degradation problems Some countries such as Senegal India Indonesia and Thailand are now including conservation concerns in their economic development planning process.Because so many government of developing nations have recognized the importance of these issues the need today is not merely one of raising additional consciousness but for carefully designed and sharply focused activities aimed at management regimes that are essential to the achievement of sustained development b.Technical know-how developed in the USA	A. Cannot be easily assimilated by the technocrats of the developing countries B. Can be properly utilized on the basis of developing countries being able to launch an in-depth study of their specific problems C. Can be easily borrowed by the developing countries to solve the problem of environmental degradation D. Can be very effective in solving the problem of resource management in tropical countries
7	Animate	A. gladden B. humiliate C. enliven D. animal story
8	Choose Relative Pair Of Word Witness: Crime	A. Game: fan B. Guard: security C. Showman: advertisement D. Critic: performance
9	The history of civilization shows how man always has to choose between making the right and wrong use of the discoveries science. This has never been more true than in our own age. In a brief period amazing discoveries have been made and applied to practical purpose. It would be ungrateful not to recognized how immense are the boons which science has given to mankind. It has brought within the reach of multitudes benefits and advantages which only a short time ago were the privilege of the few. It has shown how malnutrition, hunger and disease can be overcome. It has not only lengthened life but it has depended its quality. Fields of the work of science the ordinary and fuller life than was ever possible to his grandparents.	A. Shorter and fuller life B. Longer and fuller life C. Longer and dull life D. None of these

Science provides a chance:

- 10 Choose Relative Pair Of Word  
Prick: Stab  
A. Point: swift  
B. Lend: Borrow  
C. Sip: Gulp  
D. Thread: Sew
- 11 Sometimes, while living in a foreign country, one **craves** a special dish from home.  
A. desires  
B. eats  
C. prepares  
D. looks for
- 12 The corporation executives have decided and \_\_\_\_\_ many inefficient workers  
A. They have fired  
B. Fire  
C. They fired  
D. Fired
- 13 Credulous  
A. Gullible  
B. Skeptical  
C. Unrewarded  
D. Humorous
- 14 **(Complete the sentence with suitable words)**

B. The medical test report on Monday could be received from the patient by him  
C. The patient could hand in the medical test report on Monday  
D. The patient will on Monday the medical test report turn in
- 15 What do you do with your orange peels and corn cobs after you are done eating? Most people throw them in the trash can. But food leftovers do not have to go into the trash. They are biodegradable, which means that they can be broken down by bacteria into natural materials. People who like to garden often put their fruit and vegetable scraps in a special place known as a compost pile. A compost pile is a spot outdoors where food waste can break down into compost, which gardeners use. This process takes several months. Once the compost is created, people spread this mixture in their gardens to add nutrients to the soil. The compost in the soil helps new plants grow in the garden. How do you take care of a compost pile? It needs air, water, and heat. Bacteria and other microorganisms break down the food waste into more basic elements like water and carbon dioxide. This process requires oxygen, so people use a shovel to turn compost regularly and help air reach all parts of the pile. The pile cannot dry out, so it could be covered to keep moisture in. Finally, heat speeds up the process. This means a compost pile should be in the sun for at least part of the day. Food leftovers are not the only things that turn into compost. You can also add yard waste like grass clippings, dried leaves, and straw. In fact, you should add these things to create a healthy balance in your compost. But do not add any weeds to your compost pile unless you want to grow weeds in your garden. Sometimes seeds are left behind in the compost. This can be a welcome surprise if you find a tomato plant sprouting where you had not planted one. The tomato seed was hiding in the compost, waiting to begin a new life in the garden.  
Question:  
Gardeners use compost to  
A. reduce the amount of trash on the planet  
B. break down food waste  
C. add nutrients to the soil  
D. take care of bacteria and other microorganisms
- 16 **Choose correct word or phrase that is most opposite of the word given.**  
Consequence  
A. Effective  
B. Plan  
C. Cause  
D. Retaliation  
E. Shame
- 17 Theater : Histrionic  
A. Slyness : Stupid  
B. Hamlet : Populous  
C. Number : Numerology  
D. Courtroom : Forensic

Educational planning should aim at meeting the educational needs of the entire population of all age group. While the traditional structure of education as a three

layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the age have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report entitled 'learning to Be' prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing

- 18  
A. As old as traditional education  
B. Still in formative stages  
C. In vogue in advance countries  
D. Not practical

is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries. Museums, municipal recreational programs, health services etc.

According to the author, the concept of 'lifetime education' is
