

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	<p>Choose correct word or phrase that is most opposite of the word given.</p> <p>Dour</p>	<p>A. Implausible B. Cheerful C. Boring D. Portal E. Spotted</p>
2	<p>POSITIVE : NEGATIVE</p>	<p>A. Clean : Filthy B. Angry : Upset C. Friendly : Popular D. Challenging : Interesting</p>
3	<p>She read _____</p>	<p>A. Several chapters in the library last night B. Last night several chapters in the library C. Last night in the library several chapter D. In the library several chapters last night</p>
4	<p>Choose correct word or phrase that is most opposite of the word given.</p> <p>Barren</p>	<p>A. Fertile B. Rejecting C. Crater D. Lacking freedom E. Concave</p>
5	<p>Choose the correctly spelt word:</p>	<p>A. DOLOROUS B. DOLUROUS C. DOLOREUS D. DOLORIOUS</p>
6	<p>Democratic societies from the earliest times have expected their governments to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self – denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government interference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.</p> <p>However, with the necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, whichever political party may be in office. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government in our nation, must take on more powers to meet its problems, there is no way to preserve freedom except by making democracy more powerful.</p> <p>The growth of government is necessitated to</p>	<p>A. Make the rich and the poor happy B. Curb the accumulation of wealth in a few hands C. Monitor science and technology D. Deploy the police force wisely</p>
7	<p>Choose the correctly spelt word.</p>	<p>A. NAVIJATION B. NAVIGATION C. NAVITATION D. NEVIGATION</p>
8	<p>Choose correct word or phrase that is most opposite of the word given.</p> <p>Tempt</p>	<p>A. Paramount B. Wish C. Abstemious D. Provoke E. Hoax</p>
9	<p>Erase</p>	<p>A. Purify B. Imprint C. Nip D. Delete</p>
		<p>A. A. <span style="color: rgb(0, 0, 0);</p>

font-family: monospace; font-size: medium; white-space: pre-wrap;">>Scrap
B. Chip
C. Crumb
D. Splinter

10 A small piece of wood

Identify Error

11 Cover your head property lest you may not catch cold. No error

- A. A
- B. B
- C. C
- D. D
- E. E

12 If the application for a new IT job in US _____ more on the interview preparation, the results of their efforts would have been quite different

- A. Have focused
- B. Had focused
- C. Focused
- D. Were focused

13 Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.

- A. Process
- B. Focus
- C. Fact
- D. Goal

Which of the following is the same in meaning as the word 'feat' as used in the passage?

Identify Error

14 The water released from the dam will further intensify the food situation. No error

- A. A
- B. B
- C. C
- D. D
- E. E

15 Have you ever wondered what keeps a hot air balloon flying? The same principle that keeps food frozen in the open chest freezers at the grocery store allows hot air balloons to fly. It's very basic principle: Hot air rises and cold air falls. So while the super-cooled air in the grocery store freezer settles down around the food, the hot air in a hot air balloon pushes up, keeping the balloon floating above the ground. In order to understand more about how this principle works in hot air balloons, it helps to know more about hot air balloons themselves. A hot air balloon has three major parts: the basket, the burner, and the envelope. The basket is where passengers ride. The basket is usually made of wicker. This ensures that it will be comfortable and add little extra weight. The burner is positioned above the passenger's heads and produced a huge flame to heat the air inside the envelope. The envelope is the colorful fabric balloon that holds the hot air. When the air inside the envelope is heated, the balloon rises. The pilot can control the up-and-down movements of the hot air balloon by regulating the heat in the envelope. To ascend, the pilot heats the air in the envelope. When the pilot is ready to land, the air in the balloon is allowed to cool and the balloon becomes heavier than air. This makes the balloon descend. Before the balloon is launched, the pilot knows which way the wind is blowing. This means that she has a general idea about which way the balloon will go. But, sometimes the pilot can actually control the direction that the balloon flies while in flight. This is because the air above the ground is sectioned into layers in which the direction of the wind may be different. So even though the pilot can't steer the balloon, she can fly higher or lower into a different layer of air. Some days the difference between the directions of the wind between layers is negligible. But other days the difference is so strong that it can actually push the balloon in a completely different direction. According to the author, wicker is durable.

- A. I only
- B. I and II only
- C. II and III only
- D. I, II and III

16	When he returned he was accompanied by sprightly young girl.	A. beautiful B. lively C. intelligent D. sportive
17	He suggests that the meeting _____ postponed.	A. Be B. Is C. Must D. Would be
18	ENIGMA : RIDDLE	A. labyrinth : maze B. dilemma : alternatives C. Sphinx : Egyptian D. bull : matador
19	Fragile : Break	A. Flexible : Bend B. Vital : Differentiated C. Hostile : Invite D. Vivid : Grow
20	Choose Relative Pair Of Word Putter: Golf	A. Puck: hockey B. Soccer: ball C. Paddle: table D. Pins: bowling
