4	Choose Relative Pair Of Word Dieting: Overweight	A. Food: Gluttony B. Resting: Fatigue C. Spices: Gourmet D. Poverty: Sickness
5	Identify Error <u>Of all</u> the disasters that occurred during <u>the movie s production</u> the death of the two stars who performed their own stunts <u>were</u> surely <u>the worst</u> . No error	A. A B. B C. C D. D E. E
6	If it _____ more humid in the deserts the hot temperature would be unbearable.	A. has been B. is C. was D. were
7	Choose the correctly spelt word.	A. IMMENCE B. IMENCE C. IMMENSE D. IMMENSE
8	Choose correct word or phrase that is most similar to the word given BRACKISH	A. Backward B. Having of foul smell C. Salty D. Woody E. Novelty
9	The counselor decided _____ the application	A. To accept B. Accepting C. Accepts D. To accepts
10	Exacerbate	A. Prolific B. Inert C. Insane D. Soothe
11	Agitate	A. arouse B. tranquillities C. torture D. pacify
12	Identify Error <u>Since</u> he is that kind <u>of a boy</u> he cannot <u>be expected</u> to co-operate <u>with us</u> . No error	A. A B. B C. C D. D E. E

Fleas are perfectly designed by nature to feast on anything containing blood. Like a shark in the water or a wolf in the woods, fleas are ideally equipped to do what they do, making them very difficult to defeat. The bodies of these tiny parasites are extremely hardy and well-suited for their job.

A flea has a very hard exoskeleton, which means the body is covered by a tough, tile-like plate called a sclerite. Because of these plates, fleas are almost impossible

to squish. The exoskeletons of fleas are also waterproof of fleas are also waterproof and shock resistant, and therefore fleas are highly resistant to the sprays and chemicals used to kill them.

Little spines are attached to his plate. The spine the flea scurries through an animal's fur in – search of grooming pet tries to pull a flea off through the hair coat, these spines will extend and stick to the fur like Velcro.

Fleas are some of the best jumpers in the natural world. A flea can jump seven inches, or 150 times its own length, either vertically or horizontally. An equivalent jump for a person would be 555 feet, the height of the Washington Monument. Fleas can jump 30,000 times in a row without stopping, and they are able to accelerate through the air at an incredibly high rate – a rate which is over ten times what humans can withstand in an airplane.

13

Fleas have very long rear legs with huge thigh muscles and multiple joints. When they get ready to jump. They fold their long legs up and crouch like a runner on a starting block. Several of their joints contain a protein called resilin, which helps catapult fleas into the air as they jump, similar to the way a rubber band provides momentum to a slingshot. Outward facing claws on the bottom of their legs grip anything they touch when they land.

- A. Fleas will die without access to blood
- B. Fleas survive at a higher rate in outdoor habitats
- C. Fleas will die after they produce 2,000 eggs
- D. Newly hatched fleas are the size of a grain of salt

The adult female flea mates after her first blood meal and begins producing eggs in just 1 to 2 days. One flea can lay up to 50 eggs in one day and over 2,000 in her lifetime. Flea eggs can be seen with the naked eye, but they are about the size of a grain of salt. Shortly after being laid, the eggs begin to transform into cocoons. In the cocoon state, fleas are fully developed adults, and will hatch immediately if conditions are favorable. Fleas can detect warmth, movement, and carbon dioxide in exhaled breath, and these three factors stimulate them to emerge as new adults. If the flea does not detect appropriate conditions, it can remain dormant in the cocoon state for extended periods. Under ideal conditions, the entire life cycle may only take 3 weeks, so in no time at all, pets and homes can become infested.

Because of these characteristics, fleas are intimidating opponents. The best way to control fleas, therefore, is to take steps to prevent an infestation from ever occurring.

Based on information in the passage, the reader can understand that

The history of the modern world is a record of highly varied activity, of incessant change, and of astonishing achievement. The lives of men have, during the last few centuries, increasingly diversified, their powers have greatly multiplied, their powers have greatly multiplied, their horizon been enormously enlarged. New interests have arisen in rich profusion to absorb attention and to provoke exertion. New aspirations and new emotions have come to move the soul of men. Amid all the bewildering phenomena, interest, in particular, has stood out in clear and growing pre-eminence, has expressed itself in a multitude of ways and with an emphasis more and more pronounced, namely, the determination of the race to gain a larger measure of freedom than it has ever known before, freedom in the life of the intellect and spirit, freedom in the realm of government and law, freedom in the sphere of economic and social relationship. A passion that has prevailed so widely, that has transformed the world so greatly, and is still transforming it, is one that surely merits study and abundantly rewards it, its operations constitute the very pith and marrow of modern history.

14

- A. In the ancient ages
- B. In the middle ages
- C. In the age of renaissance and reformation
- D. During the last few centuries

Not that this passion was unknown to the long ages that preceded the modern periods. The ancient Hebrews, the ancient Greeks and Roman blazed the way leaving behind them a precious heritage of accomplishments and suggestions and the men who were responsible for the Renaissance of the fifteenth century and the Reformation of the sixteenth century contributed their imperishable part to this slow and difficult emancipation of the human race. But it is in modern times the pace and vigour, the scope and sweep of this liberal movement have so increased

unquestionably as to dominate the age, particularly the last three centuries that have registered great triumphs of spirit.

In what period of the history of the world have the lives of men become increasingly diversified?

Identify Error

- A. A
- B. B
- C. C
- D. D
- E. E

15

No sooner did he tore open the envelope than he fell down unconscious. No error

- A. Fragrant
- B. Subordinate
- C. Linear

16

Rankle

17 That overhead projector _____ thousand rupees

- A. Nearly costs sixty
- B. Costs sixty nearly
- C. Costs nearly sixty
- D. None of these

18 The medical science branch which deals with the problems of the old

- A. >Endocrinology
- B. >Geriatrics
- C. >Oncology
- D. >Obstetric

19 The unruly behavior of the children _____ their parents:

- A. Aggrieved
- B. Impeached
- C. Incensed
- D. Tempered

20 Choose the correctly spelt word.

- A. FAVOURITE
- B. FAVOURET
- C. FAVORETE
- D. FAVOURIET
