

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
	Identify Error	A. A
1	She is living in town for only two years yet she seems to be acquainted with everyone who comes to the store. No error	B. B C. C D. D E. E
2	One who loves mankind	A. Philanthropist B. Optometrist C. Anthropologist D. Seismologist
3	Affluent : Plutocracy	A. Customs : Polygamy B. Clever : Intricacy C. Noble : Aristocracy D. Amazons : Matriarchy
4	Meager	A. Minimize B. Lavish C. Sensitive D. Recover
5	Stage : Director	A. Choir : Soprano B. Judge : Lawyer C. Band : Clarinet D. Meeting : Chairman
6	Absorbed	A. Espoused B. Porous C. Refined D. Distracted
7	Choose correct word or phrase that is most opposite of the word given. Capricious	A. Diminutive B. Sudden C. Immoral D. Steady E. Piteous
8	Choose correct word or phrase that is most opposite of the word given. iLLicity	A. Enlighten B. illusive C. Legal D. Cover up E. Reflect
9	Choose correct word or phrase that is most opposite of the word given. Generous	A. Cruel B. Noble C. Selfish D. Lavish E. Intellectual
10	Choose correct word or phrase that is most opposite of the word given. Simulated	A. Sequential B. Authentic C. Discouraged D. Mixed E. Depressed
11	Parrot : Ape	A. Curve : Arc B. Wood : Tree C. Alarm : Fire D. Crane : Boar
12	Choose Relative Pair Of Word	A. Flexible: Bend B. Vital: differentiated C. Hostile: Invite

13 DUSK: DAWN

A. senility: childhood B. adolescence: infancy C. loquaciousness: garrulity D. necromancy: magic

Lilly loves her town. She loves the mall. She loves the parks. She also loves her school. Most of all, though, Lilly loves the seasons. In her old town, it was hot all of the

Sometimes it is cold in Lilly's new town. The cold season is in winter. Once in a while it snows. Lilly has never seen snow before. So far her, the snow is exciting as well as very beautiful. Lilly has to wear gloves to keep her hands warm. She also wear a scarf around her neck.

In spring, flowers bloom and the trees turn green with new leaves. Pollen falls on the cars and windowsills and makes Lilly sneeze. People work in their yards and mow their grass.

In summer, Lilly wears her old shorts and sandals- the same ones she used to wear 14 in her old town. It is hot outside, and dogs lie in the shade. Lilly and her friends go to a pool or play in the water sprinkler. Her father cooks hamburgers on the grill for dinner.

> Lilly's favorite season is autumn. In autumn, the leaves on the trees turn yellow, gold, red, and orange. Halloween comes in autumn, and this Lilly's favorite holiday. Every Halloween, Lilly wears a costume. Last year she wore a mouse costume. This year she will wear a fish costume.

> One evening in autumn, Lilly and her mom are on sitting together on the porch. Mom tells Lilly that autumn is also called "fall". This is a good idea, Lilly thinks, because in the fall all of the leaves fall down from the trees.

What is Lilly's favorite thing about her new town?

A. Her school

B. Going to the pool

C. The food

The seasons

(Complete the sentence with suitable words)

15

16

They got our house last week

A. Painting

B. Painted C. Paint

What do you do with your orange peels and corn cobs after you are done eating? Most people throw them in the trash can. But food leftovers do not have to go into the trash. They are biodegradable, which means that they can be broken down by bacteria into natural materials. People who like to garden often put their fruit and vegetable scraps in a special place known as a compost pile. A compost pile is a spot outdoors where food waste can break down into compost, which gardeners use. This process takes several months. Once the compost is created, people spread this mixture in their gardens to add nutrients to the soil. The compost in the soil helps new plants grow in the garden. How do you take care of a compost pile? It needs air, water, and heat. Bacteria and other microorganisms break down the food waste into more basic elements like water and carbon dioxide. This process requires oxygen, so people use a shovel to turn compost regularly and help air reach all parts of the pile. The pile cannot dry out, so it could be covered to keep moisture in. Finally, heat speeds up the process. This means a compost pile should be in the sun for at least part of the day. Food leftovers are not the only things that turn into compost. You can also add yard waste like grass clippings, dried leaves, and straw. In fact, you should add these things to create a healthy balance in your compost. But do no add any weeds to your compost pile unless you want to grow weeds in your garden. Sometimes seeds are left behind in the compost. This can be a welcome surprise if you find a tomato plant sprouting where you had not planted one. The tomato seed was hiding in the compost, waiting to begin a new life in the garden.

A. need compost right away

B. do not like to garden

C. want to put their food waste to aood use

D. eat oranges and corn

Question:

People should start a compost pile if they

17 Abscond A. conceal one self

B. remain C. abstract

D. fabricate

When Greg went to the giant aquarium near his house, he had one type of animal that he loved to watch. He liked dolphins and manatees, but he loved whales. Baluga whales from the arctic were really neat, but it was the Killer Whales especially that had his heart. For hours, from the park opening untill closing, he could watch them. Their black-and-white patterned skin reminded him of a tuxedo, a penguin,or even a zebra, but on the whales it seemed even more special. It made them stand out in the water. Their playfulness and intelligence amazed him, too. He liked to watch the trainers coax them through jumps,leaps, and other tricks. They talked and squawked at the trainers. One time the trainer even got launched into the air off the whale's nose. It was an impressive feat. It always surprised him now fast and agile such a massive creature could be. He always expected them to be slow and lumbering, but they were fast like a bullet, darting through their huge tanks and exploding from the water in the park, they were fast like a bullet, darting through their huge

A. fierce predators

B. cute

tanks and exploding from the water. In the park, they ate fish and other snacks, and lots of them. In the wild, he understood why they had their fierce name. They could eat seals, sea lions, small whales, and just about anything they could catch. Their teeth were sharp and predatory. They were the top of the food chain - even more dangerous than sharks. The Killer Whales were amazing animals. They inspired him to learn more about the sea. He thought that some day he might want to be a marine biologist. Then, he could learn about his favourite animals as a job. For now, he'd have to settle for watching them through the tank's glass and reading about them. However, there was always the future.

Even through look cool and nice, Greg knows killer whales are what?

C. friendly
D. very humorous

When you imagine the desert, you probably think of a very hot place covered with sand. Although this is a good description for many deserts. Earth's I with ice: Antarctica. In order for an area to be considered a desert, it must receive very little rainfall. More specifically, it must receive an average of less than ten inches of precipitation - which can be rain, sleet, hail, or snow - on the ground every year. Antarctica, the coldest place on earth, has an average temperature that usually falls below the freezing point. And because cold air holds less moisture than warm air, the air in Antarctica does not hold much moisture at all. This is evident in the low precipitation statistics recorded for Antarctica. For example, the central part of Antarctica receives an average of less than 2 inches of snow every year. The coastline of Antarctica receive a little bit more-between seven and eight inches a year. Because Antarctica gets so little precipitation every year, it is considered a desert. When precipitation falls in hot deserts, it quickly evaporates back into the atmosphere. the air over Antarctica is too cold to hold water vapor, so there is very little evaporation. Due to this low rate of evaporation, most of the snow that falls to the ground remains there permanently, eventually building up into thick ice sheets. Any snow that does not freeze into ice sheets becomes caught up in the strong winds that constantly blow over Antarctica. These snowfilled winds can make it look as if it is snowing. Even though snowfall is very rare there, blizzards are actually very common on Antarctica.

Question:

The best title for this passage would be

A. Earth's Many Deserts

B. Antarctica : The Coldest place on Farth

C. A Desert of Ice

D. Unusual Blizzards

A. People who saw him

B. Guns and knives

C. Person who helped him

D. Stolen goods
