

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Viable	A. Feasible B. Motionless C. Corrective D. Unworkable
2	Choose the correctly spelt word.	A. ACCOMODATE B. ACCOMODATE C. ACCOMMODATE D. ACCOMMODAT
3	I slept after lunch _____ an armed chair.	A. on B. into C. in D. over
4	Choose the correctly spelt word.	A. VIOLENCE B. VOILENCE C. VOLENCY D. VIOLENCE
5	You must attend ____ the lecture	A. on B. with C. in D. to
6	They had an accident in _____ car they painted last month	A. An new car B. The new car C. A new car D. New car

When we are young, we learn that tigers and sharks are dangerous animals. We might be scared of them because they are big and powerful. As we get older, however, we learn that sometimes the most dangerous animals are also the smallest animals. In fact, the animal that kills the most people every year is one that you have probably killed yourself many times: the mosquito.

While it may seem that all mosquitoes are biters, this is not actually the case. Male mosquitoes eat plant nectar. One the other hand, female mosquitoes feed on animal blood. They need this blood to live and produce eggs. When a female mosquito bites a human being, it transmits a small amount of saliva into the blood. The saliva may or may not contain a deadly disease. The result of the bite can be as minor as an itchy bump or as serious as death.

Because a mosquito can bite many people in the course of its life, it can carry diseases from one person to another very easily. Two of the most deadly diseases carried by mosquitoes are malaria and yellow fever. More than 700 million people become sick from these diseases every year. At least 2 million of these people will die from these diseases.

- 7 Many scientists are working on safer and better ways to kill mosquitoes, but so far, there is no sure way to protect everyone in the world from their deadly bites. Mosquito nests can be placed over beds to protect people against being bitten. These nets help people stay safe at night, but they do not kill any mosquitoes. Mosquitoes have many natural enemies like bats, birds, dragonflies, and certain kinds of fish. Bringing more of these animals into places where mosquitoes live might help to cut down the amount of mosquitoes in that area. This is a natural solution, but it does not always work very well. Mosquitoes can also be killed with poisons or sprays. Even though these sprays kill mosquitoes, they may also harm other plants or animals.

A. I only  
B. I and II only  
C. II and III only  
D. I, II, and III

Although mosquitoes may not seem as scary as larger, more powerful animals, they are far more dangerous to human beings. But things are changing. It is highly likely that one day scientists will find a way to keep everyone safe from mosquitoes and the diseases they carry.

Based on the information in paragraph 2, we can understand that

I male mosquitoes and female mosquitoes have different eating habits

II male mosquitoes are harmless to humans

III female mosquitoes are responsible for transmitting disease to humans

8	<b>Choose correct word or phrase that is most similar to the word given</b>  SPORADIC	A. Epidemic B. Whirling C. Occasional D. Stagnant E. Virus
9	Amenable	A. receptive B. intractable C. uncaring D. delightful
10	Choose the correctly spelt word.	A. HEBITS B. HABITS C. HABBITS D. HABITTS
11	Abhor	A. absolve B. difference C. hate D. unpleasant
12	<p>Democratic societies from the earliest times have expected their governments to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self – denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government interference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance.</p> <p>However, with the necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, whichever political party may be in office. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government in our nation, must take on more powers to meet its problems, there is no way to preserve freedom except by making democracy more powerful.</p> <p>The advent of science and technology has increase the</p>	A. Freedom of people B. Tyranny of the political parties C. Powers of the government D. Chances of economic inequality
13	<p>When we are young, we learn that tigers and sharks are dangerous animals. We might be scared of them because they are big and powerful.
