

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	<p>Herschel was a Great Dane, which was a big dog. He was actually a puppy, but he was big enough that he looked like a full-size dog. He was bigger than Todd, his owner. The problem with Herschel was that he wasn't housebroken yet. He was six months old, but his original owner had kept him on a porch, where he could go to the bathroom whenever he wanted. That owner hadn't had a lot of time to take care of a dog, but he'd wanted one anyway. When he'd moved to another state for work, he'd given up his untrained puppy. It was sad story, but it looked like it might have a good end. Todd loved dogs, and he liked to spend time with them. He liked to train them, so he'd adopted Herschel. If it was going to work out, it would take lots of patience, love, and training. So, Todd woke up early every day. He walked Herschel immediately. They went for a long walk so Herschel could empty his bladder and use the bathroom. White Todd was at school, his mother let the dog out in the back yard every hour. When he returned home, Todd walked Herschel again. He'd put in another walk before they went to bed, too. With enough opportunities to go to the bathroom outside. Herschel didn't need to go inside. Still, he had accidents. He wasn't used to going only outside. It took a lot of patience to clean up his messes. but Todd did it anyway. Dedication was needed with an animal. They walked and walked every day, and Herschel started walking better on a leash. He respected his owner. They got along well together, and there were less and less messes inside. After several weeks, Herschel made it through a day without any trouble. Todd gave Herschel a hug and a special treat. Then, they went for another walk. It was great exercise for both of them, and it gave them time together. Todd hoped they would have many years together. His new friend meant a lot to him.</p> <p>Question: How would you best describe 'Todd'?</p>	<p>A. diligent and responsible B. whiny and unpredictable C. caring and happy D. cruel and scary</p>
2	<p>When Greg went to the giant aquarium near his house, he had one type of animal that he loved to watch. He liked dolphins and manatees, but he loved whales. Baluga whales from the arctic were really neat, but it was the Killer Whales especially that had his heart. For hours, from the park opening until closing, he could watch them. Their black-and-white patterned skin reminded him of a tuxedo, a penguin, or even a zebra, but on the whales it seemed even more special. It made them stand out in the water. Their playfulness and intelligence amazed him, too. He liked to watch the trainers coax them through jumps, leaps, and other tricks. They talked and squawked at the trainers. One time the trainer even got launched into the air off the whale's nose. It was an impressive feat. It always surprised him now fast and agile such a massive creature could be. He always expected them to be slow and lumbering, but they were fast like a bullet, darting through their huge tanks and exploding from the water. In the park, they were fast like a bullet, darting through their huge tanks and exploding from the water. In the park, they ate fish and other snacks, and lots of them. In the wild, he understood why they had their fierce name. They could eat seals, sea lions, small whales, and just about anything they could catch. Their teeth were sharp and predatory. They were the top of the food chain - even more dangerous than sharks. The Killer Whales were amazing animals. They inspired him to learn more about the sea. He thought that some day he might want to be a marine biologist. Then, he could learn about his favourite animals as a job. For now, he'd have to settle for watching them through the tank's glass and reading about them. However, there was always the future.</p> <p>Question: What is Greg's favorite animal at the aquarium park?</p>	<p>A. seals B. manatees C. dolphins D. killer whales</p>
3	<p>It is easy to make delicious-looking hamburger at home. But would this hamburger still look delicious after it sat on your kitchen table under very bright lights for six or seven hours? If someone took a picture or made a video of this hamburger after the seventh hour, would anyone want to eat it? More importantly, do you think you could get millions of people to pay money for this hamburger? These are the questions that fast food companies worry about when they produce commercials or print ads for their products. Video and photo shoots often last many hours. The lights that the photographers use can be extremely hot. These conditions can cause the food to look quite unappealing to potential consumers. Because of this, the menu items that you see in fast food commercials are probably not actually edible. Let's use the hamburger as an example. The first step towards building the commercial hamburger is the bun. The food stylist—a person employed by the company to make sure the products look perfect—sorts through hundreds of buns until he or she finds one with no wrinkles. Next, the stylist carefully rearranges the sesame seeds on the bun using glue and tweezers for maximum visual appeal. The bun is then sprayed with a waterproofing solution so that it will not get soggy from contact with other ingredients, the lights, or the humidity in the room. Next, the food stylist shapes a meat patty into a perfect circle. Only the outside of the meat gets cooked—the inside is left raw so that the meat remains moist. The food stylist then paints the outside of the meat patty with a mixture of oil, molasses, and brown food coloring. Grill marks are either painted on or seared into the meat using hot metal skewers. Finally, the food stylist searches through dozens of tomatoes and heads of lettuce to find the best-looking produce. One leaf of the crispest lettuce and one center slice of the reddest tomato are selected and then sprayed with glycerin to keep them looking fresh. So the next time you see a delectable hamburger in a fast food commercial, remember: you are</p>	<p>A. make sure the meat patty stays attached to the bun B. keep the sesame seeds on the bun in perfect order C. arrange the lettuce on the tomato D. hold the entire hamburger together</p>

actually looking at glue, paint, raw meat , and glycerin. Are you still hungry?

Question:

A food stylist working on a hamburger commercial might use glue to

4	TRAIN : RAILROAD	A. boat : mountain B. helicopter : cloud C. truck : highway D. wagon : wheel
5	(Complete the sentence with suitable words) The doctor suggested that his patients_____	A. Take medicine in time B. To take medicine in time C. Took medicine in time D. taking medicine in time
6	Contentious	A. Conciliatory B. Combative C. Dissatisfied D. Discontented
7	(Complete the sentence with suitable words) Khalid score on the test is _____ in the class	A. The highest B. More high C. High D. Highest
8	At daggers drawn:	A. Real cause B. To be puzzled C. At enmity D. At friendship
9	Siddiq's _____ in his family's position is great but does not boast about it.	A. Status B. Proud C. Pride D. Presumption
10	(Complete the sentence with suitable words) The final edition of the love and Cheating consists of six volumes however only a small of its full volume has ever been published	A. Edition B. Volume C. Fraction D. Chapter
11	Choose Relative Pair Of Word Flurry: Blizzard	A. Anger: bluster B. Drizzle: downpour C. Draw: doodle D. Simmer: cook
12	Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world. In the passage, 'abused' mean	A. Insulted B. Talked about C. Killed D. Misused
13	Choose correct word or phrase that is most similar to the word given BEWILDERED	A. Confused B. Bedeviled C. Discarded D. Neglected E. Sabotage
14	Choose correct word or phrase that is most opposite of the word given. Laud	A. Substantial B. Castigate C. Inferior D. Enormity E. Move apart
15	Mr. Waheed _____ his son for breaking the window pane.	A. coerced B. relegated C. promoted D. chastised
		A. Choir : Soprano B. ...

16	Stage : Director	B. Judge : Lawyer C. Band : Clarinet D. Meeting : Chairman
17	Clandestine	A. above ground B. public C. outside D. burnt out
18	No one has control _____ his tongue.	A. for B. to C. on D. with
19	TEACHER : IGNORANCE	A. light : darkness B. wattage : bulb C. lightening : electricity D. stream : current
20	In the arm of Morpheus:	A. Sound asleep B. Waking C. Reprimand D. Be submissive
