

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Anarchy: Order	A. Adore : Loathe B. Sonnet : Medley C. Tent : Shelter D. Finger : Nail
2	Consistency	A. Stability B. Harmony C. Dissatisfied D. Discontented
3	After the complete failure of the mission the leader of the guerilla band realized that it was important that money for the cause	A. Has been collected B. Is collected C. Be collected D. Was collected
4	Absurd:	A. Scarcity B. Adorn C. Rational D. Flourish
5	Gauche: Polished	A. Grow: Dwindle B. Warden: Tower C. Moat: water D. Thickness: Gauge
6	Bungle	A. Select B. Unpack C. Quarrel with D. Accomplish smoothly
7	Choose correct word or phrase that is most opposite of the word given.  Profligate	A. Assumed B. Virtuous C. Uneducated D. Routine E. Anti-social
	Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able	
8	to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotty debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.  Which of the following is not true, according to the passage?	A. Society is not affected by the research in genetic engineering B. Genetic engineering are not able to say some things with certainty C. If genetic information is not properly handled, it will create problems D. Manipulation of genes is presently done only in tissue cell
9	to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. Genetic engineering are not able to say some things with certainty C. If genetic information is not properly handled, it will create problems D. Manipulation of genes is presently

delicate operations like crafting jewelry. In times of desperation, it can even be used as a

symbol of labor, the hammer has come to represent hard work and embody the spirit of

human industry

weapon. The hammer truly is a great tool. It is simple, powerful, and useful. A quintessential

**L. L** 

was only after we implemented a strict

routine of feeding, sleeping, and

activity time that we finally able to

eniov a soundless night

Question:

As used in the final paragraph, which of the following describes something quintessential?

Cindy liked parks. She liked the trees and grass and nature. She liked the birds and squirrels she say in parks. She also liked walking down wooded trails or riding bikes along gravel paths. Parks were a lot more fun to exercise in than just walking down the street. because there was so much to see. She had been to many kinds of parks. Some were in mountains, with rivers and hiking. Some were open areas with broad stretches of green grass to play on. Others were in the forest, with paths running beneath towering trees with sweeping branches overhead. Cindy's favorite parks were near lakes. There was a lake park not far form her house. It had a boardwalk trail that was set on pilings across a shallow lake. That was the best part. She loved to walk along the brown wood path and stop along the way, looking in the water for frogs and turtles. There were a few pavilions to stop and sit under in the shade. The water was deeper near them, so she could see fish sometimes. Occasionally, she would even see long-legged water birds, like cranes. The fall was the best time to visit the lake parks. With the leaves changing color, it was very beautiful. The sun would be out in the cloudy sky, and then cool breezes would blow through the reeds and water grasses. Spring was nice, too, because all the butterflies were out. The flowers and blossoming trees along the wooded paths were fragrant and beautiful. The lake grasses were tall and green, rustling in the wind. Cattails bobbed among the reeds. It was a good time to visit. Summer was okay. It was still pretty, but too hot. At least in winter things were pretty, if in a stark and cold way. The white dusting of snow that covered everything gave the park a clean look. It was fun to follow other people's footprints in the snow, or to go out on the boardwalk and look at the frozen top of the lake. If Cindy had her way, she would visit the park every day. Come to think of it, she did it was also a great place to do homework or read.

A. fish

B. water birds

-..,-, -. ----...

C. alligators

D. turtles

Question:

What kind of animal CAN'T Cindy see at the lake park near her house?

A. Artist: Smock
B. Bib: Dinner
C. Muzzle: Biting
D. Spats: Ankles

A. Research-oriented
B. Sprawling
C. Intelligent

D. Energetic
