

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Disconcert	A. Sign in harmony B. Pretend C. Cancel program D. Confuse
2	Absorbed	A. Espoused B. Porous C. Refined D. Distracted
3	Abscond	A. conceal one self B. remain C. abstract D. fabricate
4	<p>Herschel was a Great Dane, which was a big dog. He was actually a puppy, but he was big enough that he looked like a full-size dog. He was bigger than Todd, his owner. The problem with Herschel was that he wasn't housebroken yet. He was six months old, but his original owner had kept him on a porch, where he could go to the bathroom whenever he wanted. That owner hadn't had a lot of time to take care of a dog, but he'd wanted one anyway. When he'd moved to another state for work, he'd given up his untrained puppy. It was sad story, but it looked like it might have a good end. Todd loved dogs, and he liked to spend time with them. He liked to train them, so he'd adopted Herschel. If it was going to work out, it would take lots of patience, love, and training. So, Todd woke up early every day. He walked Herschel immediately. They went for a long walk so Herschel could empty his bladder and use the bathroom. White Todd was at school, his mother let the dog out in the back yard every hour. When he returned home, Todd walked Herschel again. He'd put in another walk before they went to bed, too. With enough opportunities to go to the bathroom outside. Herschel didn't need to go inside. Still, he had accidents. He wasn't used to going only outside. It took a lot of patience to clean up his messes. but Todd did it anyway. Dedication was needed with an animal. They walked and walked every day, and Herschel started walking better on a leash. He respected his owner. They got along well together, and there were less and less messes inside. After several weeks, Herschel made it through a day without any trouble. Todd gave Herschel a hug and a special treat. Then, they went for another walk. It was great exercise for both of them, and it gave them time together. Todd hoped they would have many years together. His new friend meant a lot to him.</p> <p>Question: What is Todd's problem with Herschel?</p>	A. Herschel chew his shoes B. Herschel isn't housetrained C. Herschel bites people D. Herschel is a picky eater
5	<p><b>(Complete the sentence with suitable words)</b></p> <p>The counselor decided _____ the application</p>	A. To accept B. Accepting C. Accepts D. To accepts
6	<p>It is easy to make delicious-looking hamburger at home. But would this hamburger still look delicious after it sat on your kitchen table under very bright lights for six or seven hours? If someone took a picture or made a video of this hamburger after the seventh hour, would anyone want to eat it? More importantly, do you think you could get millions of people to pay money for this hamburger? These are the questions that fast food companies worry about when they produce commercials or print ads for their products. Video and photo shoots often last many hours. The lights that the photographers use can be extremely hot. These conditions can cause the food to look quite unappealing to potential consumers. Because of this, the menu items that you see in fast food commercials are probably not actually edible. Let's use the hamburger as an example. The first step towards building the commercial hamburger is the bun. The food stylist—a person employed by the company to make sure the products look perfect—sorts through hundreds of buns until he or she finds one with no wrinkles. Next, the stylist carefully rearranges the sesame seeds on the bun using glue and tweezers for maximum visual appeal. The bun is then sprayed with a waterproofing solution so that it will not get soggy from contact with other ingredients, the lights, or the humidity in the room. Next, the food stylist shapes a meat patty into a perfect circle. Only the outside of the meat gets cooked—the inside is left raw so that the meat remains moist. The food stylist then paints the outside of the meat patty with a mixture of oil, molasses, and brown food coloring. Grill marks are either painted on or seared into the meat using hot metal skewers. Finally, the food stylist searches through dozens of tomatoes and heads of lettuce to find the best-looking produce. One leaf of the crispest lettuce and one center slice of the reddest tomato are selected and then sprayed with glycerin to keep them looking fresh. So the next time you see a delectable hamburger in a fast food commercial, remember: you are actually looking at glue, paint, raw meat, and glycerin. Are you still hungry?</p> <p>Question:</p>	A. Have a great taste B. be the perfect shape and size C. appear natural D. look fresh

Based on information in the passage, it is most important for the lettuce and tomato used in a fast food hamburger commercial to

7	<p><b>Choose correct word or phrase that is most similar to the word given</b></p> <p>GARGOYLE</p>	<p>A. Stone spout B. Golden eagle C. Garish D. Vile E. Negation</p>
8	<p>Citizens have right that everyone should have _____ opportunity to have a job</p>	<p>A. An equal B. A equal C. The equal D. Equal</p>
9	<p>AUTHENTICITY : COUNTERFEIT</p>	<p>A. argument : contradictory B. reliability : erratic C. anticipation : solemn D. reserve : reticent</p>
10	<p><b>Identify Error</b></p> <p>The daughter <u>parted with</u> her mother <u>with tears</u> but the <u>journey</u> to Karachi <u>amused</u> her. <u>No error</u></p>	<p>A. A B. B C. C D. D E. E</p>
11	<p>Blustering</p>	<p>A. clam B. dangerous C. boiling D. risky</p>
12	<p>Paul's wife knows Paul loves to read cookbooks. She decides to get him one for his birthday. Paul tells her he will try to make a new recipe for three days in a row. On Monday, Paul makes blueberry pancakes for breakfast. He gets the blueberries from the farmers' market. On Tuesday, Paul makes beef soup for dinner. He puts in cubes of beef, carrots, and onions. The recipe calls for cream, but Paul does not cream. He uses water instead. On Wednesday, Paul makes a tomato salad with cucumbers and onions. He picks the cucumbers and tomatoes from his garden. He likes this dish best. It was also the easiest for him to make.</p> <p>Which dish does Paul like best?</p>	<p>A. The creamy one B. Beef soup C. Tomato salad D. Blueberry pancakes</p>
13	<p><b>(Complete the sentence with suitable words)</b></p> <p>Naureen is getting her hair _____ tomorrow</p>	<p>A. Cut B. Cutting C. Cutted</p>
14	<p>Torpor</p>	<p>A. Rankle B. Impeach C. Commentator D. Vigor</p>
15	<p><b>(Complete the sentence with suitable words)</b></p> <p>_____ prevents you smoke inhalation</p>	<p>A. To keep low ground B. Keeping low to the ground C. Low to the ground keeping D. Keeping low to the ground that</p>
16	<p>Truck : Lorry</p>	<p>A. Adobe : Brick B. Crane : Hoist C. Carriage : Pram D. Transport : Support</p>
17	<p>Charlatan</p>	<p>A. knowledgeable doctor B. trickster C. comedian D. senior government official</p>
18	<p>When the chairman became very ill, his wife began to take a more active role in business activities, and many people believed that _____ and the chairman shared his responsibilities</p>	<p>A. Her B. She C. Herself D. Hers</p>
19	<p>Tear</p>	<p>A. Rectify B. Lacerate C. Rupture D. Lancelets</p>

Fleas are perfectly designed by nature to feast on anything containing blood. Like a shark in the water or a wolf in the woods, fleas are ideally equipped to do what they do, making them very difficult to defeat. The bodies of these tiny parasites are extremely hardy and well-suited for their job.

A flea has a very hard exoskeleton, which means the body is covered by a tough, tile-like plate called a sclerite. Because of these plates, fleas are almost impossible to squish. The exoskeletons of fleas are also waterproof of fleas are also waterproof and shock resistant, and therefore fleas are highly resistant to the sprays and chemicals used to kill them.

Little spines are attached to his plate. The spine the flea scurries through an animal's fur in – search of grooming pet tries to pull a flea off through the hair coat, these spines will extend and stick to the fur like Velcro.

Fleas are some of the best jumpers in the natural world. A flea can jump seven inches, or 150 times its own length, either vertically or horizontally. An equivalent jump for a person would be 555 feet, the height of the Washington Monument. Fleas can jump 30,000 times in a row without stopping, and they are able to accelerate through the air at an incredibly high rate – a rate which is over ten times what humans can withstand in an airplane.

- A. Have waterproof sclerites
- B. Are excellent jumpers
- C. Reproduce very rapidly
- D. Can stick to fur like Velcro

20

Fleas have very long rear legs with huge thigh muscles and multiple joints. When they get ready to jump. They fold their long legs up and crouch like a runner on a starting block. Several of their joints contain a protein called resilin, which helps catapult fleas into the air as they jump, similar to the way a rubber band provides momentum to a slingshot. Outward facing claws on the bottom of their legs grip anything they touch when they land.

The adult female flea mates after her first blood meal and begins producing eggs in just 1 to 2 days. One flea can lay up to 50 eggs in one day and over 2,000 in her lifetime. Flea eggs can be seen with the naked eye, but they are about the size of a grain of salt. Shortly after being laid, the eggs begin to transform into cocoons. In the cocoon state, fleas are fully developed adults, and will hatch immediately if conditions are favorable. Fleas can detect warmth, movement, and carbon dioxide in exhaled breath, and these three factors stimulate them to emerge as new adults. If the flea does not detect appropriate conditions, it can remain dormant in the cocoon state for extended periods. Under ideal conditions, the entire life cycle may only take 3 weeks, so in no time at all, pets and homes can become infested.

Because of these characteristics, fleas are intimidating opponents. The best way to control fleas, therefore, is to take steps to prevent an infestation from ever occurring.

According to the passage, fleas are resistant to sprays and chemicals because they
