

ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
	<p>Educational planning should aim at meeting the educational needs of the entire population of all age group. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the age have their needs as well. Educational planning, in their words, should take care of the needs of everyone.</p>	
1	<p>Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report entitled 'learning to Be' prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self – learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.</p>	<p>A. As old as traditional education B. Still in formative stages C. In vogue in advance countries D. Not practical</p>
	<p>In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries. Museums, municipal recreational programs, health services etc.</p>	
	<p>According to the author, the concept of 'lifetime education' is</p>	
	<p>(Complete the sentence with suitable words)</p>	
2	<p>The doctor said that _____</p>	<p>A. The patient can turn over his medical test report on the Monday B. The medical test report on Monday could be received from the patient by him C. The patient could hand in the medical test report on Monday D. The patient will on Monday the medical test report turn in</p>
	<p>(Complete the sentence with suitable words)</p>	
3	<p>When we provided a lot of information regarding the evasion of the enemy they appreciated _____ this information</p>	<p>A. To have B. Having C. Have D. Has</p>
4	<p>Applause</p>	<p>A. to make noise B. acclaim C. abuse D. prosper</p>
	<p>Q.5 Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientist can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in</p>	
5	<p>achieving this feat, they have however acquired the ability in manipulating tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but on this issue, geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present, genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more</p>	<p>A. Insulted B. Talked about C. Killed D. Misused</p>

advanced this is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A U.K and Japan it remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.

i. In the passage abused means

	Choose Relative Pair Of Word	
6	TRUCK : LORRY	A. Adobe : brick B. Crane : hoist C. Carriage : pram D. Transport : support
7	Bucolic:	A. Rustic B. Pastoral C. Vindictive D. Urban
	(Complete the sentence with suitable words)	
8	They are _____ work peacefully	A. Accustomed with B. Accustomed by C. Accustomed of D. Accustomed < b > to < /b >
	(Complete the sentence with suitable words)	
9	Despite his illness Inzamam was _____ in winning his team	A. Disappointing B. Useless C. Vigorous D. Instrumental
10	The _____ arguments put forth for not disclosing the facts did not impress anybody.	A. Specious B. Intemperate C. Spurious D. Convincing

	(Complete the sentence with suitable words)	
12	A rumor that the corporation was close to the _____ caused panic among its creditors and stockholders	A. New venture B. Bankruptcy C. Dividend declaration D. Annual BDO meeting
13	Ambiguous	A. dubious B. clear C. arduous D. cordial
	Choose correct word or phrase that is most opposite of the word given.	
14	Terse	A. Chattering B. Threefold C. Lean D. Miserly E. Lumped together
	Choose correct word or phrase that is most opposite of the word given.	
15	Novice	A. Deletion B. Beatitude C. Volley D. Veteran E. Democrat
16	The songs of new age sound _____ me	A. Badly to B. Badly C. Bad D. Bad to
17	Detective : Informer	A. Author : Book B. Architect : Draftsman C. Reporter : Source D. Vacancy : Empty

I am writing in response to the article "Protecting our public spaces" in issue 14, published this spring in it, the author claims that "all graffiti is public spaces." I would like to point out that many people believe that graffiti is an art form that can benefit our public spaces just as much as sculpture, fountains, or other, more accepted art forms.

People who object to graffiti usually do so more because of where it is, not what it is. They argue, as your author does, that posting graffiti in public places constitutes an illegal act of property damage. But the location of such graffiti should not prevent the images themselves from being considered genuine art.

I would argue that graffiti is the ultimate public art form. Spray paint is a medium unlike any other. Though graffiti, the entire world has become a canvas. No one has to pay admission or travel to a museum to see this kind of art. The artists usually do ~~not receive payment for their efforts. These works of art define the urban landscape~~

A. Everyone was amazed to see the hot air balloon finally swell with air and lift off over the trees

not receive payment for their efforts. These works of art during the urban landscape are available, free of charge, to everyone who passes by.

18 To be clear, I do not consider random words or names sprayed on stop signs to be art. Plenty of graffiti is just vandalism, pure and simple. However, there is also graffiti that is breathtaking in its intricate detail, its realism, or its creativity. It takes great talent to create such involved designs with spray paint.

Are these creators not artists just because they use a can of spray paint instead of a paintbrush, or because they cover the side of a building rather than a canvas?

To declare that all graffiti is vandalism, and nothing more, is an overly simplistic statement that I find out of place in such a thoughtful publication as your magazine. Furthermore, graffiti is not going anywhere, so might as well find a way to live with it and enjoy its benefits. One option could be to make a percentage of public space, such as walls or benches in parks, open to graffiti artists. By doing this, the public might feel like part owners of these works of art, rather than just the victims of a crime.

Based on its use in paragraph 4, which of the following accurately describes something that is intricate?

What do you do with your orange peels and corn cobs after you are done eating? Most people throw them in the trash can. But food leftovers do not have to go into the trash. They are biodegradable, which means that they can be broken down by bacteria into natural materials. People who like to garden often put their fruit and vegetable scraps in a special place known as a compost pile. A compost pile is a spot outdoors where food waste can break down into compost, which gardeners use. This process takes several months. Once the compost is created, people spread this mixture in their gardens to add nutrients to the soil. The compost in the soil helps new plants grow in the garden. How do you take care of a compost pile? It needs air, water, and heat. Bacteria and other microorganisms break down the food waste into more basic elements like water and carbon dioxide. This process requires oxygen, so people use a shovel to turn compost regularly and help air reach all parts of the pile. The pile cannot dry out, so it could be covered to keep moisture in. Finally, heat speeds up the process. This means a compost pile should be in the sun for at least part of the day. Food leftovers are not the only things that turn into compost. You can also add yard waste like grass clippings, dried leaves, and straw. In fact, you should add these things to create a healthy balance in your compost. But do not add any weeds to your compost pile unless you want to grow weeds in your garden. Sometimes seeds are left behind in the compost. This can be a welcome surprise if you find a tomato plant sprouting where you had not planted one. The tomato seed was hiding in the compost, waiting to begin a new life in the garden.

Question:

The author apparently believes that a tomato plant

20 Unorganized guessing will probably not raise a test score as significantly as choosing one letter as a "guess answer"

and mix in over the trees
B. On the enormous billboard, a painted can of soda stood nearly 12 feet high
C. The photograph was so sharply focused that you could see the individual eyelashes on the subject's faces
D. The maze had many different paths that curled around each other in a complicated pattern

19
