

## ECAT Pre Engineering MCQ's Test For English Full Book

Sr	Questions	Answers Choice
1	Abstruse	A. complex B. disgruntled C. stubborn D. obvious
2	Prize	A. Seize B. Be severe C. Disdain D. Posterity
3	Attract	A. Progress B. Circumnutates C. Magnetic D. Repel
4	<p>Herschel was a Great Dane, which was a big dog. He was actually a puppy, but he was big enough that he looked like a full-size dog, He was bigger than Todd, his owner. The problem with Herschel was that he wasn't housebroken yet. He was six months old, but his original owner had kept him on a porch, where he could go to the bathroom whenever he wanted. That owner hadn't had a lot of time to take care of a dog, but he'd wanted one anyway. When he'd moved to another state for work, he'd given up his untrained puppy. It was sad story, but it looked like it might have a good end. Todd loved dogs, and he liked to spend time with them. He liked to train them, so he'd adopted Herschel. If it was going to work out, it would take lots of patience, love, and training. So, Todd woke up early every day. He walked Herschel immediately. They went for a long walk so Herschel could empty his bladder and use the bathroom. While Todd was at school, his mother let the dog out in the back yard every hour. When he returned home, Todd walked Herschel again. He'd put in another walk before they went to bed, too. With enough opportunities to go to the bathroom outside. Herschel didn't need to go inside. Still, he had accidents. He wasn't used to going only outside. It took a lot of patience to clean up his messes. but Todd did it anyway. Dedication was needed with an animal. They walked and walked every day, and Herschel started walking better on a leash. He respected his owner. They got along well together, and there were less and less messes inside. After several weeks, Herschel made it through a day without any trouble. Todd gave Herschel a hug and a special treat. Then, they went for another walk. It was great exercise for both of them, and it gave them time together. Todd hoped they would have many years together. His new friend meant a lot to him.</p> <p>Question How does Todd celebrate Herschel's first day without an accident?</p>	A. with a new collar B. with a good brush and nail clipping C. with a trip to the vet D. with another walk
5	<p><b>Choose correct word or phrase that is most opposite of the word given.</b></p> <p>Equilibrium</p>	A. Parallel B. Tranquilizer C. Membrane D. Imbalance E. Overseer
6	<p><b>Choose correct word or phrase that is most opposite of the word given.</b></p> <p>Succinct</p>	A. Helpless B. Overbearing C. Felonious D. Long-winded E. Blemish
7	<p><b>(Complete the sentence with suitable words)</b></p> <p>The applicant answered tough question with _____ candor winning over many interviewers who had previously supported his rival</p>	A. Planed B. Impatient C. Unintentional D. Disarming
8	Obsolete	A. Hyrum B. Modern C. Act D. Paramount
9	Posthumous	A. Grand B. Born after father's death C. Given to enjoyment D. Hard working
10	Choose the correctly spelt word	A. FEASIBEL B. FEASIBLE C. FASCIEBLE D. FEASEBLE
	<b>Choose correct word or phrase that is most similar to the word given</b>	A. Above

11	ABRUPT	<p>B. Sudden C. Noisy D. Calm E. Agnation</p>
12	GOLD : ORE	<p>A. dear : cheap B. iron : steel C. pearls : oysters D. steel : iron</p>
13	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.</p> <p>Which of the following is not true of the genetic engineering movement?</p>	<p>A. Possibility of abuse B. It is confronted by ethical problems C. Increased tendency to manipulate gene cells D. Acquired ability to detect genetic disorders in unborn babies</p>
14	<p><b>(Complete the sentence with suitable words)</b></p> <p>When Basit arrived home after a hard day at factory work _____</p>	<p>A. His children have been sleeping B. His children slept C. His children have slept D. His children were sleeping</p>
15	The college discipline committee requires that students _____ college 165 days a year	<p>A. Are in B. Be in C. Were in D. Should in</p>
16	Dusk : Dawn	<p>A. Senility : Childhood B. Necromancy : Magic C. Loquaciousness : Garrulity D. Adolescence : Infancy</p>
17	On which project will the author need to use the most tools?	<p>A. fixing the washing machine B. fixing the back porch C. both projects need the same number of tools D. neither project needs any tools</p>
18	<p><b>(Complete the sentence with suitable words)</b></p> <p>Dr.Khawaja is having the students _____ a composition</p>	<p>A. Writed B. Writeing C. Write</p>
19	<p>When we are young, we learn that tigers and sharks are dangerous animals. We might be scared of them because they are big and powerful. As we get older, however, we learn that sometimes the most dangerous animals are also the smallest animals. In fact, the animal that kills the most people every year is one that you have probably killed yourself many times: the mosquito.</p> <p>While it may seem that all mosquitoes are biters, this is not actually the case. Male mosquitoes eat plant nectar. One the other hand, female mosquitoes feed on animal blood. They need this blood to live and produce eggs. When a female mosquito bites a human being, it transmits a small amount of saliva into the blood. The saliva may or may not contain a deadly disease. The result of the bite can be as minor as an itchy bump or as serious as death.</p> <p>Because a mosquito can bite many people in the course of its life, it can carry diseases from one person to another very easily. Two of the most deadly diseases carried by mosquitoes are malaria and yellow fever. More than 700 million people become sick from these diseases every year. At least 2 million of these people will die from these diseases.</p>	<p>A. Oppose a previous argument B. Question an upcoming conclusion C. Confirm a hvpothesis</p>

Many scientists are working on safer and better ways to kill mosquitoes, but so far, there is no sure way to protect everyone in the world from their deadly bites. Mosquito nests can be placed over beds to protect people against being bitten. These nets help people stay safe at night, but they do not kill any mosquitoes. Mosquitoes have many natural enemies like bats, birds, dragonflies, and certain kinds of fish. Bringing more of these animals into places where mosquitoes live might help to cut down the amount of mosquitoes in that area. This is a natural solution, but it does not always work very well. Mosquitoes can also be killed with poisons or sprays. Even though these sprays kill mosquitoes, they may also harm other plants or animals.

Although mosquitoes may not seem as scary as larger, more powerful animals, they are far more dangerous to human beings. But things are changing. It is highly likely that one day scientists will find a way to keep everyone safe from mosquitoes and the diseases they carry.

In paragraph 2 the author writes, "This saliva may or may not contain a deadly disease." The purpose of this statement is to

20

Beauty is to ugliness as adversity is to

- A. happiness
- B. prosperity
- C. misery
- D. cowardice
