6	Choose the word/phrase related to given word/phrase PROTOPLASM: CELL	A. Chain: Link B. Fibre: Plastic C. Coin: Money D. Chemistry: Elements
5	The past decade has upset many preconceptions above development and this, more than anything else, makes it difficult to be overly definite about what the next decade has in store. However, there are a few things that one can assert with some confidence. First, education, health, and productive employment are crucial both for growth and for equity. We have tended to assume that all of these are the consequences of rapid economic growth and that only growth can generate the resources required for these purposes. However, increasingly, it appears that these are better seen as the causes rather than as consequences of development. Virtually every case of successful development involves a prior improvement in literacy, technical skills, health status, and access to productive work. Second, technological competence is the most important resource endowment and it explains a tar larger proportion of growth in output and trade than more conventional factors like natural resources or capital accumulation. The competence required is not just in research. In fact technological dynamism in the factory and the farm is more important than the presence of large research establishment. Third, the environmental imperative can no longer be ignored. Today, as an international issue, it is second only to disarmament. Nationally, the developmental consequences of environmental neglect are increasingly obvious. In the Pakistani context, there are at least two further factors, which reinforce the above propositions. The first is population growth. Given the pace of expansion of the population growth is also one, but not necessarily the most important factor, which underlines environmental stress in rural and urban areas. The second factor is that as a large country we cannot carve out an independent positioning the global system without building up a substantial capacity for self-reliant growth. The acquisition of technical competence is crucial for this purpose. Until now, we have tended to treat human resource development, technolo	A. Expansion of work force of high quality B. Lack of attention and action for protecting environmental wealth C. Reduction in growth rate of population D. Progressive degradation of technological competence in urban areas
4	TRUCK: LORRY	A. Adobe : Brick B. Crane : Hoist C. Carriage : Pram D. Transport : Support
3	Choose the Word Which has Opposite Meaning Languish:	A. Sink B. Thrive C. Visage D. Congealed E. Weaken
2	Complete Sentence The majority report issued by the committee was completely extolling in great detail the plans strengths but failing to mention at all its shortcomings.	A. Skewed B. Unbiased C. One-sided D. Comprehensive
1	Complete Sentence The officers threatened to take reprisals if the lives of their men were by the conquered natives.	A. Destroyed B. Endangered C. Enhanced D. Irritated

10	A great literary or artistic work is known as a	A. Pot pouri B. Par excellence C. Bete noire D. Pecadillo E. Magnum opus
11	Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report entitled 'Learning to Be' prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall. In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries, museums, municipal recreational programs, health services etc. Q:According to the author, what measures should open u	A. Develop various programs for adult learners B. Open more colleges on traditional lines C. Cater to the needs of those who represent 'core' D. Primary education should be under the control of open universities
12	Choose the Word Which has Opposite Meaning Tyro:	A. Expert B. Three pronged C. Timid D. Brave E. Hunter
