7	Choose the Word Which has Opposite Meaning Hearsay:	A. Gossip B. Robust C. Sobering D. Fact E. Information
8	The history of literature really began was the earliest of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own. As man slowly grew more civilized, he was compelled to invent some method of writing by three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to protect one's property by making tools, cattle and so on, in some distinctive manner. So man taught himself to write and having learned to write purely for utilitarian reasons he used this new method for preserving his war songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only a few could read what was written. Q: Before man invented writing	A. Literature was passed on by word of mouth B. Prayers were considered literature C. Literature was just singing and dancing D. There was no literature
9	Choose the Word Which has Opposite Meaning Polygamy:	A. Monotheism B. Polyandry C. Polyglot D. Polygyny E. Monotony
10	Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone. Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report entitled 'Learning to Be' prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is about the well known fact that the significance of a commitment of life-long	A. Approaching B. Contacting C. Introducing

already on the wall. In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means such more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also these institutions should learn to cooperate with the numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following is most nearly the same in meaning as the word 'meeting' as used in the passage?

D. Satisfying

11	Choose the Word Which has Opposite Meaning Levity:	A. Seriousness B. Flippancy C. Hold D. Restriction E. Frivolity
12	Choose the Word Which has Opposite Meaning Puerile:	A. Moaning B. Panting C. Rife D. Mature E. Childish
13	Choose the Word Which has Opposite Meaning Prefatory:	A. Conclusive B. In progress C. Convincing D. Summary E. Wise
14	Choose the Word Which has Opposite Meaning Resilient:	A. Unyielding B. Flexible C. Tinit D. Pliable E. Irrepressible
15	Choose the Word Which has Opposite Meaning Accomplice:	A. Opponent B. Desertion C. Escort D. Obey E. Accessory
16	Choose the Word Which has Opposite Meaning Fallacious:	A. Erroneous B. Jealous C. Faulty D. False E. True
17	Choose the Word Which has Opposite Meaning Gratuity:	A. Annuity B. Stipend C. Discount D. Wages E. Retirement
18	Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn fetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have, however, acquired the ability in manipulating tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the fetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K. and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world. Q: Which of the following is the same in meaning as the word 'feat' as used in the passage?	A. Process B. Focus C. Fact D. Goal
19	So many servants attended _____ him during his illness.	A. At B. Upon C. On D. With E. About
20	Choose the Word Which has Opposite Meaning Innate:	A. Inborn B. Acquired C. Sobriety D. Plot F. Inherent
