| Sr | Questions                                       | Answers Choice                                                                                                                             |
|----|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Bel is a unit of:                               | A. Atmospheric pressure <br><br>B. Electric current<br><br>C. Intensity of sound <br><br>D. Luminous intensity <br>                        |
| 2  | Fara is a unit of                               | A. Electric Capacitance <br><br>B. Depth of water <br><br>C. Work of energy <br><br>D. Mass <br>                                           |
| 3  | Erg is the unit of                              | A. Radioactivity <br><br>B. Quantity of Heat <br><br>C. Work of energy <br><br>D. Electric Capacitance <br>                                |
| 4  | Curie is a unit of:                             | A. Radioactivity <br><br>B. Quantity of Heat <br><br>C. Electric Capacitance <br><br>D. Electric Capacitance <br>                          |
| 5  | One meter is equal to__ cubic centimeters       | A. 100<br>B. 1000<br>C. 1000<br>D. 10                                                                                                      |
| 6  | One Gallon is equal to _____liters              | A. 4.55 l<br>B. 4.45 l<br><br>C. 4. 65 l<br><br>D. 4.35 l<br>                                                                              |
| 7  | BTU sis the abbreviation of                     | A. British Technical units <br><br>B. British thermal units <br><br>C. British temperature units <br><br>D. British temperature units <br> |
| 8  | In BTU system, one Btu is equal to              | A. 10.55 Joule <br><br>B. 1.055 Joule <br><br>C. 105..5 joule <br><br>D. 10.55 Joule <br>                                                  |
| 9  | Electron-volt is the unit for:                  | A. Energy <br><br>B. Power <br><br>C. Voltage <br><br>D. Current<br>                                                                       |
| 10 | In which system of units, gas bills are charged | A. SI<br>B. CGS<br>C. BTU<br>D. (b) and (c)<br>                                                                                            |
