

## Computer Science Ics Part 2 Chapter 13 Online Test

Sr	Questions	Answers Choice
1	Which of the following steps takes place when function is called:	A. The control moves to the function that is called B. All statements in the function body are executed C. The control returns back to the calling funciton D. All of these
2	Th process of sending an argument to a function is called:	A. Sending B. Filtering C. Delivering D. Passing
3	The name of actual and formal parameters:	A. May or may not be same B. Must be same C. Must be different D. Must be in lower case
4	Function define can be written:	A. Before main() function B. After main() function C. in a separate file D. All of these
5	Another name for build-in function is:	A. User-defined function B. Arithmetic function C. Library function D. Both a and b
6	What is the variable name that is used by a function to receive passed values?	A. Funciton B. Parameter C. Expression D. Constant
7	A variable declared inside a function is known as:	A. Local variable B. Global variable C. Automatic variable D. A and C
8	Formal arguments are also called:	A. Actual arguments B. Dummy arguments C. Original arguments D. Referenced arguments
9	Which of the following looks for the prototypes of function used in a program?	A. Linker B. Loader C. Compiler D. Parser
10	The function definition consists of:	A. Function header or function declaration B. Function body C. Both a and b D. None
11	Which of the following is true about a function call?	A. Stops the execution of the program B. Transfer control to the called function C. Transfer control to the main function D. Resumes the execution of the function
12	Memory is allocated to a local variable at the time of the :	A. Declaration B. Destruction C. Definition D. First reference
13	Function prototype for built-in-function are specified in:	A. Source file B. Header file C. Object file D. Image files
14	The statement that activities a function is known as:	A. Function call B. Function output

		C. Function design D. Function definition
15	Which of the following is true for return statement in a function?	A. It can return one value only B. It can return integer value C. It cannot return any value D. It cannot be used in a function
16	Which statement is used by a function use to return a value?	A. Give B. Return C. Continue D. Send
17	In a C program, two function can have:	A. Same name B. Same parameters C. Same name & D. Same parameters D. Same name but different parameters
18	A type of function that is available as part of language is known as:	A. User-defined function B. Library function C. Sun-program D. Both a and b
19	The first line of function definition is known as:	A. Function header B. Function body C. Arguments D. Return type
20	Function declaration consists of:	A. Function name B. Function return type C. Number and types of parameters D. All of these
