

## Computer Science Ics Part 2 Chapter 13 Online Test

| Sr | Questions   | Answers Choice  |
|----|---|---|
| 1  | The printf is a :   | A. Build-in function<br>B. User-defined function<br>C. Local function<br>D. Keyword   |
| 2  | Th process of sending an argument to a function is called:            | A. Sending<br>B. Filtering<br>C. Delivering<br>D. Passing   |
| 3  | Which of the following is type of function available in C language?   | A. User-defined<br>B. Build-in<br>C. Subprogram<br>D. Both a and b  |
| 4  | The first line of function definition is known as:                    | A. Function header<br>B. Function body<br>C. Arguments<br>D. Return type  |
| 5  | Multiple arguments to a function are separated by:                    | A. Comments<br>B. Semicolons<br>C. Colons<br>D. Commas  |
| 6  | A value that can be sent to a function is known as:                   | A. Return value<br>B. Indicator<br>C. Argument<br>D. Automatic variable   |
| 7  | The function definition consists of:                                  | A. Function header or function declaration<br>B. Function body<br>C. Both a and b<br>D. None  |
| 8  | A type of functions written by the programmer is known as:            | A. User-defined<br>B. Subprograms<br>C. Subroutines<br>D. Built-in function   |
| 9  | Which statement is used by a function use to return a value?          | A. Give<br>B. Return<br>C. Continue<br>D. Send  |
| 10 | The scope of a variable refers to its:                                | A. Lengh<br>B. Name<br>C. Accessibility<br>D. Data type   |
| 11 | Which of the following is incorrect?                                  | A. A function can call another function<br>B. A function can be called many times in a program<br>C. A function can return values input by the user<br>D. A function must at least one variable parameter |
| 12 | Function declaration consists of:                                     | A. Function name<br>B. Function return type<br>C. Number and types of parameters<br>D. All of these   |
| 13 | Global variable are created in:                                       | A. RAM<br>B. ROM<br>C. Hard Disk<br>D. Cache  |
| 14 | A type of function that is available as part of language is known as: | A. User-defined function<br>B. Library function<br>C. Sun-program<br>D. Both a and b  |

|    |  |  |
|----|--|--|
| 15 | Which of the following is true for return statement in a function? | <p>A. It can return one value only<br/>B. It can return integer value<br/>C. It cannot return any value<br/>D. It cannot be used in a function</p>   |
| 16 | Which of the following steps takes place when function is called:  | <p>A. The control moves to the function that is called<br/>B. All statements in the function body are executed<br/>C. The control returns back to the calling function<br/>D. All of these</p> |
| 17 | A build-in function:   | <p>A. Cannot be redefine<br/>B. Can be redefined<br/>C. Cannot return a value<br/>D. Should be redefined</p>   |
| 18 | Which of the following is true about a function call?              | <p>A. Stops the execution of the program<br/>B. Transfer control to the called function<br/>C. Transfer control to the main function<br/>D. Resumes the execution of the function</p>          |
| 19 | Which of the following is NOT a valid function declaration?        | <p>A. int ave3(int a, int b, int c)<br/>B. int 3ave(int a, int b, int c)<br/>C. int ave3(int, int, int)<br/>D. int ave_3(int a1, int b2, int c3)</p>   |
| 20 | Function define can be written:                                    | <p>A. Before main() function<br/>B. After main() function<br/>C. In a separate file<br/>D. All of these</p>  |
