

NAT I Arts Verbal

Sr	Questions	Answers Choice
1	Choose the words or phrases that is most opposite in meaning to the word. STRENUOUS	A. Unfaltering B. Irresolute C. Unwavering D. Lazy
2	Sentence Completion Conservative historians who represent a traditional account as _____ because of its age may be guilty of taking on trust what they should have _____ in a conscientious fashion	A. Ancient...established B. False...reiterated C. Mythical...fabricated D. Accurate...examined E. Suspicious....challenged
3	Choose a related pair of words or phrases CAMERA : SIGHT	A. Pictures : anthology B. Type : touch C. Headphone : hearing D. Thirst : water
4	Choose the words or phrases that is most opposite in meaning to the word. CONSPICUOUS	A. Child B. Sad C. punishment D. Sorrow
5	Choose a related pair of words or phrases ARGUMENT : DEBATE	A. Indifferent B. Harmless C. Insignificant D. Unknown
6	Choose the words or phrases that is most opposite in meaning to the word. ATTRACT	A. Violence : Peace B. Fight : Contest C. Challenge : Opponent D. Doe : Stag
7	Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder it is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in While they have not yet been able to change the genetic order of the germs they are optimistic and are holding out that in the near future they might be successful in achieving this feat They have however acquired the ability in manipulating tissue cells. However genetic mis-information can sometimes be damaging for it may adversely affect people psychologically Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them it is mainly a societal problem At present genetic engineering is a costly process of detecting disorder but scientists hope to reduce the costs when technology becomes more advanced.This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A, U.K and Japan.It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world.i. Which of the following according to the author could be the short-comings of genetics in becoming an exact science?	A. Repulse B. Reject C. Repel D. Distract
8	Choose a related pair of words or phrases AUTHOR : INVENTOR	A. There is a lack of advance technology to explore hidden areas of human brain B. Technicians have not been able to manipulate germ cells C. Ordinary microscope is unable to observe nerve cells D. Genetics is too complex to resolve some useful information
9	Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder it is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in While they have not yet been able to change the genetic order of the germs they are optimistic and are holding out that in the near future they might be successful in achieving this feat They have however acquired the ability in manipulating tissue cells. However genetic mis-information can sometimes be damaging for it may adversely affect people	A. Copy right : patent B. Plot : Machine C. Technology : Gadget D. Book : Factory
10	Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder it is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in While they have not yet been able to change the genetic order of the germs they are optimistic and are holding out that in the near future they might be successful in achieving this feat They have however acquired the ability in manipulating tissue cells. However genetic mis-information can sometimes be damaging for it may adversely affect people	A. Introspective B. Accusative

psychologically. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorder but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A, U.K and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world. o. According to the author the present state of knowledge about heredity has made geneticists

C. Arrogant
D. Optimistic

Sentence Completion

11 It was difficult to imagine Jameela, _____ woman as a psychiatrist listening while others talked was not her style

A. A talkative
B. A cheering
C. A smiling
D. A aggressive

Sentence Completion

12 As _____ of the Sindh supreme selection board Allah Bachayo had free _____ to all Government rest houses throughout the country

A. A scholar-admission
B. A survivor-passage
C. An organizer-submission
D. An institution-advice
E. A member-entrance

Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the germs they are optimistic and are holding out that in the near future they might be successful in achieving this feat. They have however acquired the ability in manipulating tissue cells. However genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorder but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A, U.K and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world. f. Which of the following is the opposite in meaning to the word charged as used in the passage?

A. Calm
B. Disturbed
C. Discharged
D. Settled

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their enthusiasm, or strike out in a new direction, or improve their skills as much as any university professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to Be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

A. To criticize the present educational system
B. To strengthen the present educational practices
C. To support non-conventional educational organizations
D. To present a pragmatic point of view.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with the numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following best describes the purpose of the author?

15 Gravity is related to Pull in the same way as Magnetism is related to.....?

A. Repulsion
B. Attraction
C. Separation
D. Push

Choose a related pair of words or phrases

16 SLICE : SCALPEL

A. Knit : gloves
B. Signal : flare
C. Yarn : fiber
D. Air : tube

Sentence Completion

17	An editorial praised the generosity of an anonymous _____ who had donated over a million rupees and several priceless books to the college	A. Donor B. Benefactor C. Promoter D. Rich
18	Choose the words or phrases that is most opposite in meaning to the word. RESPITE	A. Tension B. Exertion C. Regularity D. Delay
19	Choose a related pair of words or phrases BINOCULARS : SEE	A. Spectacle : notice B. Skeptic : Idea C. Ear trumpet : hear D. Camera : aperture
20	<p>Educational planning should aim at meeting the educational needs of the entire population of all age groups while the traditional structure of education as a three hierarchy from the primary stage to the university represents the core we should not overlook the periphery which is equally important under modern conditions workers need to rewind or renew their enthusiasm or strike out in a new direction or improve their skills as much as any university professor the retired and the aged have their needs as well Educational planning in their words should take care of the needs of everyone.Our structures of education have been built up on the assumption that there is a terminal point to education This basic defect has become all the more harmful today A UNESCO report entitled Learning to Be prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various form of self-learning A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents And performance not the period of study should be the basis for credentials The writing is already on the wall.In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries the possibility of the idea becoming an integral part of educational thinking seems to be a far cry for to move in that direction means such more than some simple rearrangement of the present organization of education but a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools Also these institutions should learn to cooperate with the numerous community organizations such as libraries museums municipal recreational programs health services etc.m. Which of the following is most opposite in meaning to the word integral as used in the passage?</p>	A. Essential B. Independent C. Major D. Minor
