Sr	Questions	Answers Choice
1	Choose a related pair of words or phrases GILL: FIN	A. Cockroach : Antenna B. Instrument : Pencil C. Hard disk : Keyboard D. Bread : Butter
2	Indolence is related to Work in the same way as Taciturn is related to	A. Observe B. Speak C. Cheat D. Act
3	Choerent is related consistent in the same way as <u>lrate</u> is related to	A. Unreasonable B. Unhappy C. Irritated D. Angry
4	Recent advance in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child Though genetic engineering is still at its infancy scientists can now predict with greater accuracy a genetic disorder it is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in While they have not yet been able to change the genetic order of the germs they are optimistic and are holding out that in the near future they might be successful in achieving this feat They have however acquired the ability in manipulating tissue cells. However genetic mis-information can sometimes be damaging for it may adversely affect people psychologically Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines but on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them it is mainly a societal problem At present genetic engineering is a costly process of detecting disorder but scientists hope to reduce the costs when technology becomes more advanced. This is why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A, U.K and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate disease from this world. I. Which of the following according to the author could be the short-comings of genetics in becoming an exact science?	A. There is a lack of advance technology to explore hidden areas of human brain B. Technicians have not been able to manipulate germ cells C. Ordinary microscope is unable to observe nerve cells D. Genetics is too complex to resolve some useful information
5	Democratic societies from the earliest times have expected their governments to protect the weak against the strong. No 'era of good feeling' can justify discharging the police force or giving up the idea of public control over concentrated private wealth. On the other hand, it is obvious that a spirit of self-denial and moderation on the part of those who hold economic power will greatly soften the demand for absolute equality. Men are more interested in freedom and security than in an equal distribution of wealth. The extent to which Government must interfere with business, therefore, is not exactly measured by the extent to which economic power is concentrated into a few hands. The required degree of government interference depends mainly on whether economic powers are oppressively used, and on the necessity of keeping economic factors in a tolerable state of balance. However, with the necessity of meeting all these dangers and threats to liberty, the powers of government are unavoidably increased, regardless of the political party in power. The growth of government is a necessary result of the growth of technology and of the problems that go with the use of machines and science. Since the government must take on more powers to meet the problems of the nations, there is no way to preserve freedom except by making democracy more powerful. Q: 'Era of good feeling' in the paragraph refers to	A. Time of prosperity B. Time of adversity C. Time without government D. Time of police atrocities
6	Waves are related to Air in the same way as Ripples are related to?	A. Wind B. Water C. Air D. Bird
