

## NAT II Biological Science Verbal

Sr	Questions	Answers Choice
1	Axiom:	A. Absurdity B. Shirk C. Elude D. Maxim
2	TACTFUL	A. Unbound B. Boorish C. Lazy D. Renowned E. Polished
3	NYMPH	A. Clinch B. Flinch C. Airy D. Fairy E. Cheery
4	He had the nerve to suggest that I was cheating.	A. Strength B. Capacity C. Audacity D. Courage
5	Liaqat Ali Khan was murdered by	A. Muhammad Ahmed B. Sayyad Akbar C. Akbar khan D. Saeed Ahmed
6	ABHOR : DISLIKE::	A. Calcify : Petrify B. Rebuke : Ridicule C. Torture : Discomfort D. Fodder : Cattle
7	CHAOTIC	A. Immersive B. Orderly C. Hectic D. Nervous E. Embarrassing
8	An argument _____ between the two friends.	A. Broke out B. Broke in C. Sprang up D. Rose up
9	The whale shark is found in equatorial deep waters around the world, it is ----- encountered by divers.	A. Rarely B. Successfully C. Anxiously D. Constantly
10	OBSOLETE	A. Ilyrum B. Modern C. Act D. Paramount E. Hesitant

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents. When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.

pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

E. None of these

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period- from infancy through preschool years- that sets the stage for a child's future.

The main focus of the passage is on the plight of

The public distribution system, which provides food at low prices, is a subject of vital concern. There is a growing realization that though Pakistan has enough food to feed its masses three square meals a day, the monster of starvation and food insecurity continues to haunt the poor in our country.

Increasing the purchasing power of the poor through providing productive employment, leading to rising income, and thus good standard of living is the ultimate objective of public policy. However, till then, there is a need to provide assured supply of food through a restructured, more efficient and decentralized public distribution system (PDS).

Although the PDS is extensive – it is one of the largest such systems in the world – it has yet to reach the rural poor and the far off places. It remains an urban phenomenon, with the majority of the rural poor still out of its reach due to lack of economic and physical access. The poorest in the cities and the migrants are left out, for they generally do not possess ration cards. The allocation of PDS supplies in big cities is large than in rural areas. In view of such deficiencies in the system, the PDS urgently needs to be streamlined. In addition, considering the large food grains production combined with food subsidy on one hand and the continuing slow starvation and dismal poverty of the rural population on the other, there is a strong case for making PDS target group oriented.

12

The growing salaried class is provided job security, regular income, and percent insulation against inflation. These gains of development have not percolated down to the vast majority of our working population. If one compares only dearness allowance to the employees in public and private sector and looks at its growth in the past few years, the rising food subsidy is insignificant to the point of inequity. The food subsidy is a kind of D.A. to the poor, the self-employed and those in the unorganized sector of the economy. However, what is most unfortunate is that out of the large budget of the so-called food subsidy, the major part of it is administrative cost and wastages. A small portion of the above budget goes to real consumer and an even lesser portion to the poor who are in real need.

It is true that subsidies should not become a permanent feature, except for the destitute, disabled, widows and the old. It is also true that subsidies often create a psychology of dependence and hence are habit-forming and killing the general initiative of the people. By making PDS target group oriented, not only the poorest and neediest would be reached without additional cost, but it will actually cut overall costs incurred on large cities and for better off localities. When the food and food subsidy are limited, the rural and urban poor should have the priority in the PDS supplies. The PDS should be closely linked with programs of employment generation and nutrition improvement.

Q: Which of the following is the main reason for insufficient supply of enough food to the poorest?

- A. Mismanagement of food stocks
- B. Absence of proper public distribution system
- C. Production of food is less than the demand
- D. Government's apathy towards the poor

13

VALID

- A. Laud
- B. Unsound
- C. Due
- D. Dump
- E. Cogent

14

The petition before the court prayed for \_\_\_\_\_ the appointment orders issued by the management

- A. Posting
- B. Quashing
- C. Granting
- D. Removing
- E. Dismissing

15

Belying his mother's worries, Amir's behavior throughout the function was \_\_\_\_\_

- A. Imaginable
- B. Imperial
- C. Immodest
- D. Inevitable

D. Impeccable  
E. Impervious

16 RECALCITRANT

A. Submissive  
B. Maladroit  
C. Audacious  
D. Travail  
E. Divert

Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangutans, since females can only breed every few years and, like humans, give birth not to litters but single offspring.

17

Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costumes agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful than orangutans, the latter provide anthropologists with useful information about the behavior of prehuman primates and how apelike behavior influenced our ancestors search for the food and family beneath the forest canopy.

Which of the following can be inferred between the behavior of orangutans and that of other ape species?

A. While orangutans spend much of their time on the treetops, other apes live exclusively on the ground  
B. Orangutans and other types of apes are all sociable species but orangutans are more likely to bond for life  
C. Apes such as chimpanzees rely less upon their size than average orangutans do  
D. Orangutans spend less time in the company of their members of their species than do some other apes  
E. Because of their stringent territoriality orangutans are less likely to elude capture by poachers than are other apes

18 \_\_\_\_\_ by people's perception it seems that democracy has succeeded in Pakistan

A. Making  
B. Planned  
C. Following  
D. Going  
E. Liked

19 ADAPT

A. Approve  
B. Applaud  
C. Shed  
D. Reject  
E. Fit

20 When Mahatma Gandhi visited Kashmir?

A. aug 14, 1947  
B. 1st Aug 1947  
C. Oct 16, 1947  
D. Nov 15, 1948
