

## NAT II Oriental & Islamic Studies Verbal

Sr	Questions	Answers Choice
1	The officers threatened to take reprisals if the lives of their men were by the conquered natives.	A. Destroyed B. Endangered C. Enhanced D. Irritated
2	We lost confidence in Salim because he never the grandiose promises he had made	A. Tired of B. Delivered on C. Retreated from D. Forget about
3	LUGUBRIOUS : DOLEFUL	A. Banal : Insipid B. Tractable : Recalcitrant C. Pensive : Vacuous D. Profligate : Miserly E. Tangible : Illusory
4	Pistol: Shoot	A. Stone: Throw B. Catechism: Church C. Ball: Goal D. Shaft: Fling E. Sword: Cut
5	You must dispense his service	A. With B. Of C. In D. At
6	The Chairmen rejected the proposal of increasing employees salary because:	A. The company had already gained three thousand crore profit B. The company did not have sufficient funds to afford the rise C. The number of employees in the company was very small D. The employees had been demanding it for a long time E. It was not difficult for the company to bear additional burden
7	Sad: Melancholic	A. Over: Under B. Joy: Ecstasy C. Weak: Robust D. Book: Writer E. Floor: Ceiling
8	Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangulants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.  Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costums agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.	A. Stress the importance of preserving orangutans as a species B. Indicate the widespread practice of animal poaching C. Refute the theory that orangutans can live in a variety of environments D. Contrast the behavior of orangutans with that of other apes E. Emphasize the consequences of orangutan territoriality

9	LINEAL	B. Isolated C. Directly descended D. Wrinkled E. Circular
10	The art of shehnaz Begum often presents us with an idyllic vision that is subtly by more sinister elements, as if suggesting the beauty of our surroundings.	A. Enhanced pristine B. Invaded flawed C. Altered Unmarred D. redeemed hallowed E. devastated bland
11	LOUTISH	A. Dejected B. Vast C. Urbane D. Pitiful E. Silent
12	ACT : STAGE::	A. Swim: Pool B. Whale: River C. Cat: Dog D. Fish: Trout
13	GAUCHE: POLISHED::	A. Grow: Dindle B. Warden: Tower C. Moat: Water D. Thickness: Gauge
	Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic	

engineering is still at tis infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

14

A. Wipe off

B. EradicateC. Give birth to

D. Wipe out

Q: Which of the following is the same in meaning as the word "obliterate" as used in the passage?

15	GREGARIOUS	A. Posterior B. Outstanding C. Poisonous D. Reclusive E. Congenital
16	ESOTERIC:	A. Fair B. Popular C. Alluring D. Private
17	The manner in which the trainee manager candidate addressed the board of selection committee was basic reason for his rejection; the board members agreed that enthusiasm is an essential is an essential quality in a manager.	A. Imaginative B. Superior C. Timorous D. Perfunctory E. Suspicious

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report. titled "Learning to be" prepared by Edgar Faure and others in

1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

B. Worker's knowledge and skills also need to be updated constantly. C. "Learning to Be" defends that there is a terminal point to education.

A. Lifelong learning is a recent

concept.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

D. Schools and colleges should open extension services.

Q: Which of the following in not true in context of the given passage?

A. Alarm: Whistle B. Desert : Sahara 19 SPATTER: SOAK:: C. Bubble : Ball D. Whisper: Shout A. Embezzle : Account B. Refine : Crude Oil 20 OSSIFY: BONE D. Filter: Water E. Euphoria : Hydrophobia
